- Packed weight 1.75kg
 - Multiple door arrangements
 - Full length porch
 - DAC poles
 - Alloy V pegs
 - Outer pitch first
- Competitive price

NEW

- Packed weight 2.2kg
 - Multiple door arrangements
 - Full length porch
 - DAC poles
 - Alloy V pegs
 - Outer pitch first
- Competitive price

FEATURES

- Retractable inner
- Flexible porch size
- DAC NSL poles with environmentally friendly anodising
- Fits in panniers
 - Alloy V pegs
- Outer pitch first

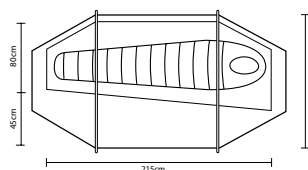

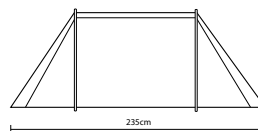

FEATURES

- Semi-geodesic design
 - DAC NSL poles with environmentally friendly anodising
- Wide head and shoulder room
- Fits in panniers
 - Alloy V pegs
- Outer pitch first

ASPECT 1 NEW

DAC

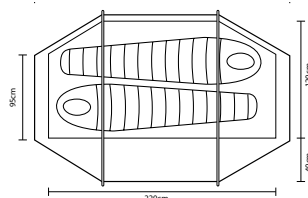

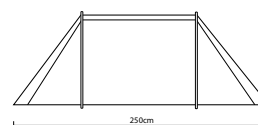

Simplicity and quality at only 1.75kg make the Aspect 1 the perfect entry level tent for solo backpackers. Fully waterproof with a large porch and superior ventilation, this tent retains the high specification qualities of more expensive models without the price tag to match. The full length flysheet door can also be turned into an awning (poles sold separately with the bespoke groundsheet protector).

ASPECT 2 NEW

DAC

Form and function blend effortlessly to create this easy to use 2 person backpacking tent. All the features required for a comfortable trip are included, but at a fraction of the price and weighing only 2.2kg (packed). The wide main entrance and variable door options make access simple, and the smaller rear door offers ventilation and flexibility when sharing. The full length flysheet door can also be turned into an awning (poles sold separately with the bespoke groundsheet protector).

SOLOLITE

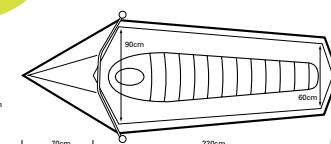

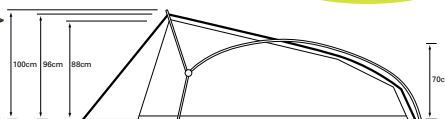

DAC

**GREEN
Anodizing
NSL**

'This is a great solo tent
at a very reasonable price'
TGO April 2008

'Best Value' award
★★★★
Trail March 2009

This versatile solo backpacking tent benefits from the stability of a semi-geodesic design. The retractable inner tent allows the porch to be enlarged for cooking whilst still leaving room to lie down.

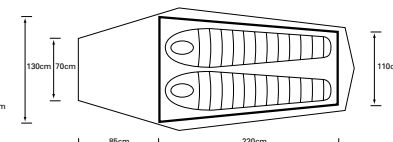

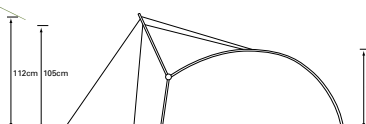

DUOLITE

DAC

**GREEN
Anodizing
NSL**

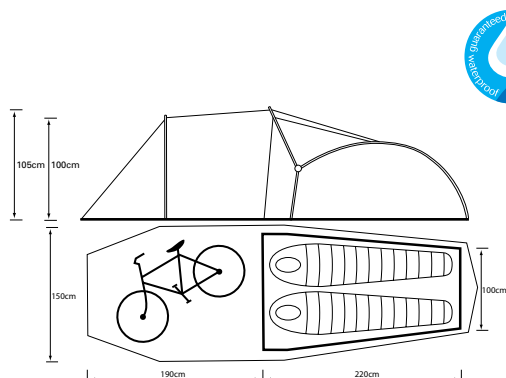

'A good design for wild camping'
Adventure Travel June 2008

The Duolite is a twist on the classic 2 person semi-geodesic style, using a unique pole structure for strength, stability and internal space. The inner sits well back from the door giving great ventilation options in poor weather.

DUOLITE TOURER

DAC

'The quality shines through'
Adventure Travel May 2008

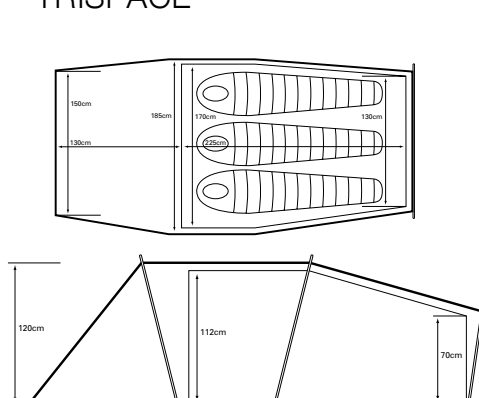

A version of the Duolite designed specifically for bike touring, or anybody needed extra storage space. The inner is the same size as the Duolite but despite the huge porch (1.5m x 1.9m) the packed weight is under 3kg! The porch can be opened at either the side or front, making it easy to get bikes or in without blocking the exits and the packed length is short enough to fit most cycle panniers.

FEATURES

- Perfect for bike touring
- Huge porch
- Packed weight < 3kg
- Fits in panniers
- DAC NSL poles with environmentally friendly anodising
- Alloy V pegs
- Outer pitch first

TRISPACE

A purpose built 3 person tunnel tent for group or center use, the Trispace uses heavy duty components for improved durability. Wider poles and heavier zips help to prevent accidental damage, and the 10000mm hydrostatic head groundsheet will retain its waterproofing for longer. This tent has excellent ventilation, with the foot vent doubling as a small foul weather exit. The large porch provides ample room for storage and a full length groundsheet protector is available separately.

