Sleeping Bags

Our Laser range of sleeping bags all use box wall construction to reduce cold spots and the highest quality 900 Fill Power goose down to maximise loft and warmth without adding weight. The downproof fabrics keep that precious down where it's meant to be, as well as packing easily, breathing well and feeling silky to the touch. Our bags are stored and delivered in mesh sacs to ensure that the down has never been compressed until you first need it. A compression sac is also included for minimum pack size.

The Voyager sleeping bags range is made to the same design and high standards using an 800 Fill Power down.

Our temperature ratings are based on the fill power and amount of down in each bag, as well as being tested in accordance with EN13537 to make sure they are as realistic and consistent as possible. However, as with all sleeping bags, temperature ratings should be taken as a guideline to be considered alongside your personal experience and requirements.

LASER 300 ELITE

groundsheet protectors

Groundsheet protectors (GSP) or Footprints are designed to protect your tent groundsheet from wear and tear, moisture and dirt, and are custom-fitted for each tent model. Although we use the highest specification of waterproof and durable fabric in all of our tent groundsheets, using a GSP (sold separately) helps to prolong the life of a tent by reducing wear and tear on the fabric. Using a GSP or Footprint also keeps the tent underside clean and reduces the amount of moisture and grit that gets packed along with the tent. It is also much easier to dry and clean a GSP than the whole tent.

bothy bags

	Packed Size:	Weight:
Superlite 2 person	13cm x 11cm	253g / 9oz
Superlite 4 person	20cm x 12cm	400g / 14oz
2 person	22cm x 11.5cm	370g / 14oz
4 person	27cm x 11cm	600g / 21oz
8 person	30cm x 14cm	940g / 33oz
12 person	33cm x 16cm	1410g / 50oz
20 person	50cm x 19cm	1720g / 61oz

Used by mountain leaders, rescue organisations, backcountry skiers and canoe guides all over the world, these indispensable lightweight emergency shelters allow the users to create a 'microclimate' that is warm and dry - perfect for map reading, group discussions or even as a morale-booster for wet lunch breaks. Bothy bags come in a range of sizes and feature clear windows, mesh vents and roof 'sockets' which can house walking poles for additional support.

SUPERLITE BOTHY 2 AND BOTHY 4

Made using the same fabric as our Superlite tents to offer a lighter weight version of these popular shelters. In order to get the smallest pack size and weight possible we have removed the windows and roof 'socket' that are found on the classic versions.

temperature moderators

Offered on the Wild Country Citadel range, the Temperature Moderator acts as a barrier to the sun beating down on the roof of your tent.

This extra layer keeps the inner cooler which is great when camping in hot weather. A Temperature Moderator also reduces the effects of UV light and falling tree sap on the tent flysheet, prolonging the life of the tent. The sun-shade effect can also be helpful for summer morning lie-ins when the sun is up early.

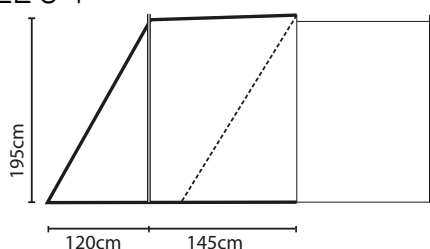

porches etesian and citadel

* Hydrostatic head is tested to British Standards* tent comes supplied with more than one type of peg, see individual tent page for details.

GORE-TEX® Flo2 fabric is highly waterproof and breathable, allowing both water vapour and O₂/CO₂ transfer from the inner to the outer, which makes it perfect for confined spaces like bivi bags.

Guaranteed waterproof flysheet.

Tents marked with this logo are guaranteed waterproof from purchase. This is achieved by factory taping the seams or by providing a waterproof hood over pole seams. Please note that these latter tents may have unprotected seams and zips, but are innovatively designed so that rainwater will not drip into or onto the inner. Our Lightweight Tents are designed to minimise seams.

We have a skilled UK manufacturing and repair facility at our Derbyshire base. All products in this workbook with the Union Jack logo are made here. As well as producing standard products in our range, our specialist facility produces bespoke versions of our tents, such as heavy duty and white options for contract use. Please contact us for details.
