and skiing

extremities®

MOUNTAIN GLOVE

The popular Ice glove has been re-engineered to provide an extremely high specification and high performance winter climbing glove. The outer shell has a reshaped thumb, full Pittards Armor Tan™ goat leather palm, fingers and thumb. A digitised version of the same leather is used for palm and thumb reinforcements and attached using Kevlar stitching, providing maximum grip and durability. Stretch Cordura on the back of the hand allows freedom of movement and the shock absorbing gel protection reduces jarring. The inner glove, which can be used on its own, houses the GORE-TEX® XCR® insert and is extremely warm, using 10oz Primaloft filling (the warmest ever extremities glove).

Fibre content: Back: 87% Nylon, 13% Elastane, Palm: 100% leather, Inner glove: 100% polyester

Sizes: XS, S, M, L, XL

MULTISPORT PRO

Using the Gore X-TRAFIT technology, the Multisport Pro is aimed at those who need the highest performance, and dexterity possible. The tough palm, and new cinch closure feature, make this glove ideal for most mountain sports.

Fibre content: 35% Nylon, 35% Leather, 30% Polyester
Sizes: S, M, L, XL
Colours: Black/Grey

NEW

ICE GAUNTLET

The Ice Gauntlet has been engineered to give an unbeatable combination of durability and dexterity with low weight. This performance, together with excellent thermal properties, high stretch and full knuckle protection, makes the Ice Gauntlet a must have for all serious mountaineers.

The palm, thumb and fingers are Kevlar with a Coolmax mix, for durability and moisture management. These are overlaid with extremosuede, which has been tested to 40,000 abrasion cycles. Extremosuede roll tip fingers combine high dexterity with durability. Stretch Cordura on the back of the hand allows freedom of movement and the shock absorbing gel protection reduces jarring. The shell, which has a brushed lining and GORE-TEX® XCR® insert, can be worn alone or used with the fleece liner glove in more severe conditions.

Fibre content: Back: 87% Nylon, 13% Elastane, Palm: 80% Nylon, 15% Polyester, 5% Elastane, Inner glove: 100% polyester

Sizes: XS, S, M, L, XL

MULTISPORT GTX

This is a true cross-activity glove with water resistant leather palm and fingers for superb dexterity. The Multisport GTX is fully waterproof and breathable with GORE-TEX® insert and brushed thermal lining.

Fibre content: Back: 70% Nylon, 20% Polyester, 10% Elastane, Palm: 100% Leather, Lining: 100% Polyester
Sizes: XS, S, M, L, XL
Colours: Black

LIGHTWEIGHT MOUNTAIN MITT

A versatile lightweight expedition mitt. The fully waterproof, breathable insulated inner mitt has PU overlays on the palm and fingers for grip, making it ideal for use on its own. In more severe conditions it can be used in conjunction with the durable outer shell. The shell has a water resistant goat skin palm and fingers for grip and durability, with gel knuckle and finger tip protectors.

Fibre content: Shell: 70% Nylon, 20% Polyurethane, 10% Polyester, Palm: 100% Leather, Lining and Inner Mitt: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

VERSASPORT 2 IN 1 GTX

This GORE-TEX® multi purpose glove has 2 separate compartments, offering the user both great warmth and also great dexterity. For maximum warmth place your hand in the outer compartment. For maximum dexterity slide your hand, into the palm side compartment. Offering the best of both worlds the Versasport is ideal for both skiers and mountaineers.

Fibre content: 95% Nylon, 5% Leather
Sizes: S, M, L, XL
Colours: Black/Grey

NEW

WINTER GAUNTLET GTX

A good, tough, multi-purpose glove ideal for scrambling or workwear. With GORE-TEX® liner, knuckle protection plus brushed lining for warmth.

Fibre content: Back: 75% Polyester, 20% PVC, 5% Leather, Palm: 50% Polyester, 50% Leather, Lining: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

TUFF BAG

Popular wet weather over-mitt which easily packs into a pocket when the weather improves. Made from lightweight GORE-TEX® PacLite Shell, which is seam sealed to provide 100% protection in the wet. The reinforced palm makes this suitable for use with walking poles.

Fibre content: Shell: 100% Nylon, Palm: 100% PU
Sizes: S, M, L, XL
Colours: Black, Red

CORBETT GLOVE

An ideal glove for winter walking and hiking. With GORE-TEX® liner to offer superior comfort and protection, durable nylon outer and PU palm for grip. The super soft brushed lining keeps hands warm and snug.

Fibre content: Shell: 100% Nylon, Palm: PU, Lining: 100% Polyester,
Sizes: S, M, L, XL
Colours: Black

BANFF GLOVE

An excellent winter sports glove with long cuff to keep out spindrift. With ripstop nylon shell, PU palm and supersoft brushed lining for warmth and comfort.

Fibre content: 60% Nylon, 30% Polyester, 10% Polyurethane, Insert: Hipora
Sizes: S, M, L, XL
Colours: Black

SUPER INFERNO GLOVE

Simply the warmest glove and mitt in our range. With 10oz Primaloft insulation front and back, these are perfect for those with 'cold hands' offering twice the insulation of the standard Inferno products.

