REDEFINE YOUR LIMITS

Extremities® have been designing and manufacturing high-quality clothing accessories since the 1980s. Using tried and tested materials, **Extremities®** products perform in some of the most extreme conditions, keeping you protected in every possible environment. For over 40 years our gloves, hats, gaiters and socks have evolved to provide a wider selection of styles suitable for anyone venturing outdoors.

Extremities® clothing accessories have been put to the test by explorers and record breaking outdoor athletes, who have taken them to the ends of the earth and in some of the most extreme places on the planet.

Sustainability

We're passionate about the outdoors and we're equally as passionate about reducing our impact on the environment. Therefore, we're taking the necessary steps to reduce our carbon footprint.

From 2022, our product ranges offered more eco-friendly options with the introduction of Polylana® ECO yarn and recycled insulation from PrimaLoft®, which is now made from the first-ever biodegradable, 100% recycled synthetic fibres.

Alongside these, the GORE-TEX® Novagaiters and

Tay Ankle Gaiters, are also made from recycled polyester.

This year, we're adding to the ECO offering with PFC-free liners in certain products and our first 100% recycled Eco glove. Look out for the ECO and PFC-free icons throughout the brochure.

Elasticated drawcord

Colour: Black Weight: 245g
50% Nylon, 50% Polyester

Sizes: S/M, L/XL | Code **25N0000**

PrimaLoft® Gold Eco Insulation is the go-to choice for adventurers looking for protection in extreme conditions.

Different weights of PrimaLoft® Gold Insulation explained

We use different weights of PrimaLoft® Gold Insulation depending on the conditions the products are designed for:

- 3oz:** The lightest and most flexible insulation we use, for maximum dexterity
- 5oz:** A standard single layer insulation, suitable for most conditions
- 6oz:** A double layer of 3oz insulation
- 10oz:** A double layer of 5oz insulation for severe conditions
- 13oz:** A triple layer of insulation, for protection in the most extreme conditions

Reflective prints and yarns provide an added safety feature in the dark or low light conditions. The reflective effect is achieved through the use of micro glass beads which collect light, focus it and bounce it back to the light source.

The reflective element lights up for the person with the light source or who is in line with it. The quality of the reflective elements is specified to achieve the required level of visibility and products are designed to provide 360° reflection where feasible.

- Repreve® is a fibre made from recycled plastic bottles and post-industrial waste
- Available in Repreve® polyester and Repreve® nylon
- Made from 100% recycled materials

Shock absorption

Inner layer

Merino Wool

Merino Wool has good thermal, wicking and antibacterial properties. It absorbs up to a third of its weight in water but still retains warmth when wet. Merino Wool is one of the finest wools making it suitable for people with more sensitive skin, fibres with a thickness of only 20 microns are used in extremities® products.

100% PURE / NATURAL MERINO

water vapour evaporates

wind from the elements

windproof, breathable X-Block membrane

body heat is retained

warm 4 way stretch fleece

body heat is retained

fabric remains breathable and moisture evaporates

Ultra Liner Fleece

Ultra liner fabric is a lightweight, packable grid fleece which provides a high warmth to weight ratio. A great layering fabric when cold and ideal for high energy activities. The grid construction means air flows more easily through the channels, providing good breathability while the squares trap warmth.

Power Liner

Power Liner provides a high quality knit, great thermal properties and outstanding moisture management characteristics. Its high stretch, close fitting performance is combined with a soft fleecy back for maximum comfort. A great value option for gloves, hats and neck tubes.