FEATURES

- For group or centre use
- Durable specification
- 10,000mm HH groundsheet
- Large front porch
- Alloy V pegs
- Outer pitch first

WARNING: It is extremely dangerous to use naked flames within these tents and we strongly advise against doing so.

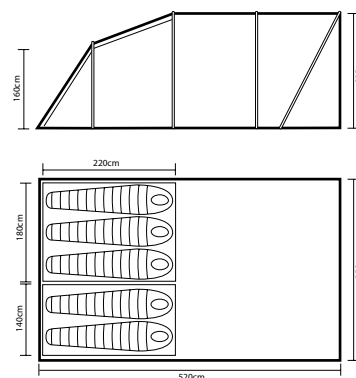

wild about... family camping

NEW

- Sleeps upto 5
- Jumbo poles
- Flexible ventilation
- Tenacity guypoints
- Inners sized for airbeds
- Bug-proof doors
- Easy to pitch

CITADEL 5 NEW

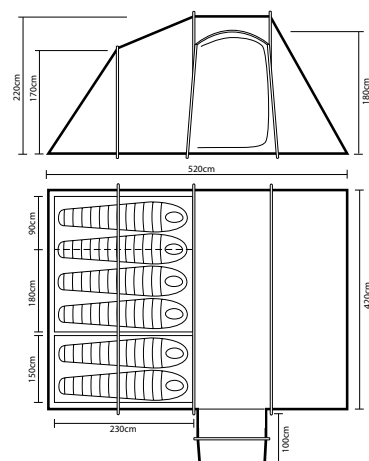

Introduced for 2010, the Citadel 5 is a spacious family tent featuring our new Wild Country Jumbo poles. The Jumbo pole mixes high grade steel compounds with a wide cross sectional area to make it the strongest pole ever used on our family tents. Extra space in the bedrooms will allow airbeds for sleeping, and this along with the large porch area makes the Citadel 5 a superb medium sized family tent whatever the weather. Twin flysheet doors, a sewn in groundsheet and multiple ventilation options are all finished with the usual Wild Country finesse and attention to detail.

NEW

- Sleeps upto 6
- Jumbo poles
- Flexible ventilation
- Tenacity guypoints
- Inners sized for airbeds
- Bug-proof doors
- Easy to pitch

CITADEL 6 NEW

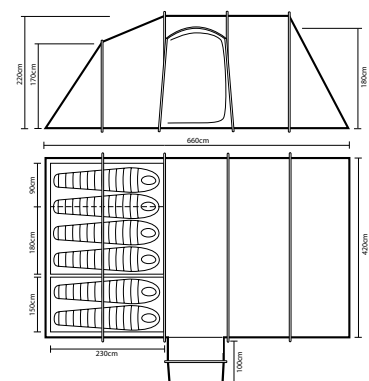

An excellent choice for larger families, the Citadel 6 has flexible sleeping arrangements as the larger bedroom can be subdivided if required. The Wild Country Jumbo poles make it quick and easy to pitch, and combined with the new Tenacity guypoints also provide the reassurance of poor weather performance. The full height side porch has it's own Jumbo pole, and both entrances have full mosquito net screens. There are multiple ventilation options - all adjustable - and the sewn in groundsheet helps to keep ground moisture at bay as well as reducing draughts.

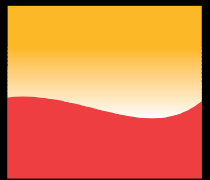

NEW

- Sleeps upto 6
- Jumbo poles
- Flexible ventilation
- Tenacity guypoints
- Inners sized for airbeds
- Bug-proof doors
- HUGE living area!

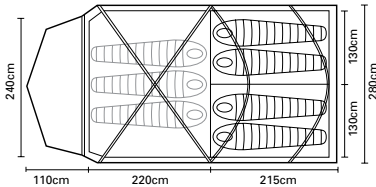

CITADEL XL NEW

The same sleeping arrangements as the Citadel 6, but with an extra 6m² of space supported with an additional Wild Country Jumbo pole. This gives a total floorspace in the living area of 18m², perfect for entertaining! The inners and poles are fully compatible with the Citadel 6.

HALO 43 - revised

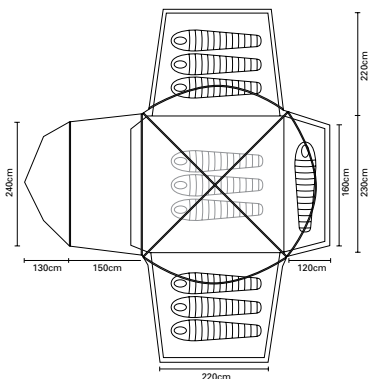

The Halo 43 is a great tent for four people, although it can easily accommodate an extra three in the living area. The front porch opens as an awning and the adjacent bedrooms have zipped access between them, allowing parents to comfort children easily during the night and without letting insects into the bedrooms. An ideal tent for young families.

FEATURES

- Sleeps up to 7
- 2 bedrooms
- Ideal for families with young children
- Inners sized for airbeds
- Steel and glass fibre poles
- Front porch opens as an awning
- Cargo net storage

NEW COLOUR

HALO 73 - revised

The Halo 73 is a luxurious tent for seven with the option of sleeping another three in the living area. Two bedrooms will each accommodate three on airbeds. The one person "bunk" at the back is ideal for the older child who wants their own space or it could equally be used as additional storage, keeping clutter out of the bedrooms. Large doors front and back provide easy access and the front porch opens up to provide an awning.

FEATURES

- Sleeps up to 10
- 3 bedrooms
- Large tent ideal for families with older children
- Sized for airbeds
- Steel and glass fibre poles
- Front porch opens as an awning

accessories,
see page 10

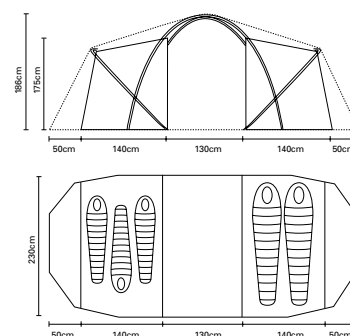

wild about... family camping

FEATURES

- 2 separate inner tents
- Zipped access to storage area
- Awning poles included
- Living area groundsheet included
- Inner pitch first

FAMILY KHAM SIN - revised

The ever popular Family Khamsin makes a great base for two adults and up to three children, and has a revised porch for 2010. The inner-first pitching style is inspired by our geodesic mountain tents and creates an attractive living space with no loose fabric, as well as providing a more rigid structure for poorer weather. A small storage area can be accessed from within each bedroom, and the large doors on either side provide lots of ventilation and flexible access. The central groundsheet is included, and allows the tent to be used without the flysheet in hot, dry weather.

