extremities®

The Best Protection

Our **extremities**® clothing accessories range has been synonymous with quality and performance for over 25 years, with an enviable reputation for providing the best protection in the worst conditions.

Over the years, **extremities**® hats, gloves, socks and gaiters have been put to the test by explorers and record breaking athletes as well as being tried and trusted by customers worldwide. Our commitment to the quality of the products we develop and the service we provide is also demonstrated by our ISO9001 accreditation.

The AW14 collection is our most extensive yet featuring a new Stretch Waterproof Power Liner range, comprehensive range of gaiters, specific fit for women's and junior styles and new performance knitwear.

From mountaineers to occasional walkers, runners and cyclists or to those simply looking for a stylish everyday accessory, **extremities**® has a product for everyone.

FABRIC TECHNOLOGY

POLARTEC® POWER STRETCH® PRO™ 4 times more wind resistant than traditional fleece and provides extra warmth without weight, as well as being water repellent and breathable.

POLARTEC® POWER STRETCH® fabric has 4-way stretch properties - hugging the skin to keeping you dry by wicking sweat away. It is also highly breathable, and wind resistant.

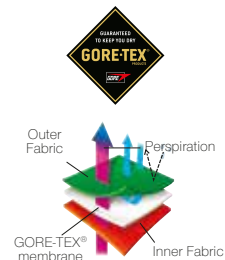

POLARTEC® POWER DRY® keeps you dry when you sweat by picking up moisture and moving it away from the skin. It's also highly breathable, quick drying, and comfortable.

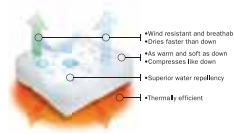

GORE-TEX® Gloves engineered with X-TRAFITM product technology. The ideal solution for park & pipe, racing, freediving and mountaineering: durable waterproof, windproof and breathable. A special bonding technology attaches the normally loose layers to each other preventing movement between them. The result: optimum grip on the ski poles and better dexterity for handling zippers, glasses, bags a. s. o.

GORE-TEX® fabrics prevent the entry of rain and melting snow, yet allow perspiration to escape - keeping you comfortable. GORE-TEX® produce a range of materials for a wide variety of activities.

PRIMALOFT® uses a patented microfibre structure to help the body retain warmth and so conserve energy. It is as warm as down, compressible, breathable and water repellant.

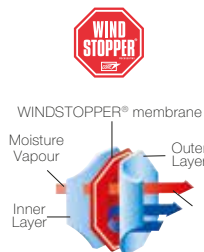

Different weights of Primaloft® One explained

We use different weights of Primaloft® One depending on the conditions the products are designed for:

- 3oz: The lightest and most flexible insulation we use, for maximum dexterity
- 5oz: A standard single layer insulation, suitable for most conditions
- 6oz: A double layer of 3oz insulation
- 10oz: A double layer of 5oz insulation for severe conditions
- 13oz: A triple layer of insulation, for protection in the most extreme conditions

FABRIC TECHNOLOGY

The WINDSTOPPER® membrane system provides a windproof barrier that is extremely breathable. It prevents cold winds from cutting through the fabric but allows the body heat to ventilate.

SuperFabric® brand materials incorporate a variety of protective fabric functions that no other known fabric can simulate. The simple explanation of how SuperFabric® works is that tiny hard plates are attached over the surface of a fabric surface. This unique approach and solution, in addition to the fabric's surprisingly eco-friendly textiles, demonstrates the high level of performance that enhances any product using SuperFabric®.

Polypropylene

Polypropylene is very durable, it also has the lowest thermal conductivity of all fibres and the lowest moisture regain coefficient. This means it is very warm and high wicking, making it ideal for liner and mid layers. extremities has developed exclusive polypropylene fabrics and knits for its range.

Power Liner

Power Liner provides a high quality knit, great thermal properties and outstanding moisture management characteristics. Its high stretch, close fitting performance is combined with a soft fleecy back for maximum comfort. A great value option for gloves, hats and neck tubes.

Dry Stretch Waterproof Stretch Technology

Fashioned from extremities® Power Liner fabric, with a fully waterproof, breathable membrane, the Dry Stretch range provides a perfect blend of comfort and performance. Available in Standard, Sticky and Thermal variations there is a Dry Stretch option to suit most outdoor enthusiast's needs.

Merino Wool

Merino Wool has good thermal, wicking and antibacterial properties. It absorbs up to a third of its weight in water but still retains warmth when wet. Merino Wool is one of the finest wools making it suitable for people with more sensitive skin, fibres with a thickness of only 20 microns are used in extremities® products.