Fibre content: 50% Nylon, 30% Polyester, 20% PVC, Insert: Hipora
Sizes: S, M, L, XL
Colours: Black

NEW

SUPER INFERNO MITT

GUIDE GLOVE

This close fitting, leather palmed WINDSTOPPER® glove is a favourite with mountain guides. With WINDSTOPPER® soft shell, a fleece lining and with a beautifully supple leather palm. The perfect glove for rope work.

Fibre content: Back: 100% Polyester, Palm: Leather, Lining: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

STICKY WINDY GLOVE

Updated for 09/10 with a new Silicone grip palm. This classic WINDSTOPPER® glove is a great companion for numerous outdoor activities. With pre-curved fingers and sticky print palm for a comfortable fit and good grip.

Fibre content: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

UPDATED

WINDY LITE DRY

Ideal for sports and activities where windproofing but low weight is essential. The Windy Lite Dry offers an enhanced moisture management system with Power Dry® palm and WINDSTOPPER® back. Perfect for use in highly aerobic activities such as running and cycling as well as during triathlons, adventure races and mountain marathons.

Fibre content: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

POWER DRY™

SAN REMO GLOVE

Full fingered glove, ideal for cycling. Featuring padded suedette palm with sticky silicon print for extra grip. Stretchy windproof back with reflective trim and reinforced thumb crotch.

Fibre content: 42% Polyester, 30% Nylon, 20% Polyurethane, 8% Elastane
Sizes: S, M, L, XL
Colours: Grey/Black

"Actually very versatile"

SGB Outdoor, December 2006

SUPER WINDY GLOVE

Updated for 09/10 the Super Windy has a much improved silicone palm grip, thick Polartec fleece insulation, and all the benefits of a Gore WINDSTOPPER SHELL. Added Karabiner hanging point on index finger.

Fibre content: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

WINDY GLOVE

Classic WINDSTOPPER® glove with pre-curved fingers for a comfortable fit. Similar to the Sticky Windy Glove but without the sticky palm.

Fibre content: 91% Polyester, 9% Others
Sizes: S, M, L, XL
Colours: Black

UPDATED

VUELTA GLOVE

Fingerless cycling glove with faux leather palm with padded heel. Stretchy back for a close fit with reflective trim. Absorbent, flannel nose wipe on thumb.

Fibre content: Back: 100% Polyester, Palm: 100% PU
Sizes: S, M, L
Colours: Orange/Black

WINTER HACKING GLOVE

Warm windproof glove, with berber fleece WINDSTOPPER® back and durable micro-grid nylon palm, ideal for winter riding where warmth and dexterity are important with reinforcements along fore finger and between little and ring finger.

Fibre content: 90% Polyester, 6% Nylon, 4% Polyurethane
Sizes: XS, S/M, L/XL
Colours: Black

ACTION STICKY WINDY GLOVE

Using WINDSTOPPER® soft shell, for a really close, dextrous fit. Pre-curved and roll tip fingers. With silicon Amara palm for great grip and dexterity.

Fibre content: Back: 100% Polyester, Palm: 70% Nylon, 30% Polyester
Sizes: S, M, L, XL
Colours: Black

VELO GLOVE

Lightweight WINDSTOPPER® glove suitable for cycling or walking. It has a really close fit with pre-curved fingers and a sticky overlay on the palm and two fingers.

Fibre content: 90% Polyester, 10% Others
Sizes: S, M, L, XL
Colours: Black

"Superb gloves"

Trail, December 2006

"Apparently indestructible! Even better than the sticky windys for those fiddly jobs with knots and crampons!"
Rob Collister, Mountain Guide

BOREAS STICKY GLOVE

Building on the successful Boreas headwear range, the Boreas Sticky glove provides 4x the wind protection of traditional fleece with a cosy brushed lining. With a Pittards leather palm and fingers for durability and grip, and long cuff with one handed closure to keep out draughts.

Fibre content: Main glove: 95% Polyester, 5% Elastane, Palm: Pittards Leather
Sizes: S, M, L
Colours: Grey

WIND PRO™

Pittards®

BOREAS GLOVE

A simpler style than the Boreas Sticky but just as good at fending off wind chill. The glove provides 4x the wind protection of traditional fleece with a cosy brushed lining plus close fitting knitted cuff to keep wrists snug.

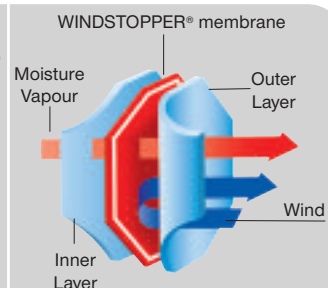

Fibre content: Main glove: 95% Polyester, 5% Elastane, Cuff: 100% Nylon
Sizes: S, M, L
Colours: Grey

WIND PRO™

The WINDSTOPPER® membrane system provides a windproof barrier that is extremely breathable. It prevents cold winds from cutting through the fabric but allows the body heat to ventilate. WINDSTOPPER® fabrics are 100% windproof and provide the ultimate windchill protection.

