THE TERRA NOVA FASTPACK SYSTEM

FastPack Groundsheets are available on selected Terra Nova models and are designed to cover both the inner tent and porch area. They give you the option to travel even lighter by leaving the inner tent behind if conditions permit, shaving even more weight and bulk from your pack. There are two fabric options available: our new incredibly lightweight and strong ULTRA fabric, or lightweight groundsheet fabric.

Terra Nova bivi bags use the very best materials, such as GORE-TEX® Flo2 gas permeable outers and our new ULTRA fabric. We make nearly all of our bivi bags here in the UK, and ship them for use all over the world. Whatever your trip, there is a bivi in our range to suit you.

GORE-TEX® Flo2 fabric is highly waterproof and breathable, allowing both water vapour and O₂/CO₂ transfer from the inner to the outer, which makes it perfect for confined spaces like bivi bags.

GEMINI BIVI

Single-skin 2 person high altitude shelter, perfect for the last summit push.

- Gas permeable Flo2 upper, Waterbloc groundsheet
- Porch area for kit storage
- Semi-geodesic shape for strength

SATURN

Designed for military and extended use in all weather.

- Twin pre-curved aluminium alloy poles for extra head and foot room
- Extra long for kit storage
- No-see-um mesh door to keep out bugs
- GORE-TEX® upper and Waterbloc groundsheet
- Rear vent for excellent ventilation

JUPITER

For minimalist backpacking.

- Single pre-curved aluminium alloy pole gives extra head room and improved ventilation
- Good ventilation makes it suitable for warmer, more humid conditions
- No-see-um mesh door to keep out unwanted visitors
- GORE-TEX® upper and Waterbloc groundsheet

TITAN

An all GORE-TEX® alpine/expedition bag, with an 'L' zip.

- Made entirely from GORE-TEX® fabric
- 'L' zip gives easy access and entry points for ropes/slides
- Oversized hood to allow easy movement
- Heavy gauge zips for greater strength and reliability
- Storm flaps and velcro zip closures keep out spindrift and enables ventilation

DISCOVERY

Ideal for those seeking GORE-TEX® performance at an entry level price.

- Full horizontal zip with rain flap
- Half moon foot
- GORE-TEX® upper and Waterbloc endurance groundsheet

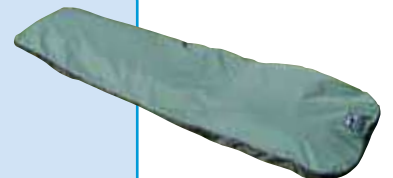

DISCOVERY LITE

Ultralight bivi bag offering excellent value for money.

tarps and bothys

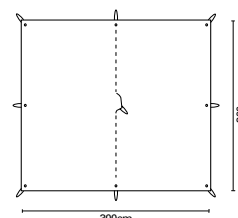

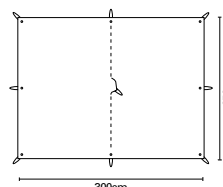

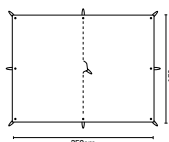

BIVI TARP

Ideal as a lightweight 3 season shelter, the Bivi Tarp comes with 2 poles, tarp style flysheet, mesh inner and fully seam sealed groundsheet. It is perfect for short, lightweight, summer trips.

MULTI TARP

This is designed to fit over the entrance of the following tents: Quasar, Ultra Quasar, Superlite Quasar, Voyager, Superlite Voyager. It offers a significant amount of extra porch coverage to each of these styles, perfect for extended summer camping trips.

TARP SHELTER 1, 2 & 3

These incredibly light tarps are the simplest and most flexible means of providing cover. Comprising a tarp style flysheet with reinforced eyelet positions and webbing tapes, Tarp Shelters come in 3 different sizes (see table below) and are the lightest shelters in our range.