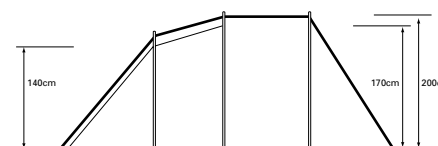

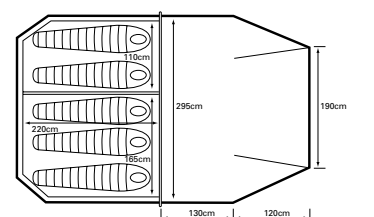

FEATURES

- Spacious 5 person tent
- Light airy accommodation
- 2 bedrooms
- Awning poles available
- Porch pockets
- Bathtub ground sheet

CAMPLITE 5

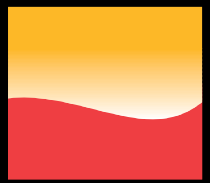

'A well thought out tent'
Camping June 2008

Perfect for lightweight family camping and for those who want a roomy tent without moving to a larger family model. The Camplite 5 has two independent bedrooms and provides light, airy accommodation for up to five people. The porch area has a removable groundsheet, and the large windows on either side provide light and ventilation. Both the side and front doors can be unzipped to provide an awning (awning poles sold separately). The flysheet-first tunnel style of this model makes it quick and easy to pitch, and the bedrooms can be removed if not required to create extra space for storage of larger items.

	Sleeps	Minimum Weight	Maximum Weight	Packed Size	Season Rating	Flysheet Hydrostatic Head	Groundsheet Hydrostatic Head	Poles

WARNING: It is extremely dangerous to use naked flames within these tents and we strongly advise against doing so.

Wild Country sleeping bags have a water resistant nylon outer shell and supersoft nylon lining for a comfortable nights sleep. A high quality synthetic filling is used which maintains performance even when wet, and zip and shoulder baffles help to keep draughts at bay. The contoured hood can be cinched in with the integral drawstring and hanging loops at the base help to hang the bag for drying. Each bag has a durable stuff sac with compression straps that help to reduce the packed size even further.

NEW KINDER SPRING/AUTUMN

An entry level 3 season sleeping bag, ideal for Duke of Edinburgh or Scouts use. Mummy shaped with a synthetic filling and featuring a full length zip with velcro closure, reflective piping and drawstring hood.

NEW KINDER WINTER

Entry level synthetic sleeping bag for use in colder weather or for those who "sleep cold". Features a full length zip, drawstring hood and comfortable silky lining.

'How do you lighten the weight of your tent in one fell swoop? Change your normal tent pegs for titanium skewers' TGO Magazine, April 2004

The new range of lightweight Laser packs by Terra Nova has been designed for adventure races, mountain marathons and lightweight mountain use. Designed with low weight as a priority the range offers some of the lightest packs in their class.

LASER 6L

Perfect for lightweight day use, day races, off road and mountain running.

- Smooth, contoured shape hugs body and improves stability.
- Spacer mesh and foam back for maximum comfort, cool and dry.
- Spacious hip pockets distribute the load and give 'on the move' access.
- Easily accessible compression cords allow instant adjustment of the main compartment
- Second 'lash' cord can be positioned on top or front and used to carry extra items.

182g

LASER 20L

Our lightest fully equipped pack weighing just 328g. Designed for lightweight day use, adventure races, one or two day events and mountain biking.

- Contoured back and hip belt pockets give a very stable carry.
- Spacer mesh panels on back and hips in main contact area for greater comfort.
- Lightweight shoulder straps have spacer mesh underside.
- Adjustable and removable chest strap with whistle buckle.
- Long vertical front zip gives easy access to all areas of main pack.
- Security, zipped pocket on top front panel.
- Large volume hip belt pockets for 'on the move' access.
- Versatile drinks carry capabilities, 2 side bottle pockets, 2 front mesh pockets.
- 2 front compression cords to stabilise part full pack and extra top Hypalon™ tab for cord loop if required for tent pole carry etc.

328g

LASER 20L ELITE

Simply the best combination of weight, features and fit we could design. Suited to Mountain Marathon and Adventure Racing, there is enough room for all the kit you need. Unusual in a pack of this weight we have provided a proper back system and hip belt to make sure the pack is stable when you are moving fast.

- Roll top closure creates a water resistant seal.
- All the basics required for competition.
- Use with the Laser Photon Elite tent for the perfect Superlite race system.

210g

LASER 35L

Weighing only 467g, the Laser 35L has been developed for lightweight mountain travel, long rock routes and mountain routes, off piste and ski touring, and multi day adventure races.

- The clean shape gives maximum volume in the main compartment.
- Spacer mesh in key areas on the back and shoulder straps for maximum comfort.
- Removable foam back pad, 8mm for extra protection from climbing hardware etc.
- Zipped hip belt pockets for easy access to essential items.
- 3 haul loops on the top to hold pack vertical and spread the load.
- Robust fabric in key areas give maximum strength for minimum weight.
- Long vertical front zip gives easy access to all areas of main pack.
- Zipped, security pocket on top right side.
- Multiple equipment attachment points on front, sides and top panels.
- Side compression cord attached to Hypalon™ tabs. These also accept webbing for extra gear carry.
- Side pockets for bottles, tent poles, avalanche probes etc
- Side gear loops for climbing hardware or ski carry.

467g

All packs feature the following...

- All zips are coated, water-resistant for more protection in wet weather.
- Reflective details on front and sides.
- Tape loop for attachment of LED lamp

laser series

NEW

- Lightest tent available
 - Only 660g
- Simultaneous flysheet & inner pitching
- Optional waterproof hood
- 1g Titanium skewers

DAC

The definitive racing tent for mountain marathons and adventure races, now made even lighter. Smaller than the Laser Competition and made from our latest Superlite fabrics, the Laser Photon Elite is the worlds lightest double-walled shelter at only 660g!