- Wind/Pro® is 4 times more wind resistant than traditional fleece
- Warmth without weight
- Water repellent
- Highly breathable, body moisture vapour passes through
- Machine washable
- Versatile use

STICKY POWER STRETCH® GLOVE

A sticky version of our popular POWER STRETCH® glove, this is ideal for running and active sports where some warmth and dexterity is required. The glove has a silicon print palm and fingers, as well as roll tip fingers for good grip and dexterity.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
Sizes: XS, S/M, L/XL
Colours: Black, Grey

Available in grey

POWER STRETCH® GLOVE

A popular glove with roll tip fingers for greater dexterity. Ideal for running or wearing as part of a layering system.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
Sizes: XS, S/M, L/XL
Colours: Black, Grey

Available in grey

POWER DRY® GLOVE

Using Malden POWER DRY® fabric for the best in next-to-skin moisture management, this close-fitting glove is designed for use as a base layer but is also suitable for use on its own in cool conditions. Highly breathable and quick drying.

Fibre content: 100% Polyester
Sizes: XS, S/M, L/XL
Colours: Black

STICKY THICKY GLOVE

Updated for 09/10 with a new Silicone grip palm. Similar to the popular Thick Glove but with sticky palm for extra grip. Use on its own or as part of a layering system.

Fibre content: 100% Polyester
Sizes: S, M, L
Colours: Black

"Used and Abused"
Trail, February 2006

UPDATED

THICKY GLOVE

Updated for 09/10 with an extra thermal performance. A popular thermal glove that offers a very comfortable fit. Can be used on its own or as part of a layering system.

Fibre content: 100% Polyester
Sizes: S, M, L
Colours: Black

FINGERLESS STICKY THICKY GLOVE

Updated for 09/10 with a new Silicone grip palm. Our popular Sticky Thick Glove but with the fingers removed. Durable and with sticky palms for extra grip.

Fibre content: 100% Polyester
Sizes: S, M, L
Colours: Black

UPDATED

Pack of 25

POWER STRETCH®

NEW

'Must Have'
Trail, November 2005

Power Stretch® & Power Dry® headwear

extremities® produces a superb range of headwear made from Polartec® POWER STRETCH® and POWER DRY® fabrics. The POWER DRY® hats employ Polartec's best fabric for next-to-skin moisture management, high breathability and quick drying capability. The POWER STRETCH® hats comprise a lightweight, fast-drying fleece which is thin but warm and provides a close fit. Both ranges are ideal for use during any outdoor activity, as part of a layering system or to wear under climbing, cycling or snowboarding helmets.

POWER STRETCH® BALACLAVA

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
Sizes: One Size
Colours: Black, Grey

Also available in grey

POWER STRETCH®

POWER STRETCH® BEANIE

A funky and fashionable multi purpose hat.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
Sizes: One Size

POWER STRETCH®

POWER DRY® BEANIE

Based on our popular POWER STRETCH® Beanie. This is ideal for wearing under a helmet or on its own when conditions are less extreme.

Fibre content: 100% Polyester
Sizes: One Size
Colours: Black

POWER DRY®

Polartec® Power Stretch® fabric features 4-way stretch and is very breathable. It keeps you dry when you sweat and provides warmth without the weight and bulk of traditional insulating fabrics. It features a proprietary construction with two unique surfaces: the durable nylon outer layer is wind- and abrasion-resistant; the soft inner layer pulls moisture away from your skin keeping you dry, warm and comfortable.

POWER STRETCH® BANDED BEANIE

A variation on the beanie hat. With fitted headband.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
Sizes: One Size
Colours: Black, Grey/Black

POWER STRETCH®

POWER STRETCH® NECK GAITER

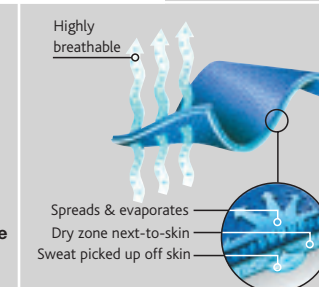

A long neck gaiter which easily folds into a pocket.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
Sizes: One Size
Colours: Black/Grey

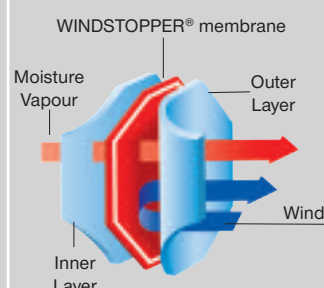

POWER STRETCH®

Polartec® Power Dry® fabric is designed to keep your skin dry when you sweat. Its patented bi-component construction moves at least 30% more moisture away from the skin than single component fabrics. Once moisture reaches the outside of the fabric, it spreads to many times its original surface area, enabling it to dry at least 2 times faster than cotton.

The WINDSTOPPER® membrane system provides a windproof barrier that is extremely breathable. It prevents cold winds from cutting through the fabric but allows the body heat to ventilate. WINDSTOPPER® fabrics are 100% windproof and provide the ultimate windchill protection.

socks

extremities®

sleeping bags

TERRA NOVA®

extremities® socks employ the latest sock technology, innovative design and unique fibre combinations to create next generation technical socks offering the ultimate in temperature, moisture and odour control. The range has selected:

- The innovative Wool Ultra™, a merino wool which is treated to provide better moisture management, better recovery from compression and less friction than conventional wool
- Coolmax®, made from specially engineered polyester fibres which pull moisture away from the feet to the outer layer of the socks.

THINNY SOCK

A lightweight, very high wicking liner sock to keep feet dry and provide extra comfort. Can be worn as a liner under thicker socks or on its own in warm conditions.

