

Starlite 2 Tent

The Starlite 2 is an extremely lightweight traditional tunnel tent for 2 people with a packed length of just 29cm. Its small pack size makes it perfect for bike packing, cycle camping and travellers looking to minimise their overall rucksack size. The silicone coated flysheet has been treated with Terra Nova Equipment's unique Seam Plus water resistant seam technology to provide a higher level of water resistance than a non-treated seam.

Sleeps: 2

Season Rating Spec: 3 season backpacking

Free standing?: No (tent requires guy lines to be pitched)

Minimum Weight: 1.36Kg (3lb)

Packed Weight: 1.53Kg (3lb 6oz)

Description

The Starlite 2 is an extremely lightweight 2 person tunnel tent designed for bike packing, cycle camping or the traveller looking for the smallest overall pack size.

â–° The tent poles pack down to just 29cm long which means the Starlite 2 will fit easily into most panniers or packs, the attachment loops on the outside of the compact storage bag enable it to be fixed directly onto a bike or rucksack

â–° The silicone coated ripstop nylon flysheet has been treated with Seam Plus technology, a unique development by Terra Nova Equipment which helps to seal the seams and provide a higher level of water resistance than a similar untreated flysheet

â–° The Starlite 2 tent is designed for 3 season use ie Spring to Autumn weather conditions, and for medium duration trips where more space may be required. There's a generous porch for the size of tent and the tunnel design provides plenty of space in the inner

â–° The Starlite 2 is suitable for wild camps on bike packing trips but is equally at home for campsite stays. The simple tunnel design pitches as one ie the inner and flysheet together, which makes it quick and easy to erect at the end of a long day. Once pitched the buckle pegging points at each corner of the flysheet allow the tension to be quickly and easily adjusted.

â–° The inner door is one third midge proof mesh for good ventilation and the flysheet door opens to one side. The reflective guylines are made from Dyneema, Dyneema is three times as strong as standard guyrope of the same weight and has very low stretch for stability in all conditions.

3 and 1 person versions of this tent are also available [Starlite 3](#) and [Starlite 1](#)
