

# Protecting the extremities

**Extremities Hiker Sock** Material (percentage): Wool (73) – including Wool Ultra (19) and Merino (54); Nylon (17), Elastane (7); CoolMax (3).

Extra padding around the ankle and heel give your feet protection where it's needed. The high percentage of Elastane helps keep the sock comfortable and snug against the foot, therefore avoiding blisters. Although the feet are kept warm, CoolMax wicks away sweat.

**Our view** I wore these thicker socks a great deal over the winter period, and they proved just the job to act as a buffer between my feet and my heavier winter boots.

**Expect to pay £12**
