- 48-51 Lifestyle Range
- 52-53 Gaiters and Socks
- 54-57 Fabric Technology
- 58-60 Point of Sale Material

extremities®

The Best Protection

Extremities® was developed in the 1980s to fill a gap in the market for dedicated clothing accessories that protected the extremities of the body in the worst possible conditions. It became the choice specialist range of head, hand and foot protection for mountain and polar expeditions.

Over the last 30 years our gloves, hats, socks and gaiters have evolved to provide a wider selection of styles suitable for more outdoor activities. **Extremities®** clothing accessories have been put to the test by explorers and record breaking outdoor athletes who have taken them to the ends of the earth and some of the most extreme places on the planet. Our Field Sports and Country Lifestyle collections and new 'Office to Outdoor' styles extend our offering further still.

We are an accessories specialist focusing purely on gloves, hats, socks and gaiters. We pride ourselves on our technical understanding of fabrics and materials and how they work best in clothing accessories. We invest in stock enabling us to fulfil in-season orders in addition to pre-orders, with many styles available all year round. Sell through in store is supported with a comprehensive range of POS. Finally our commitment to the quality of the products we develop and the service we provide is demonstrated by our ISO9001 accreditation.

Our Autumn / Winter 2018 range is our most comprehensive yet. From mountaineers to walkers, runners, cyclists, anglers and country sports enthusiasts or those simply looking for stylish everyday outdoor accessories that perform, the **Extremities®** range has a product for everyone.

THERMAL GLOVES

Code 26MTO

FABRIC TECHNOLOGY

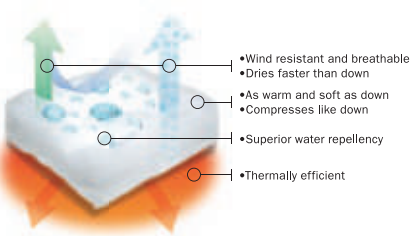

Pittards® Oiltac Technology

Specialised polymers are incorporated into the leather structure, which promote contact adhesion and significantly improve the ability to grip in all conditions. Once incorporated into the leather, the specialised polymer maintains a reservoir which rises to the surface when it is needed to replenish and maintain grip. Pittards® Oiltac has been designed to limit water uptake into the fibre structure, thus guaranteeing excellent tactile sensitivity under the most adverse conditions.

PrimaLoft® Gold Insulation is the go-to choice for adventurers looking for protection in extreme conditions. Microfibers trap body heat to make this the most thermally-efficient synthetic insulation available, with water-repellency that insulates even in the wettest weather – maintaining 98% of warmth when wet.

Kevlar®

Kevlar® belongs to the Aramid family of yarns, renowned for their high strength and low weight properties. With a strength to weight ratio 5 times greater than steel and outstanding abrasion resistance our Kevlar® fabric is designed for use in the most demanding environments.

Different weights of PrimaLoft® Gold Insulation explained

We use different weights of PrimaLoft® Gold Insulation depending on the conditions the products are designed for:

- 3oz: The lightest and most flexible insulation we use, for maximum dexterity
- 5oz: A standard single layer insulation, suitable for most conditions
- 6oz: A double layer of 3oz insulation
- 10oz: A double layer of 5oz insulation for severe conditions
- 13oz: A triple layer of insulation, for protection in the most extreme conditions