Fibre content: 72% Polyester, 22% Nylon, 6% Elastane
Sizes: S, M, L, XL (See below)
Colour: Black
Only available in packs of 2

ADVENTURE RACER SOCK

A lightweight, extremely high wicking cross training/running sock offering maximum dryness, protection and comfort.

Sizes: S, M, L, XL (See below)
Colours: Black marl / white

LIGHT HIKER SOCK

Warm and durable, this high wicking sock is best suited for spring, summer and autumn use. Offers a high level of shock absorbency and protection from blistering, as well as good moisture management.

Fibre content: 42% Polyester, 19% Elastane, 14% Nylon, 13% Wool Ultra, 12% Merino Wool
Sizes: S, M, L, XL (See below)
Colours: Navy marl

HIKER SOCK

Extra warm and durable, this sock can be used year-round for repeated daily walking use.

Fibre content: 73% Merino Wool (54% Merino Wool, 19% Wool Ultra), 17% Nylon, 7% Elastane, 3% Polyester,
Sizes: S, M, L, XL (See below)
Colours: Black marl

SUPER HIKER SOCK

A warm and durable trekking sock, designed to maximise warmth, comfort and odour control on extended walking trips, particularly in cold climates.

Fibre content: 77% Merino Wool, 19% Nylon, 4% Elastane
Sizes: S, M, L, XL (See below)
Colours: Green marl

THICKY SOCK

A heavyweight liner sock that is very high wicking. Can be worn as a winter liner sock or on its own in warm conditions.

Fibre content: 78% Polyester, 18% Nylon, 4% Elastane
Sizes: S, M, L, XL (See below)
Colours: Black
Only available in packs of 2

WOMEN'S LIGHT HIKER SOCK

As the Light Hiker sock but with a slimmer fit around the foot and ankle. Also comes with extra padding around the ankle – always popular with the ladies!

Fibre content: 60% Polyester, 25% Wool Ultra, 9% Nylon, 6% Elastane
Sizes: S, M (See below)
Colours: Grey marl

WOMEN'S HIKER SOCK

Warm and durable, this high wicking sock is very quick drying, offering maximum comfort. Specifically designed for women's feet with a slimmer fit around the foot and ankle and extra padding around the ankle.

Fibre content: 40% Wool Ultra, 38% Wool, 17% Nylon, 5% Elastane
Sizes: S, M (See below)
Colours: Blue marl

TGO ★★★★★

MOUNTAIN TOESTER

Mountaineering sock for use by winter walkers and climbers. Our warmest sock, available in long and short versions.

Fibre content: 63% Ultra Wool, 10% Wool (Long: 9%), 18% Nylon (Long: 19%), 6% Polypropylene, 3% Elastane
Sizes: S, M, L, XL (See below)
Colours: Oatmeal

LASER 300 - ELITE

Terra Nova's commitment to be the best continues with the lightest sleeping bag in the world.

Using high performance fabric technologies and a goose down filling (top and bottom) and a 900 Fill Power rating, it's the clear choice for ultra lightweight applications, and beautifully compliments our Laser Elite pack and Photon tent. With a performance of +8c and at a measly 330g it is hard to beat for the Mountain Marathon athlete.

LASER 600

We wanted to offer the lightest 0c rated bag in the market and we believe we have achieved our target, weighing in at 520g. It allows the Superlite user to push the boundaries into the winter months but keep their pack weight to the bare minimum. We again use our experience in fabric technology, and 900 fill goose down to create what we believe is the lightest bag in this category.

LASER 900

The third bag that completes the new sleeping bag range for 2009, again leading the way in Superlite sleeping bags but taking the logical progression to a serious winter bag where you can save 300g plus on the competition without sacrificing performance. Using down proof fabrics and 900 fill goose down we push the limits on technology in the sleeping bag category down to minus -12 but it only weighs an incredible 800g.

TERRA NOVA®

FEATURES

- For day races
- Body hugging shape
- Load distributing design
- Adjustable capacity
- Reflective trims
- Weight: **182g**

FEATURES

- For one or two day events
- Provides a very stable carry
- Easy access to all areas in the main pack
- Hip belt pockets for on the move access
- Weight: **328g**

NEW

- Weighs only **210g**
- Roll top closure
- Hip belt pockets
- Stretch mesh bottle/hydration pockets in side
- Side compression cords
- Hanging loop

FEATURES

- For lightweight mountain travel
- Designed for maximum volume in main compartment
- Lightweight hip belt
- Haul loops to hold pack vertical
- Weight: **467g**

The new range of lightweight Laser packs by Terra Nova has been designed for adventure races, mountain marathons and lightweight mountain use. Designed with low weight as a priority the range offers some of the lightest packs in their class.

LASER 6L

- Perfect for lightweight day use, day races, off road and mountain running.
- Smooth, contoured shape hugs body and improves stability.
 - Spacer mesh and foam back for maximum comfort, cool and dry.
 - Spacious hip pockets distribute the load and give 'on the move' access.
 - Easily accessible compression cords allow instant adjustment of the main compartment
 - Second 'lash' cord can be positioned on top or front and used to carry extra items.