FEATURES

- Only 860g
- Simultaneous flysheet & inner pitching
- Optional waterproof hood
- 2g Titanium skewers
- Online video pitching instructions

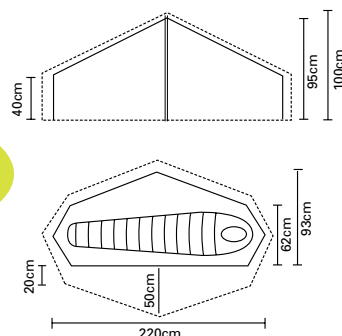

LASER COMPETITION

DAC

'A packed size so small you hardly notice it in your rucksack'
Trail March 2009

At a mere 860g, this tent has already proved itself for mountain marathons and ultra light backpacking. It uses a DAC Featherlite pole, and is guaranteed waterproof when using the optional waterproof hood.

FEATURES

LASER

- Now with rear door
 - Only 1.12kg
- Simultaneous flysheet & inner pitching
- Fully waterproof
- 2g Titanium skewers

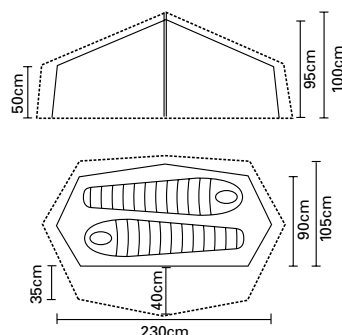

DAC

'I reached a stage at which I didn't want to sleep anywhere else.'
Lorraine McCall, TGO
December 2005

'Tent of the Year 2005'
Go Outdoors
Awards

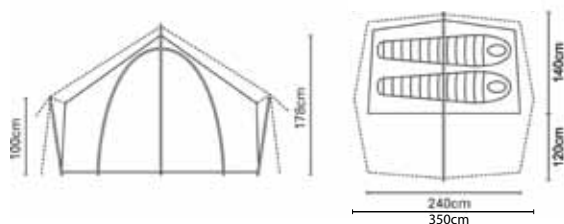

Hard to beat for ultra lightweight backpacking. The Laser doesn't compromise on comfort either with a spacious inner tent and porch and a unique ventilation system. The smaller back door and two way flysheet zips also offer high ventilation options to combat condensation.

LASER SPACE 2

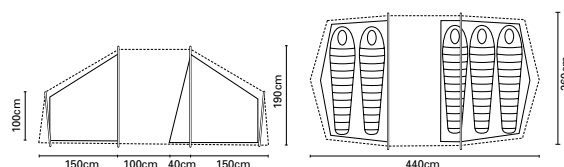

At a mere 3.3kg the Laser Space 2 is an excellent lightweight backpacking or touring tent. Astonishingly for a tent of this weight it is 1.76m tall and offers a porch area of 3sqm.

FEATURES

- Only 3.3kg
- Maximum internal height 1.76m
- Huge 3sqm porch
- Simultaneous flysheet and inner pitching
- 5.5g/2g Titanium pegs

LASER SPACE 5

Laser Space 5 sets new standards for lightweight family camping. With tiny packed size and weight of just over 5kg this tent easily accommodates five people in 2 sleeping compartments. In addition to the large central porch, 2 small porches are available at each end, accessed from the inners. There are half mesh screens on the main inner doors for maximum ventilation.

FEATURES

- Only 5.20kg
- Maximum internal height 1.8m
- 1 large and 2 small porches
- 2 sleeping compartments
- Simultaneous flysheet and inner pitching
- 5.5g/2g Titanium pegs

LASER SPACE 2 AND 5 UV COVER

Lightweight, waterproof UV Cover for use on extended trips to minimise sunlight damage.

See page 21 for specifications

FEATURES

- Offers UV protection
- Lightweight
- Small pack size

WARNING: It is extremely dangerous to use naked flames within these tents and we strongly advise against doing so.

Weights exclude complimentary pole covers

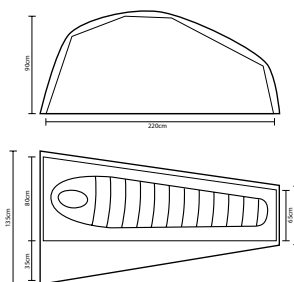

solar series

NEW

- Only 825g
- Side door improves access to porch
- 1g Titanium pegs
- Multiple pitching options

SOLAR ELITE NEW

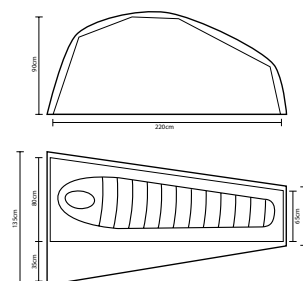

The Solar Elite represents the cutting edge of Superlite tent technology. At a mere 865g it has the lightest packed weight of any self-supporting tent. This ability to pitch without pegs gives lots of flexibility; inner tent only when hot and dry, flysheet only with additional footprint (sold separately) for a fastpack weight of 580g, or both fly and inner for traditional use. The clever design of the Solar Elite allows room to sit up in the inner and access a large porch whilst keeping the space required to pitch it to a minimum.

NEW

- Only 978g
- Side door improves access to porch
- 2g Titanium pegs
- Multiple pitching options

SOLAR COMPETITION NEW

Modelled on the new Solar Elite (above) but with a split pole finish at the foot end, the Solar Competition also offers increased durability with a higher hydrostatic head for the flysheet and inner, and a fully taped groundsheet.

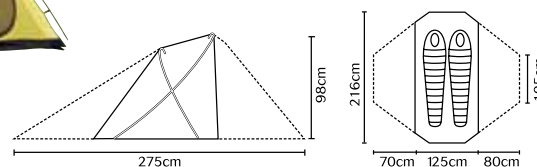

FEATURES

- Only 1.85kg
- With 2 doors and 2 porches
- 5.5g Titanium pegs
- DAC poles

SUPERLITE SOLAR 2.2

'Anyone looking for a two-person backpacking tent should seriously consider it'
TGO April 2007

Our popular two-person transverse sleeping design with a door and porch on either side. Not only does this increase access to the spacious interior for both campers, but also prevents clutter in the inner tent.

