## Description

### Lightweight 1 person backpacking tent for 4 season use

Designed for those who want to venture out all year round with a lightweight, backpacking tent, this model blends 2 iconic Terra Nova tents. The lightweight, low profile design of the Laser incorporates the same 30D flysheet and 70D groundsheet fabric used in the Quasar, and with a few additional features to improve performance in wintry conditions we have the Laser Compact All Season.

â-° The flysheet and groundsheet both have fully taped waterproof seams and we've also used a #5 zip, the same as the Quasar, on the flysheet for added durability.

â-° We've made it easier to vent the tent in poor conditions with the inclusion of a hood at the top of the flysheet zip and the zip which can also be opened from either end. The All Season tent also includes vents at either end of the inner and flysheet, like the standard Laser Compact.

â-° For added weatherproof protection the flysheet zip flap has an automatic magnetic closure which is a fumble free way of locating and holding it in place.

â-° In case you need to double pole the tent when you're out, the pole sleeve has been widened to accommodate an extra pole (extra poles are available to buy separately) and there are extra eyelets in the pull out tapes to locate the extra pole feet. Lastly there are a couple of extra guylines at each end for a secure pitch.

â-° We've included a handy webbing loop at the bottom of the flysheet door to accommodate a trekking pole, enabling you to create a useful canopy.

â-° The Laser Compact All Season 1 is the same size as the Laser Compact 1 and also packs down to a compact pack size - only 30x15cm, making it just as easy to stash in a rucksack or pannier.

â-° Whether you are planning to wild camp or venture out all year round on backpacking or bikepacking trips and need a 1 person lightweight tent that is easy to carry, the Laser All Season Compact 1 is one of the best options.

A 2 person version of the tent is available here [Laser All Season Compact 2](#).

Footprints to prolong the life of the tent are available [Laser All Season Compact 1 Footprint](#)
