

WILD COUNTRY HOOLIE 2 **£140**

Weight: 2.3kg **Contact:** www.terra-nova.co.uk

The Hoolie is a roomy, 2-pole tunnel tent weighing in at 2.3kg. It's a tad heavier than you would expect for a tent of this design, but has strong, durable inner and outer fabrics with decent hydrostatic head (HH) ratings of 4000 for the outer and 6000 for the groundsheet. There's an ample porch area to stow bags and wet kit and the door has a half mesh upper to allow for good ventilation to combat condensation build-up. There are no less than eight guy lines so this gives outstanding stability, and I'm confident it will deal with all but the harshest winter conditions. The Hoolie also packs down really well and if split between two will work even better.

Verdict: A well-priced and rugged 3-season tent with enough room and features

9/10