	Sleeps	Minimum Weight	Maximum Weight	Packed Size	Season Rating	Flysheet Hydrostatic Head	Groundsheet Hydrostatic Head	Poles

WARNING: It is extremely dangerous to use naked flames within these tents and we strongly advise against doing so.

www.terra-nova.co.uk

SUPERLITE VOYAGER

The classic backpacking tent in Superlite format. One third lighter than the standard Voyager, but with the same semi-geodesic design to give maximum stability for minimum weight.

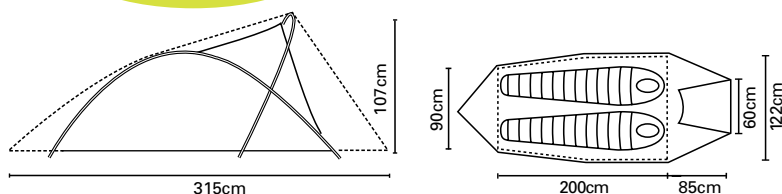

FEATURES

- Only 1.45kg
- Classic backpacking tent at a superlite weight
- DAC NSL poles with environmentally friendly anodising
- One third lighter than standard Voyager
- 2g Titanium pegs

VOYAGER

'Every bit as good as the classic brought bang up to date'
Country Walking July 2006

The Voyager has been used around the world in every conceivable location and climate. It is a long time favourite with travellers and 4 season backpackers

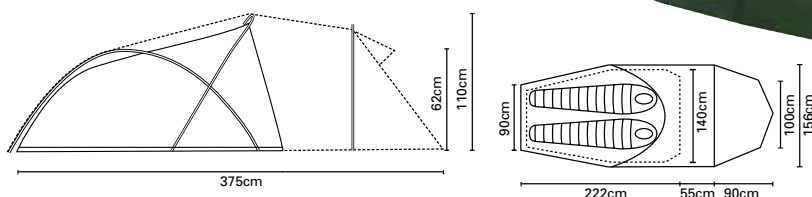

FEATURES

- Only 2.09kg
- Tried and tested backpacking tent
- DAC poles
- Scalloped pole sleeves
- 5.5g Titanium pegs

VOYAGER XL

'All things considered, the Voyager XL is a great tent for two person cycle-touring and trekking'
Adventure Cycling Guide June 2009

The Voyager XL is a perfect tent for those who require maximum space for minimum weight. With an inner tent measuring 2.22m x 1.4m and over 2m² of porch space the Voyager XL redefines lightweight tents in this sector

FEATURES

- Only 2.25kg
- 2.1sqm of porch space
- Large inner tent
- DAC poles
- 5.5g Titanium pegs

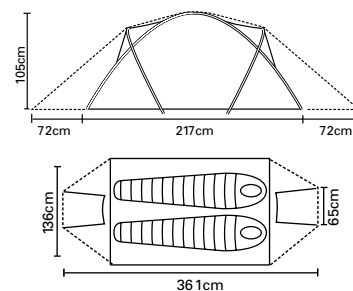

quasar series

FEATURES

- Only 2.2kg
- 40% lighter than Standard Quasar
- 5.5g Titanium pegs
- DAC poles

SUPERLITE QUASAR

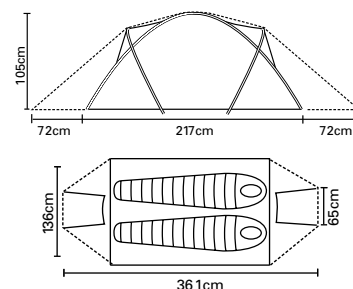

A combination of our classic Quasar shape and modern superlite fabrics, the Superlite Quasar takes the best elements of both eras to become the lightest fully geodesic tent possible., perfect for extended backpacking in unpredictable terrain

FEATURES

- Lightweight mountain tent
- Scalloped pole sleeves
- DAC poles
- 5.5g Titanium pegs

ULTRA QUASAR

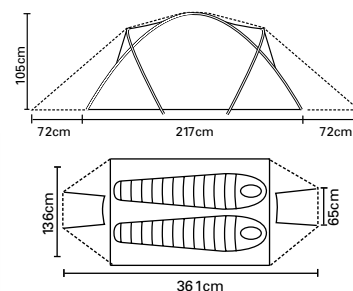

The Ultra Quasar has always been at the cutting edge of low weight mountain tents and still remains the only choice when a combination of total reliability and low weight is essential.

FEATURES

- The definitive mountain tent
- Side opening inner door
- Alloy pegs
- Colour coded Reflex poles

QUASAR

The much copied but never bettered classic! Used all over the world in all conditions for over 20 years, the Quasar is still a solid contender as the best 2 person tent available for exposed pitches and base camps.

QUASAR ETC

The classic Quasar design with an extended porch and extra pole at one end

The Quasar ETC flysheet can also be bought separately to upgrade an existing Quasar or Ultra Quasar (not recommended for use with Superlite Quasar).

FEATURES

- Extended porch
- Side opening inner door
- Alloy pegs
- Colour coded Reflex poles

SUPER QUASAR

Simply the toughest pound-for-pound tent you can buy. Subtle alterations to the shape and pole configuration of the classic Quasar design make the Super Quasar a tent that can sleep 3 at a push and is found from the poles to the highest peaks - often under several feet of snow!

FEATURES

- The best expedition tent
- Side opening inner door
- Alloy pegs
- Colour coded Reflex poles

bivi bags

FEATURES

- The only tried and tested GORE-TEX® bivi bags available
- Hydrostatic Head 10000mm
- Available in red or green (Discovery Lite and Moonlite green only)

All of our bivi bags are made in the UK

SATURN

Designed for military/ extended all round use.

FEATURES

- Twin precurved 7001 aluminium alloy poles for extra head and footroom
- Extra Long for kit storage
- No-see-um mesh door to keep out unwanted visitors
- GORE-TEX® upper and Waterbloc groundsheet
- Rear vent for excellent ventilation

TITAN

All GORE-TEX® alpine/expedition bag. With 'L' zip.