LASER 20L

- The lightest fully equipped pack weighing just 328g. Designed for lightweight day use, adventure races, one or two day events, mountain biking. A combined weight with the Laser Photon (minimum weight) of 1.09kg.
- Contoured back and hip belt pockets give a very stable carry.
 - Spacer mesh panels on back and hips in main contact area for greater comfort.
 - Lightweight shoulder straps have spacer mesh underside.
 - Adjustable and removable chest strap with whistle buckle.
 - Long vertical front zip gives easy access to all areas of main pack.
 - Security, zipped pocket on top front panel.
 - Large volume hip belt pockets for 'on the move' access.
 - Versatile drinks carry capabilities, 2 side bottle pockets, 2 front mesh pockets.
 - 2 front compression cords to stabilise part full pack and extra top Hypalon™ tab for cord loop if required for tent pole carry etc.

LASER 20L ELITE NEW

Simply the best combination of weight, features and fit we could design. Suited to Mountain Marathon and Adventure Racing, there is enough room for all the kit you need. Unusual in a pack of this weight we have provided a proper back system and hip belt to make sure the pack is stable when you are moving fast. Pack this with the Photon tent and Laser 300 Elite sleeping bag and you have the perfect Superlite system.

210g

LASER 35L

- Weighing only 467g, the Laser 35L has been developed for lightweight mountain travel, long rock routes and mountain routes, off piste and ski touring, and multi day adventure races.
- The clean shape gives maximum volume in the main compartment.
 - Spacer mesh in key areas on the back and shoulder straps for maximum comfort.
 - Removable foam back pad, 8mm for extra protection from climbing hardware etc.
 - Zipped hip belt pockets for easy access to essential items.
 - 3 haul loops on the top to hold pack vertical and spread the load.
 - Robust fabric in key areas give maximum strength for minimum weight.
 - Long vertical front zip gives easy access to all areas of main pack.
 - Zipped, security pocket on top right side.
 - Multiple equipment attachment points on front, sides and top panels.
 - Side compression cord attached to Hypalon™ tabs. These also accept webbing for extra gear carry.
 - Side pockets for bottles, tent poles, avalanche probes etc
 - Side gear loops for climbing hardware or ski carry.

All packs feature the following...

- All zips are coated, water-resistant for more protection in wet weather.
- Reflective details on front and sides.
- Internal pocket and tube exits for drinks bladder.
- Tape loop for attachment of LED lamp
- Key clip in pocket.

LASER PHOTON

DAC

Guinness World Record Holder for the lightest tent commercially available

The definitive racing tent for mountain marathons and adventure races. The same dimensions as the Laser Competition, but weighing in at just 760g. Designed for short duration use where weight saving is critical.

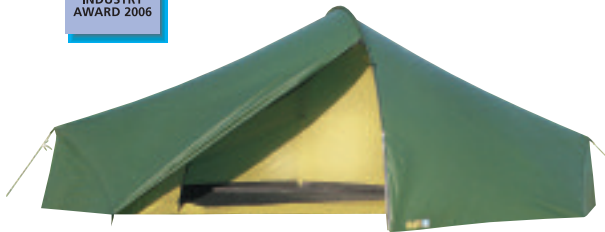

LASER Competition

DAC

'This is a remarkably roomy solo tent with a lot of porch space.' TGO March 2006

At a mere 860g, this tent has already proved itself for mountain marathons and ultra light backpacking. It uses a DAC Featherlite pole, and is guaranteed waterproof when using the optional waterproof hood.

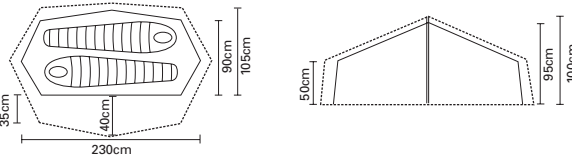

LASER Updated

DAC

'Tent of the Year 2005' Go Outdoors Awards

'I reached a stage at which I didn't want to sleep anywhere else.' Lorraine McCall, TGO December 2005

Hard to beat for ultra lightweight backpacking. The Laser doesn't compromise on comfort either with a spacious inner tent and porch and a unique ventilation system. Updated for 2009 with the addition of a door at the back and single opening door at the front.

FEATURES

- Lightest tent available
- Only **760g**
- Simultaneous flysheet & inner pitching
- Optional waterproof hood
- 1g Titanium skewers

FEATURES

- Only **860g**
- Simultaneous flysheet & inner pitching
- Optional waterproof hood
- 2g Titanium skewers

UPDATED

- Now with rear door
- Only **1.12kg**
- Simultaneous flysheet & inner pitching
- Fully waterproof
- 2g Titanium skewers

laser tents

TERRA NOVA®

FEATURES

- Only **1.62kg**
- Simultaneous
flysheet &
inner pitching
- Fully waterproof
- Huge porch
- 2g Titanium skewers

With the Laserlarge 1 we have created the lightest, most spacious, two person backpacking tent currently available. The cavernous inner offers masses of space for two backpackers and the huge porch can easily accommodate two full sized backpacks.