Merino Wool

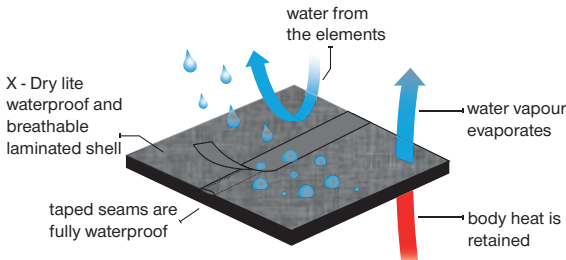

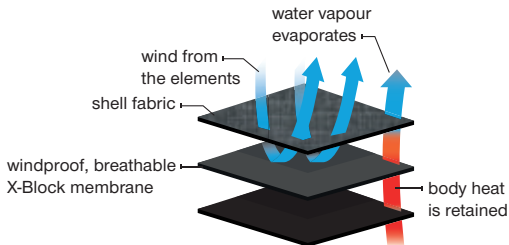

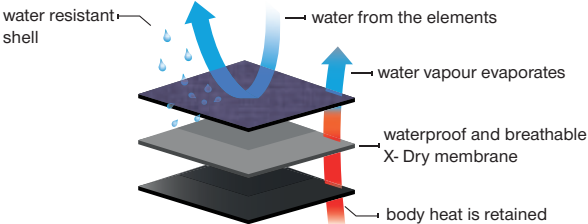

Merino Wool has good thermal, wicking and antibacterial properties. It absorbs up to a third of its weight in water but still retains warmth when wet. Merino Wool is one of the finest wools making it suitable for people with more sensitive skin, fibres with a thickness of only 20 microns are used in extremities® products.

PrimaLoft® Silver Performance Yarn

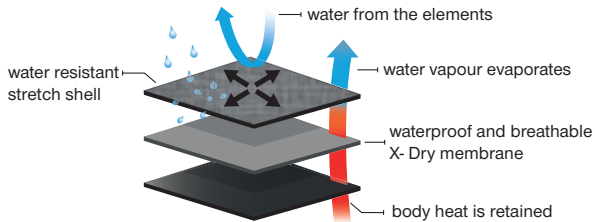

The hydrophobic properties of PrimaLoft® fibres and hydrophilic properties of Merino wool combine to form a dynamic moisture management system that transfers moisture away from the skin and pushes it out through the surface, keeping you dry and comfortable. The combination of technology and nature results in a yarn blend that is durable and dries quickly, with minimal shrinkage.

FABRIC TECHNOLOGY

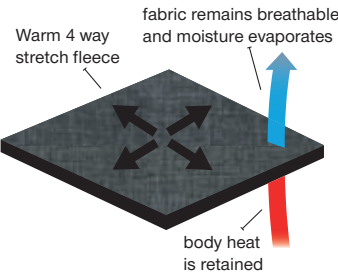

Reflective prints and yarns provide an added safety feature in the dark or low light conditions. The reflective effect is achieved through the use of micro glass beads which collect light, focus it and bounce it back to the light source.

The reflective element lights up for the person with the light source or who is in line with it. The quality of the reflective elements is specified to achieve the required level of visibility and products are designed to provide 360° reflection where feasible.

Power Liner

Power Liner provides a high quality knit, great thermal properties and outstanding moisture management characteristics. Its high stretch, close fitting performance is combined with a soft fleecy back for maximum comfort. A great value option for gloves, hats and neck tubes.

FABRIC TECHNOLOGY

GORE-TEX® Gloves

Gloves engineered with GORE-TEX® inserts are **durably waterproof, windproof and highly breathable** – guaranteed.

GORE-TEX® Gloves + Gore active technology

GORE-TEX® Gloves + Gore active technology
Optimized for enhanced breathability – for an increased level of comfort in an even wider range of activity levels.

GORE-TEX® Gloves + Gore warm technology

GORE-TEX® Gloves + Gore warm technology
The warmest GORE-TEX® gloves available are optimized to keep hands warmer for longer.

GORE-TEX® Gloves + Gore grip technology

GORE-TEX® Gloves + Gore grip technology
Outstanding dexterity and tactility for a sure grip makes it easier to handle ski poles, zippers, goggles, bags, etc.

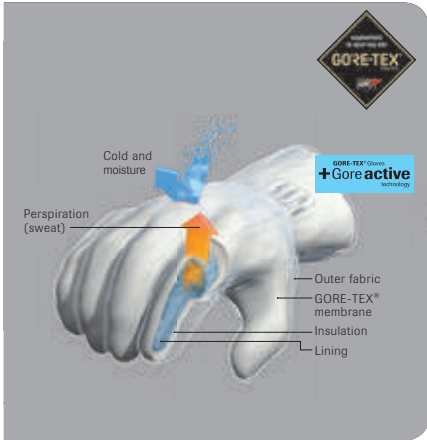

GORE-TEX® Gloves + Gore 2in1 technology

GORE-TEX® Gloves + Gore 2 in 1 technology
Two different chambers allow choice between direct grip or warmth.