FEATURES

- Made entirely from GORE-TEX® fabric
- 'L' zip provides easier access and entry points for ropes and slings
- Oversized hood to allow easy manoeuvring inside
- Heavy gauge zips for greater strength and reliability
- Storm flaps and velcro closures over zips to keep out spindrift and enable ventilation

DISCOVERY

Ideal for those seeking performance at an entry level price. Good for occasional use.

FEATURES

- Full horizontal zip with rain flap
- Half moon foot
- GORE-TEX® upper and Waterbloc groundsheet

JUPITER

For minimalist backpacking

FEATURES

- Single precurved 7001 aluminium alloy pole gives extra headroom and ensures good ventilation
- Good ventilation makes it suitable for warmer, more humid conditions
- No-see-um mesh door to keep out unwanted visitors
- GORE-TEX® upper and Waterbloc groundsheet
- Half moon foot

APOLLO

Designed for all round and extended use

FEATURES

- Made entirely from waterproof and breathable GORE-TEX® fabric
- Removable mosquito net to keep out unwanted visitors
- Full horizontal zip with rain flap
- Half moon foot
- Generous hood for storage

DISCOVERY LITE

Ultra light bivi bag offering excellent value for money. (Green only).

FEATURES

- Zip around end of bag
- GORE-TEX® upper and Waterbloc groundsheet

MOONLITE BAG COVER

- Waterproof sleeping bag cover
- For minimalist use

FEATURES

- Seam sealed
- Waterproof, breathable laminate fabric
- Drawstring Closure
- Tiny pack size

POWERDRY®

POWER DRY® hats employ Polartec's best fabric for next-to-skin moisture management, high breathability and quick drying capability.

POWER DRY® BEANIE

Based on our popular POWER STRETCH® Beanie. This is ideal for wearing under a helmet or on its own when conditions are less extreme.

Fibre content: 100% Polyester
Sizes: One Size
Colours: Black

GORE-TEX®

GORE-TEX® fabric provides the best combination of waterproofing, breathability, windproofing and durability available. extremities GORE-TEX® gloves are ideally suited for use in extreme wet weather conditions.

MOUNTAIN GLOVE

The popular Ice glove has been re-engineered to provide an extremely high specification and high performance winter climbing glove. The outer shell has a reshaped thumb, full Pittards Armor Tan™ goat leather palm, fingers and thumb. A digitised version of the same leather is used for palm and thumb reinforcements and attached using Kevlar stitching, providing maximum grip and durability. Stretch Cordura on the back of the hand allows freedom of movement and the shock absorbing gel protection reduces jarring. The inner glove, which can be used on its own, houses the GORE-TEX® XCR® insert and is extremely warm, using 10oz Primaloft® filling.

Fibre content: Back: 87% Nylon, 13% Elastane, Palm: 100% leather, Inner glove: 100% polyester
Sizes: XS, S, M, L, XL

ICE GAUNTLET

The Ice Gauntlet has been engineered to give an unbeatable combination of durability and dexterity with low weight. This performance, together with excellent thermal properties, high stretch and full knuckle protection, makes the Ice Gauntlet a must have for all serious mountaineers.

The palm, thumb and fingers are Kevlar with a Coolmax mix, for durability and moisture management. These are overlaid with extremosuede, which has been tested to 40,000 abrasion cycles. Extremosuede roll tip fingers combine high dexterity with durability. Stretch Cordura on the back of the hand allows freedom of movement and the shock absorbing gel protection reduces jarring. The shell, which has a brushed lining and GORE-TEX® XCR® insert, can be worn alone or used with the fleece liner glove in more severe conditions.

Fibre content: Back: 87% Nylon, 13% Elastane, Palm: 80% Nylon, 15% Polyester, 5% Elastane, Inner glove: 100% polyester
Sizes: XS, S, M, L, XL

MULTISPORT PRO

Using the GORE-TEX® X-TRAFIT™ technology, the Multisport Pro is aimed at those who need the highest performance, and dexterity possible. The tough palm, and new cinch closure feature, make this glove ideal for most mountain sports.

Fibre content: 35% Nylon, 35% Leather, 30% Polyester
Sizes: S, M, L, XL
Colours: Black/Grey

MULTISPORT GTX

This is a true cross-activity glove with water resistant leather palm and fingers for superb dexterity. The Multisport GTX is fully waterproof and breathable with GORE-TEX® XCR® insert and brushed thermal lining.

Fibre content: Back: 70% Nylon, 20% Polyester, 10% Elastane, Palm: 100% Leather, Lining: 100% Polyester
Sizes: XS, S, M, L, XL
Colours: Black

LIGHTWEIGHT MOUNTAIN MITT

A versatile lightweight expedition mitt. The GORE-TEX® XCR® waterproof, breathable insulated inner mitt has PU overlays on the palm and fingers for grip, making it ideal for use on its own. In more severe conditions it can be used in conjunction with the durable outer shell. The shell has a water resistant goat skin palm and fingers for grip and durability, with gel knuckle and finger tip protectors.

Fibre content: Shell: 70% Nylon, 20% Polyurethane, 10% Polyester, Palm: 100% Leather, Lining and Inner Mitt: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

WINTER GAUNTLET GTX

A good, tough, multi-purpose glove ideal for scrambling or workwear. With GORE-TEX® liner, knuckle protection plus brushed lining for warmth.

Fibre content: Back: 75% Polyester, 20% PVC, 5% Leather, Palm: 50% Polyester, 50% Leather, Lining: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

TUFF BAG

Popular wet weather over-mitt which easily packs into a pocket when the weather improves. Made from lightweight GORE-TEX® Paclite®, which is seam sealed to provide 100% protection in the wet. The reinforced palm makes this suitable for use with walking poles.

Fibre content: Shell: 100% Nylon.
Palm: 100% PU
Sizes: S, M, L, XL
Colours: Black, Red

CORBETT GLOVE

An ideal glove for winter walking and hiking. With GORE-TEX® liner to offer superior comfort and protection, durable nylon outer and PU palm for grip. The super soft brushed lining keeps hands warm and snug.

