Description

The Etesian range are spacious tents, designed for lightweight, short duration trips such as weekends away, mountain biking, or trips to the coast with the family.

All use Wild Country Superflex alloy poles, and have the Wild Country tried and tested, high performance flysheet and groundsheet fabrics. These lightweight tents are quick and easy to pitch, flysheet first, and their freestanding design also means that they are suitable for pitching where the ground is loose as they do not require firm pegging points to create their structure.

Fundamentally for short trips, the Etesian 3 tent has a small pack size and doesn't take up much space in the boot of the car, but also has greater head height than you would normally expect in a 3 person lightweight tent. Packed with features to make camping life easier! The sewn in porch groundsheet has a zip-back feature, exposing the ground, making an ideal area for muddy boots and dirty equipment which are kept undercover whilst leaving the rest of the porch clean. Condensation and air circulation are handled with front and rear vents. A mesh panel in the rear of the inner and flysheet vent plus a part mesh door on the inner help to keep air flowing throughout the tent.

Groundsheet protectors to prolong the life of the tent and help keep it clean can be purchased separately.

Features: Lightweight and simple to pitch. Excellent ventilation & Condensation Management. Sheltered entrance for use in bad weather. Fully taped flysheet and groundsheet. Stable freestanding design. Reflective guylines. Superflex T6 alloy poles. Porch zip-back groundsheet.
