REDEFINE YOUR LIMITS

Extremities® have been designing and manufacturing high-quality clothing accessories since the 1980s. Using tried and tested materials, Extremities® products perform in some of the most extreme conditions, keeping you protected in every possible environment. For over 40 years our gloves, hats, gaiters and socks have evolved to provide a wider selection of styles suitable for anyone venturing outdoors.

Extremities® clothing accessories have been put to the test by explorers and record breaking outdoor athletes, who have taken them to the ends of the earth and in some of the most extreme places on the planet.

Sustainability

Our mission is to produce high-performance outdoor accessories while reducing our environmental impact. Over the last few years, we’ve been taking imperative steps to reduce our carbon footprint by introducing our X-Eco fabric range, removing unnecessary packaging on our products, eradicating PFCs and using recycled technologies across our ranges.

Several Extremities products are also bluesign® and OEKO-TEX® approved, solidifying our commitment to sustainable products and manufacturing. Look out for the logos next to the products to confirm their status. We’re continuously working on our sustainability pledge and look forward to progressing further as we develop ways to offer the best-performing products with an eco-friendly approach.

Technical Specifications

We pride ourselves on offering high-quality, technical-performance outdoor accessories, therefore, we’ve introduced Hydrostatic Head (HH) and breathability ratings alongside the product weight and insulation weight. Our products are subject to rigorous testing to ensure the high standards we strive to achieve.

X-ECO
recycled content

X-Eco

X-Eco products are made from at least 90% recycled fabric.

GLO
by extremities®

X-Eco

Reflective prints and yarns provide an added safety feature in the dark or low light conditions. The reflective effect is achieved through the use of micro glass beads which collect light, focus it and bounce it back to the light source.

The reflective element lights up for the person with the light source or who is in line with it. The quality of the reflective elements is specified to achieve the required level of visibility and products are designed to provide 360° reflection where feasible.

PRIMALOFT® Gold

The original high-performance synthetic insulation features superior lightweight warmth, even in wet conditions.

Ultra Liner Fleece

Ultra liner fabric is a lightweight, packable grid fleece which provides a high warmth to weight ratio. A great layering fabric when cold and ideal for high energy activities. The grid construction means air flows more easily through the channels, providing good breathability while the squares trap warmth.

Power Liner

Power Liner provides a high quality knit, great thermal properties and outstanding moisture management characteristics. Its high stretch, close fitting performance is combined with a soft fleecy back for maximum comfort. A great value option for gloves, hats and neck tubes.

bluesign®

From fiber to finished product, bluesign® partners with brands, manufacturers, and chemical suppliers that are less impactful on the environment and people.

Consumers can trust that bluesign labeled textiles and products from the chemical inputs to the final production have met the strictest standards throughout the supply chain.

OEKO TEX® STANDARD 100

OEKO-TEX® STANDARD 100

OEKO-TEX® STANDARD 100 is a label for textiles tested for harmful substances. It sets the benchmark for textile safety, from yarn to finished product. Every item bearing the STANDARD 100 label is certified as having passed safety tests for the presence of harmful substances.

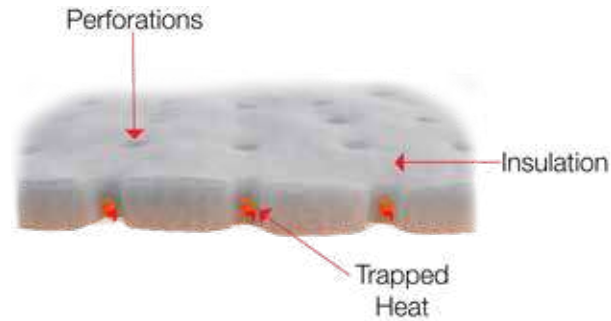

Merino Wool

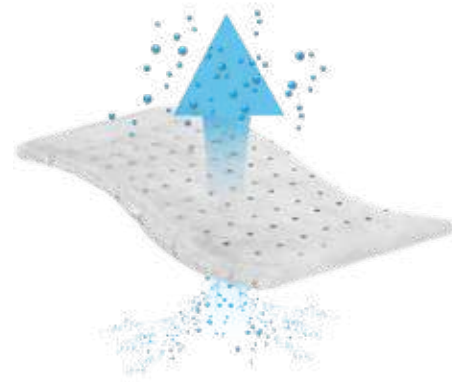

Merino Wool has good thermal, wicking and antibacterial properties. It absorbs up to a third of its weight in water but still retains warmth when wet. Merino Wool is one of the finest wools making it suitable for people with more sensitive skin, fibres with a thickness of only 20 microns are used in extremities® products.

Made from 100% recycled fibers, Vivo Recycled not only performs in its warmth and breathability but also in its sustainability. All fibers are sourced locally in Europe and are made from post-consumer plastic bottles, contributing to keeping our land and oceans clean.

Perforations allow for moisture vapor to easily escape through the insulation

GORE-TEX GLOVES GORE PLUS WARM TECHNOLOGY

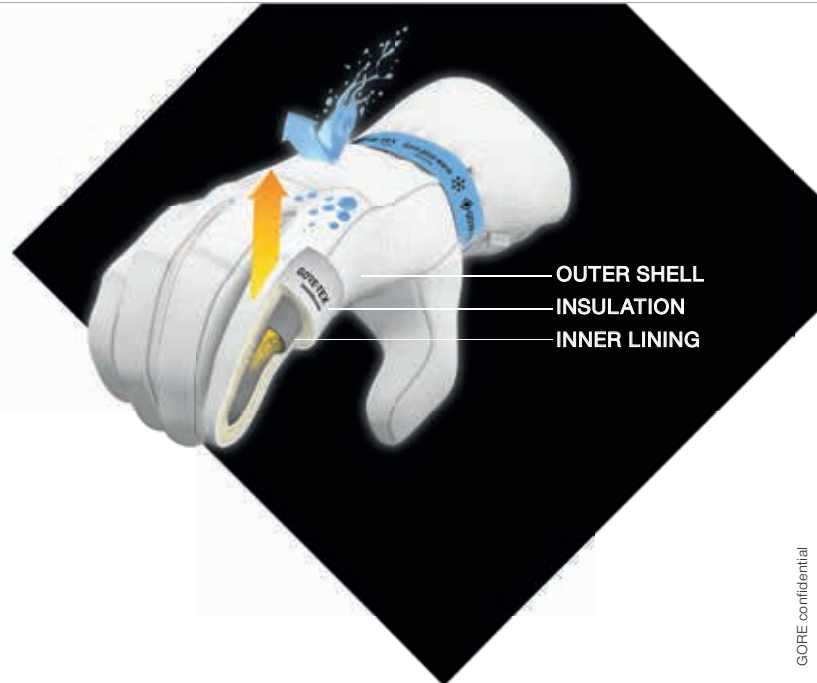

WARMER. LONGER.
WATERPROOF AND BREATHABLE.

TECHNICAL FEATURES

- ▶ Durable waterproof, windproof and breathable.
- ▶ Water stays on the outside while perspiration can easily escape from the inside.
- ▶ The whole system of inner lining, membrane and outer material is engineered to enable higher insulation performance.

CONSUMER BENEFITS

- ▶ Reliable protection against rain, snow and wind.
- ▶ Warm hands for longer, even in harsh conditions.