Fibre content: Shell: 100% Nylon,
Palm: PU. Lining: 100% Polyester,
Sizes: S, M, L, XL
Colours: Black

BANFF GLOVE

An excellent winter sports glove with long cuff to keep out spindrift. With ripstop nylon shell, PU palm and supersoft brushed lining for warmth and comfort.

Fibre content: 60% Nylon,
30% Polyester, 10% Polyurethane,
Insert: Hipora
Sizes: S, M, L, XL
Colours: Black

PRIMALOFT®

Waterproof gloves incorporating Primaloft® insulation.

INFERNO GLOVE

A warm, waterproof and breathable winter walking glove. It has a super soft lining and Primaloft® insulation to keep hands toasty warm. With textured palm and reinforced thumb for grip and durability plus velcro cuff closure to provide a secure, snug fit.

Fibre content: Shell: 100% Nylon,
Palm: 78% PVC, 22% Polyester,
Lining: 100% Polyester. Insert: Hipora
Sizes: XS, S, M, L, XL
Colours: Black

SUPER INFERNO GLOVE

Simply the warmest glove and mitt in our range. With 10oz Primaloft® insulation front and back, these are perfect for those with 'cold hands' offering twice the insulation of the standard Inferno Gloves.

Fibre content: 50% Nylon, 30% Polyester,
20% PVC, Insert: Hipora
Sizes: S, M, L, XL
Colours: Black

SUPER INFERNO MITT

Simply the warmest glove and mitt in our range. With 10oz Primaloft® insulation front and back, these are perfect for those with 'cold hands' offering twice the insulation of the standard Inferno Gloves.

Fibre content: 50% Nylon,
30% Polyester, 20% PVC,
Insert: Hipora
Sizes: S, M, L, XL
Colours: Black

gloves

WINDSTOPPER®

The WINDSTOPPER® membrane system provides a windproof barrier that is extremely breathable, preventing cold winds from cutting through the fabric but allowing excess heat to escape. WINDSTOPPER® fabrics are 100% windproof and provide the ultimate windchill protection.

GUIDE GLOVE

This close fitting, leather palmed WINDSTOPPER® glove is a favourite with mountain guides. With WINDSTOPPER® soft shell, a fleece lining and with a beautifully supple leather palm. The perfect glove for rope work.

Fibre content: Back: 100% Polyester,
Palm: Leather, Lining: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

STICKY WINDY GLOVE

This classic WINDSTOPPER® glove has a silicone grip palm making it a great companion for numerous outdoor activities. With pre-curved fingers and sticky print palm for a comfortable fit and good grip.

Fibre content: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

ACTION STICKY WINDY GLOVE

Using WINDSTOPPER® soft shell, for a really close, dextrous fit. Pre-curved and roll tip fingers. With silicon Amara palm for great grip and dexterity.

Fibre content: Back: 100% Polyester,
Palm: 70% Nylon, 30% Polyester
Sizes: S, M, L, XL
Colours: Black

WINDY GLOVE

Classic WINDSTOPPER® glove with pre-curved fingers for a comfortable fit. Similar to the Sticky Windy Glove but without the sticky palm.

Fibre content: 91% Polyester, 9% Others
Sizes: S, M, L, XL
Colours: Black

WINDY LITE DRY

Ideal for sports and activities where windproofing but low weight is essential. The Windy Lite Dry offers an enhanced moisture management system with Power Dry® palm and WINDSTOPPER® back. Perfect for use in highly aerobic activities such as running and cycling as well as during triathlons, adventure races and mountain marathons.

Fibre content: 100% Polyester
Sizes: S, M, L, XL
Colours: Black

POWER DRY®

VELO GLOVE

Lightweight WINDSTOPPER® glove suitable for cycling or walking. It has a really close fit with pre-curved fingers and a sticky overlay on the palm and two fingers.

Fibre content: 90% Polyester, 10% Others
Sizes: S, M, L, XL
Colours: Black

"Superb gloves"

Trail, December 2006

CYCLING

SAN REMO GLOVE

Full fingered glove, ideal for cycling. Featuring padded suedette palm with sticky silicon print for extra grip. Stretchy windproof back with reflective trim and reinforced thumb crotch.

Fibre content: 42% Polyester, 30% Nylon,
20% Polyurethane, 8% Elastane
Sizes: S, M, L, XL
Colours: Grey/Black

"Actually very versatile"
SGB Outdoor, December 2006

VUELTA GLOVE

Fingerless cycling glove with faux leather palm with padded heel. Stretchy back for a close fit with reflective trim. Absorbent, flannel nose wipe on thumb.

Fibre content: Back: 100% Polyester,
Palm: 100% PU
Sizes: S, M, L
Colours: Orange/Black

LINER GLOVES

A range of gloves designed for maximum dexterity and low bulk. This close fitting design makes them ideal for use under a heavier winter glove but they are also an excellent choice for occasional use on exposed summits, rest stops or belays.

STICKY POWER STRETCH® GLOVE

A sticky version of our popular POWER STRETCH® glove, this is ideal for running and active sports where some warmth and dexterity is required. The glove has a silicon print palm and fingers, as well as roll tip fingers for good grip and dexterity.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
 Sizes: XS, S/M, L/XL
 Colours: Black, Grey

Available in grey

POWER STRETCH® GLOVE

A popular glove with roll tip fingers for greater dexterity. Ideal for running or wearing as part of a layering system.

Fibre content: 49% Polyester, 38% Nylon, 13% Elastane
 Sizes: XS, S/M, L/XL
 Colours: Black, Grey

POWER STRETCH®

Available in grey

POWER DRY® GLOVE

Using Malden POWER DRY® fabric for the best in next-to-skin moisture management, this close-fitting glove is designed for use as a base layer but is also suitable for use on its own in cool conditions. Highly breathable and quick drying.

Fibre content: 100% Polyester
 Sizes: XS, S/M, L/XL
 Colours: Black

POWER DRY®

STICKY THICKY GLOVE

Similar to the popular Thicky Glove but with sticky silicone grip palm for improved dexterity. Use on its own or as part of a layering system.