FEATURES

- Only **2.0kg**
- Sleeps 2
- Simultaneous
flysheet and
inner pitching
- Fully waterproof
- 2g Titanium skewers
- Ideal for
cycle touring

Building on the success of the Laserlarge 1, the Laserlarge 3 offers an unrivalled amount of space for two for its weight. Weighing just 2kg, with a truly spacious inner and huge porch for kit storage we know of no other tent that offers so much, for so little. Ideal for cycle touring.

laser tents

TERRA NOVA®

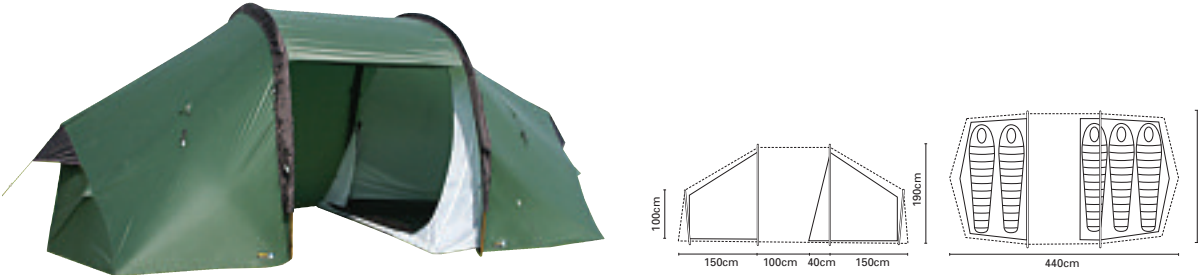

NEW

- Only **2.77kg**
- Maximum internal
height 1.76m
- Huge 3sqm porch
- Simultaneous flysheet
and inner pitching
- 5.5g/2g Titanium
pegs

At a mere 2.77kg the Laser Space 2 is an excellent lightweight backpacking or touring tent. Astonishingly for a tent of this weight it is 1.76m tall and offers a porch area of 3sqm.

LASER SPACE 5

New for 2009 the Laser Space 5 sets new standards for lightweight family camping. With tiny packed size and weight of just over 5kg this tent easily accommodates five people in 2 sleeping compartments. In addition to the large central porch, 2 small porches are available at each end, accessed from the inners. There are half mesh screens on the main inner doors for maximum ventilation.

NEW

- Only **5.20kg**
- Maximum internal

TERRA NOVA®

lightweight
expedition tents

TERRA NOVA®

UPDATED

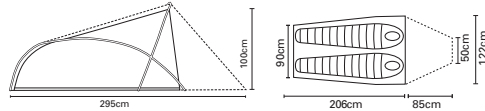

- Only **1.45kg**
- Classic backpacking tent at a superlite weight
- One third lighter than standard Voyager
- 2g Titanium pegs

SUPERLITE VOYAGER *Updated*

'The Superlite Voyager is an excellent upgrade of an already great design. It's well-made and the reduction in weight has no disadvantages that I can see.'
TGO July 2006

The classic backpacking tent in this superlite format is now even lighter for 2009. One third lighter than the standard voyager.

FEATURES

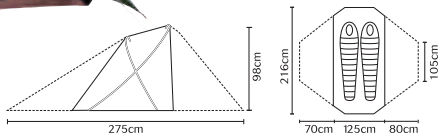

- Only **1.85kg**
- 10% lighter than Solar 2
- With 2 doors
- 5.5g Titanium pegs
- DAC poles

SUPERLITE SOLAR 2.2

'Anyone looking for a two-person backpacking tent should seriously consider it'
TGO April 2007

Based on the popular Solar 2, but with the addition of a back door. Not only does this increase access to the spacious interior, but combats the main problem of a transverse sleeping arrangement. With Superlite fabrics and the additional porch it is still around 10% lighter than the Solar 2.

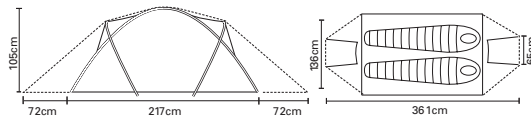

NEW

- Only **2.2kg**
- 40% lighter than standard Quasar
- 5.5g Titanium pegs
- DAC poles

SUPERLITE QUASAR

'The phenomenal weight difference in the Superlite Quasar makes this a terrific two person backpacking tent'
TGO April 2007

The Superlite Quasar has the same dimensions as the standard Quasar, but with Superlite fabrics weighs in at just 1.25Kg per person, a 40% saving on the weight of a standard Quasar.

	Superlite Voyager	Superlite Quasar	Superlite Solar 2.2

VOYAGER

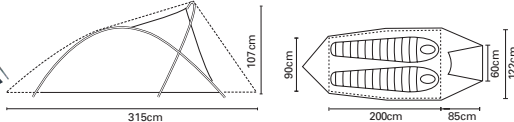

NEW MULTI TARP Pg26

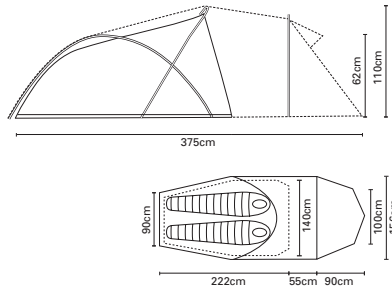

'A tent that's every bit as good as the classic brought bang up to date'
Trail Gear Guide, 2006

'A near perfect lightweight backpacking tent.'
County Walking July 2006

The Voyager has been used around the world in every conceivable location and climate. It is a long time favourite with travellers and 4 season backpackers.

VOYAGER XL

The Voyager XL is a perfect tent for those who require maximum space for minimum weight. With an inner measuring 2.22m x 1.4m and over 2sqm of porch space the Voyager XL redefines lightweight tents in this sector.