GORE-TEX® Gloves
Waterproof, windproof, and highly breathable.
Gloves engineered with GORE-TEX® inserts are the ideal solution for all kinds of winter sports: **durably waterproof, windproof and breathable** – guaranteed. Your hands stay warmer when it's cold, and drier when you perspire.

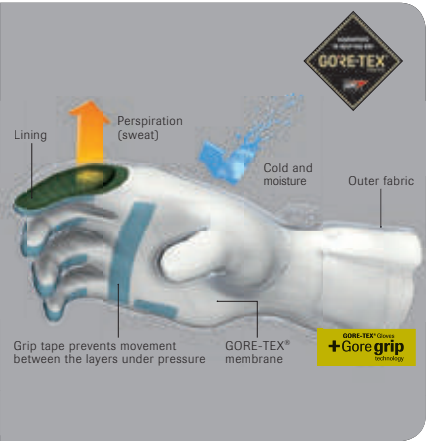

GORE-TEX® Gloves
+ Gore active technology
Drier. Longer. Waterproof and breathable.
Gloves engineered with GORE-TEX® inserts + Gore active technology are durably waterproof, windproof and breathable – guaranteed. The whole system of inner lining, membrane and outer material is optimized for extreme breathability. This increases the level of comfort even in a wider range of activity levels.

FABRIC TECHNOLOGY

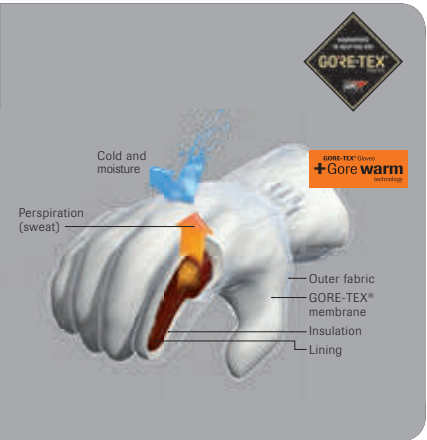

GORE-TEX® Gloves
+ Gore grip technology
Outstanding tactility. Sure Grip. Waterproof and breathable.

Gloves engineered with GORE-TEX® inserts + Gore grip technology are durably waterproof, windproof and breathable – guaranteed. Thanks to their innovative layered construction, they provide outstanding dexterity and tactility for an optimum grip. This makes it easier to handle your ski poles, zippers, goggles, bags, etc.

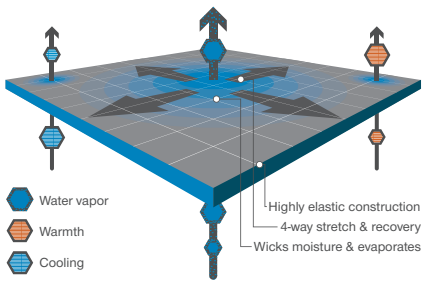

GORE-TEX® Gloves
+ Gore warm technology
Warmer. Longer. Waterproof and breathable.

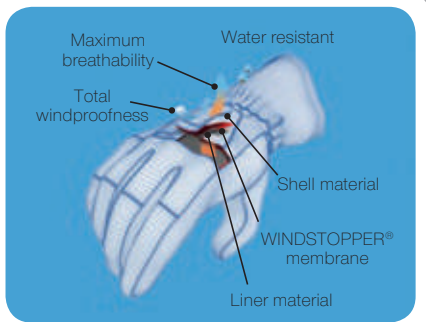

Gloves engineered with GORE-TEX® inserts + Gore warm technology are durably waterproof, windproof and breathable – guaranteed. Even in harsh conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

POLARTEC® POWER STRETCH® fabric has 4-way stretch properties - hugging the skin to keeping you dry by wicking sweat away. It is also highly breathable, and wind resistant.

Gloves engineered with **WINDSTOPPER®** product technology offer absolute windproofness and water resistance while being extremely breathable. They are the ideal solution for all kinds of high aerobic sports in moderate weather conditions.

This is a product guide designed for pre-selling 2018 products. Due to the selling-in process, not all styles/colours may be available in 2018. Due to continual product development, specifications may change between the production of this guide and delivery of goods. If you would like to confirm details before placing orders, please contact us using the details above.