Fibre content: 100% Polyester
 Sizes: S, M, L
 Colours: Black

'Used and Abused'
 Trail, February 2006

THICKY GLOVE

A popular thermal glove that offers a very comfortable fit. Can be used on its own or as part of a layering system.

Fibre content: 100% Polyester
 Sizes: S, M, L
 Colours: Black

FINGERLESS STICKY THICKY GLOVE

Our popular Sticky Thicky Glove but with the fingers removed. Durable and with sticky silicone grip palms.

Fibre content: 100% Polyester
 Sizes: S, M, L
 Colours: Black

Pack of 25

FINGERLESS THINNY GLOVE

Similar to our Thinny Glove but with the fingers removed. Made from Thermalite Base or for extra warmth.

Fibre content: 95% Polyester, 3% Nylon, 2% Elastane
 Sizes: One size
 Colours: Black

Available in packs of 25

THINNY GLOVE

A lightweight and fast-drying glove that is ideal for use as a first layer. Made from Thermalite Base for extra warmth.

Fibre content: 95% Polyester, 3% Nylon, 2% Elastane
 Sizes: One Size
 Colours: Black, Navy, Red

Available in packs of 25 in one colour

Pack of 25

FABRIC GLOSSARY

At Terra Nova our process of continual Research and Development has led to the creation of specialised fabrics for use in our high performance tents, bivi bags and packs.

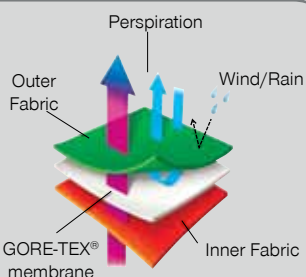

WATERSHED FABRICS - combinations of PU and Silicon coated nylons, combined with our Antiblast UV protective coating, to create a range of materials perfect for use in Terra Nova tent flysheets.

WATERBLOC FABRICS - hard wearing nylon using multiple coatings of PU or Silicon to create durable groundsheet suitable for the range of conditions experienced by Terra Nova tents.

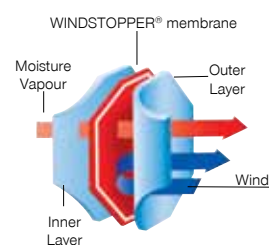

Our Wild Country and extremities ranges are made from the very best materials we can source in order to create quality products for any budget. Our extensive experience of worldwide fabric development and sourcing gives our customers the confidence that Terra Nova, Wild Country and extremities products are the best available for their requirements.

As well as our own materials, we use:

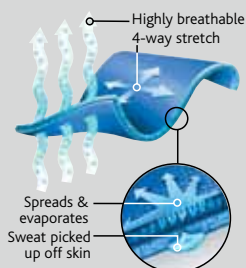

GORE-TEX® membranes prevent the entry of rain and melting snow, yet allow perspiration to escape to the outside of the fabric, leaving you feeling dry and comfortable.

The **WINDSTOPPER®** membrane system provides a windproof barrier that is extremely breathable. It prevents cold winds from cutting through the fabric but allows the body heat to ventilate. **WINDSTOPPER®** fabrics are 100% windproof and provide the ultimate windchill protection.

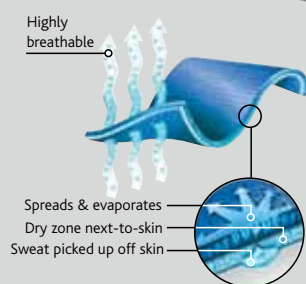

Polartec® Power Stretch® fabric features 4-way stretch and is very breathable. It keeps you dry when you sweat and provides warmth without the weight and bulk of traditional insulating fabrics. It features a proprietary construction with two unique surfaces: the durable nylon outer layer is wind- and abrasion-resistant; the soft inner layer pulls moisture away from your skin keeping you dry, warm and comfortable.

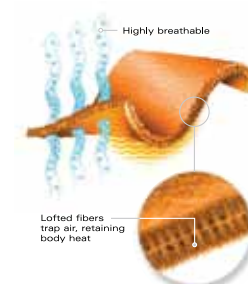

- Wind Pro® is 4 times more wind resistant than traditional fleece
- Warmth without weight
- Water repellent
- Highly breathable, body moisture vapour passes through
- Machine washable
- Versatile use

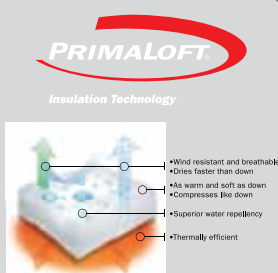

Polartec® Power Dry® fabric is designed to keep your skin dry when you sweat. Its patented bi-component construction moves at least 30% more moisture away from the skin than single component fabrics. Once moisture reaches the outside of the fabric, it spreads to many times its original surface area, enabling it to dry at least 2 times faster than cotton.

- Polartec® Thermal Pro®
- Warmth without weight
- Highly breathable
- Dries quickly
- Non-pilling
- Machine washable
- Versatile use

The human body uses energy to keep warm. **PrimaLoft®** uses a patented microfiber structure to help the body retain warmth and so conserve energy. PrimaLoft is as warm as down, compressible, breathable and water repellent. Unlike down, PrimaLoft® continues to insulate even when wet, helping you to remain dry, warm and comfortable even under the most extreme conditions.

DAC are world leading manufacturers of superlight tent poles. Using the latest technology DAC poles have a seamless construction and are anodised for extra strength and durability. Innovative pole inserts allow for radical new pole configurations, or lighter poles in existing designs.

We have a skilled UK manufacturing and repair facility at our Derbyshire base. All products in this workbook with the Union Jack logo are made here.

As well as producing standard products in our range, our specialist facility produces bespoke versions of our tents, such as heavy duty and white options for contract use. Please contact us for details.

Guaranteed waterproof flysheet.

Tents marked with this logo are guaranteed waterproof from purchase. This is achieved by factory taping the seams or by providing a waterproof hood over pole seams. Please note that these latter tents may have unprotected seams and zips, but are innovatively designed so that rainwater will not drip into or onto the inner. Our Lightweight Tents are designed to minimise seams.