FEATURES

- Only **2.09kg**
- Tried and tested backpacking tent
- DAC poles
- Scalloped pole sleeves
- 5.5g Titanium pegs

NEW

- Only **2.25kg**
- 2.1sqm of porch space
- Large inner tent

SOLOLITE

The Sololite is a versatile semi-geodesic, one person backpacking tent with a packed weight of less than 2kg. Its true worth lies in the retractable inner which allows the porch to be enlarged allowing more space for cooking or kit storage, whilst still providing an inner length of 1.9m. In this setting the inner is set well back from the porch flysheet offering better protection from the wet. Its unique design makes it suitable for rough conditions, an ideal tent for 3-4 season backpacking.

'This is a great solo tent at a very reasonable price', TGO Magazine, April 2008

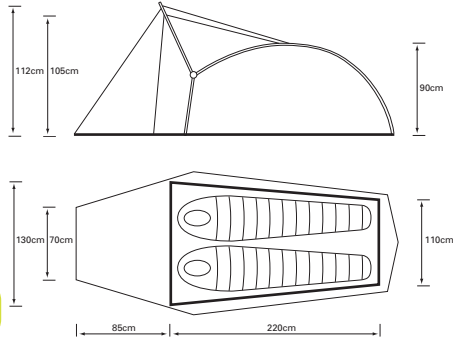

DUOLITE

The Duolite provides an ideal backpacking tent for two, with a minimum weight of 1.2kg per person. The unique pole design means the inner sits well back from the porch flysheet providing good protection from wet weather. With its semi-geodesic design, the Duolite is a great tent for 3-4 season backpacking.

'A good design for wild camping', Trail, June 2008

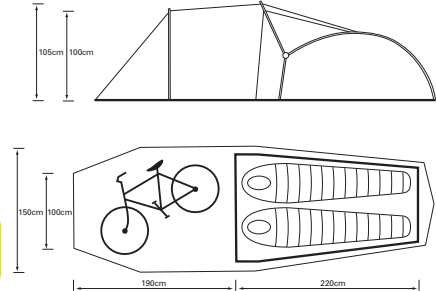

DUOLITE TOURER

This version of the Duolite has been designed specifically for bike touring, although it is suitable for anyone requiring a large space for kit storage. The inner is the same size as the Duolite but with the addition of a huge porch (1.5m wide and 1.9m long) yet the packed weight is under 3kg! The porch can be opened at the side or at the front, making it easier to get bikes inside. The packed length at 40cm, is well suited to fit in a pannier.

'We loved this tent... the quality shines through', Adventure Travel, May/June 2008 ★★★★★

HALO 43

The Halo 43 is a great tent for four people, although it can easily accommodate an extra three in the living area. The front porch opens as an awning and the adjacent bedrooms have zipped access between them, allowing parents to comfort children easily during the night. An ideal tent for young families.

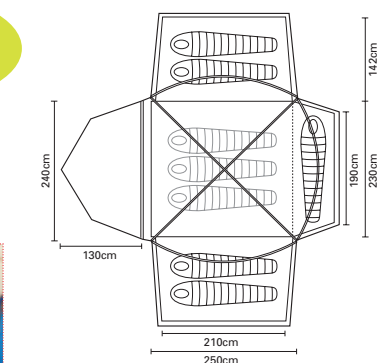

Available in
green or blue

**HALO 53**

The Halo 53 offers ideal accommodation for five with the option of sleeping an extra three in the living area. It is especially suitable for families with children wanting their own space; the two side bedrooms are complemented by an extra 'bunk' at the rear which can also be incorporated into the living area during the day or used for additional storage. Large doors front and back provide easy access and the front porch opens as an awning offering more flexible living space.

Available in
green or blue

Structure

- Steel poles for central dome, glassfibre for periphery areas
- Inner pitch first
- Mud walls on porch
- Large porch which opens to provide an awning
- Full mesh screen doors

Accommodation

- Light airy central living area
- Inners sized for airbeds
- Zipped cable entry points
- Numerous storage pockets
- Guaranteed to be the most stylish tent on the site!

Key differences to other family tents

- Sturdy steel poles for central dome
- Glassfibre poles for periphery
- Contemporary styling
- Defined storage solutions for important belongings

FEATURES

- Sleeps up to 10
- 3 bedrooms
- Large tent ideal for families with older children
- Sized for airbeds
- Stylish design
- Steel and glass fibre poles
- Front porch opens as an awning
- Cargo net storage

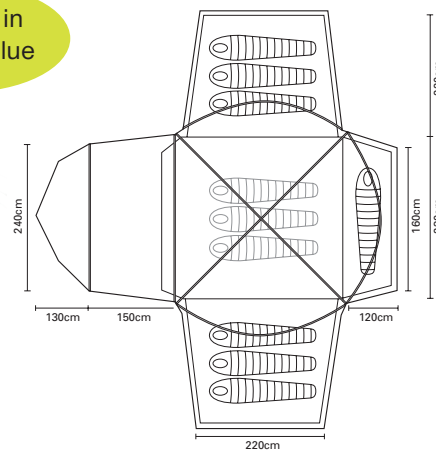

HALO 73

The Halo 73 provides a luxurious amount of space for seven with the option of sleeping an extra three in the living area. Two bedrooms each accommodate three on airbeds. The one person 'bunk' at the back is ideal for the older child who wants their own space or it could equally be used for storage, keeping clutter out of the bedrooms. Large doors front and back provide easy access and the front porch opens to provide an awning.

Available in
green or blue

'Designed beautifully, built to last and constructed from high quality materials.'
BBC Country File Magazine, Spring 2008

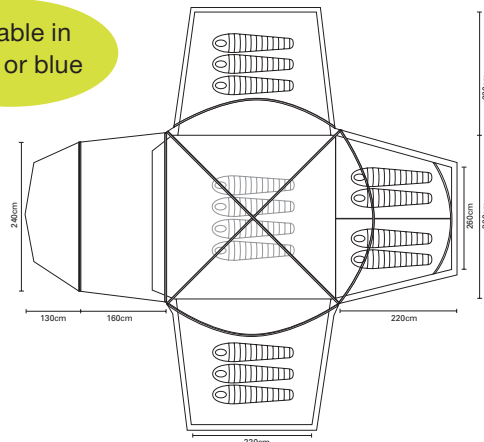

FEATURES

- Sleeps up to 14
- 4 large bedrooms
- Huge tent, ideal for larger families
- Sized for airbeds
- Stylish design
- Steel and glass fibre poles
- Front porch opens as an awning
- Cargo net storage

Available in
green or blue

HOMESTEAD 52

The Homestead 52 sleeps five in two separate bedrooms plus an extra two in the living area. The bedrooms can be removed independently once pitched, providing extra living space if required. Additional accommodation is provided by the living area inner, while the spacious porch can be opened to create an awning with windbreak.

Available in
green or blue

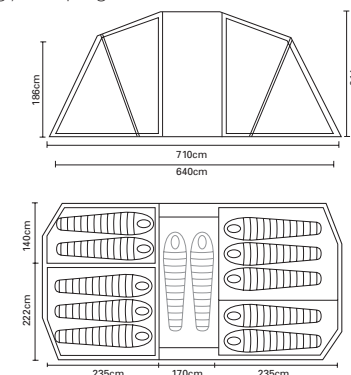

HOMESTEAD 102

The Homestead 102 sleeps ten on airbeds in the four bedrooms but can accommodate another two in the living area. One two and one three person bedroom are attached to the flysheet using toggles (as they always have been), allowing them to be removed independently before or after the tent is pitched. For the remaining space, one large inner tent offers a draught free living area and up to two more bedrooms. Through a clever zipping arrangement two, one or no bedrooms can be used on this side of the tent at any time, allowing versatile use of space for living / sleeping.

Available in
green or blue

Structure

- Steel poles - the same length
- Large vents
- Side windows
- Awning poles
- Flysheet first pitch
- Full mesh screen doors

GORE-TEX® prevents the entry of rain and melting snow, yet allows perspiration to escape to the outside of your glove, leaving you dry and comfortable.

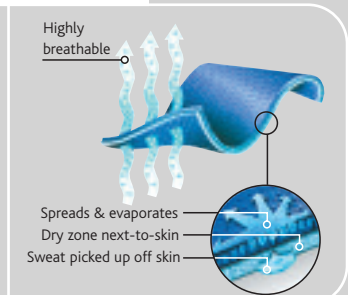

GORE-TEX® prevents the entry of rain and melting snow, yet allows perspiration to escape to the outside of your glove, leaving you dry and comfortable.

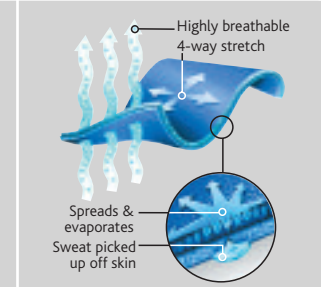

The WINDSTOPPER® membrane system provides a windproof barrier that is extremely breathable. It prevents cold winds from cutting through the fabric but allows the body heat to ventilate. WINDSTOPPER® fabrics are 100% windproof and provide the ultimate windchill protection.

Polartec® Power Dry® fabric is designed to keep your skin dry when you sweat. Its patented bi-component construction moves at least 30% more moisture away from the skin than single component fabrics. Once moisture reaches the outside of the fabric, it spreads to many times its original surface area, enabling it to dry at least 2 times faster than cotton.

Polartec® Power Stretch® fabric features 4-way stretch and is very breathable. It keeps you dry when you sweat and provides warmth without the weight and bulk of traditional insulating fabrics. It features a proprietary construction with two unique surfaces: the durable nylon outer layer is wind- and abrasion- resistant; the soft inner layer pulls moisture away from your skin keeping you dry, warm and comfortable.

- Wind/Pro® is 4 times more wind resistant than traditional fleece
- Warmth without weight
- Water repellent
- Highly breathable, body moisture vapour passes through
- Machine washable
- Versatile use

We have a skilled UK manufacturing and repair facility at our Derbyshire base. As well as producing standard products in our range, our specialist facility produces bespoke versions of our tents, such as heavy duty and white options for contract use.

For more information on bespoke production please contact our sales department on **+44(0)1773 837370**

Guaranteed waterproof flysheet.

Tents marked with this logo are guaranteed waterproof from purchase. This is achieved by factory taping the seams or by providing a waterproof hood over pole seams. Please note that these latter tents may have unprotected seams and zips, but are innovatively designed so that rainwater will not drip into or onto the inner. Our Lightweight Tents are designed to minimise seams.