NOTES

BOTHY BAGS

Used by mountain leaders, rescue organisations, backcountry skiers and canoe guides all over the world, these indispensable lightweight emergency shelters allow the users to create a 'microclimate' that is warm and dry - perfect for map reading, group discussions or even as a morale-booster for wet lunch breaks. Bothy bags come in a range of sizes and feature clear windows, mesh vents and roof 'sockets' which can house walking poles for additional support.

sleeping bags

Our Laser range of sleeping bags all use box wall construction to reduce cold spots and the highest quality 900 Fill Power goose down to maximise loft and warmth without adding weight. The downproof fabrics keep that precious down where it's meant to be, as well as packing easily, breathing well and feeling silky to the touch. Our bags are stored and delivered in mesh sacs to ensure that the down has never been compressed until you first need it. A compression sac is also included for minimum pack size.

The Voyager sleeping bags range is new for 2011, and is made to the same design and high standards using an 800 Fill Power down.

Our temperature ratings are based on the fill power and amount of down in each bag, as well as being tested in accordance with EN13537 to make sure they are as realistic and consistent as possible. However, as with all sleeping bags, temperature ratings should be taken as a guideline to be considered alongside your personal experience and requirements.

LASER 300 ELITE

groundsheet protectors

Groundsheet protectors (GSP) are designed to protect your tent groundsheet from wear and tear, moisture and dirt, and are custom-fitted for each tent model.

Although we use the highest specification of waterproof and durable fabric in all of our tent groundsheets, using a GSP (sold separately) helps to prolong the life of a tent by reducing wear and tear on the fabric. Using a GSP also keeps the tent underside clean and reduces the amount of moisture and grit that gets packed along with the tent. It is also much easier to dry and clean a GSP than the whole tent.

temperature moderators

Offered on the Terra Nova Laser Space range (page 4) and the Wild Country Citadel range (Page 16-17), the Temperature Moderator acts as a barrier to the sun beating down on the roof of your tent.

This extra layer keeps the inner cooler which is great when camping in hot weather. A Temperature Moderator also reduces the effects of UV light and falling tree sap on the tent flysheet, prolonging the life of the tent. The sun-shade effect can also be helpful for summer morning lie-ins when the sun is up early.

A perfect complement to our superlite Terra Nova tents, backpacks and sleeping bags, the extremities® active range of hats and gloves are specifically designed for running and will be right at home in any adventure racer's kit.

Using the very best high-performance fabrics and tailored design we aim to provide the optimum balance between comfort, protection and weight. The use of high-visibility and reflective touches increases safety at night whether training or competing, and our customary attention to detail instills a feeling of quality often missing in outdoor accessories.

PRIMALOFT® uses a patented microfibre structure to help the body retain warmth and so conserve energy. It is as warm as down, compressible, breathable and water repellent.

GORE-TEX® fabrics prevent the entry of rain and melting snow, yet allow perspiration to escape - keeping you comfortable. GORE-TEX® produce a range of materials for a wide variety of activities.

Windchill can be a major factor in body cooling, particularly when skin is wet from weather or perspiration. Preventing or reducing the effects of windchill on your hands can greatly increase warmth and comfort, and so allow normal hand function for longer. Extremities gloves use WINDSTOPPER® fleece and soft shell fabrics, or Polartec® WIND PRO® fleece to help reduce the effects of windchill.

PRIMALOFT® uses a patented microfibre structure to help the body retain warmth and so conserve energy. It is as warm as down, compressible, breathable and water repellent.

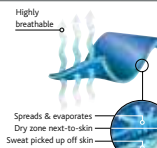

POLARTEC® POWER STRETCH® fabric has 4-way stretch properties - hugging the skin to keeping you dry by wicking sweat away. It is also highly breathable, and wind resistant.

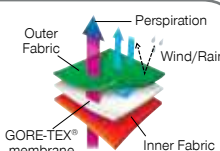

POLARTEC® WIND PRO® is 4 times more wind resistant than traditional fleece and provides extra warmth without weight, as well as being water repellent and breathable.

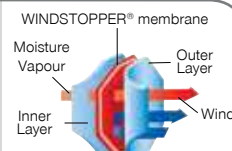

POLARTEC® POWER DRY® keeps you dry when you sweat by picking up moisture and moving it away from the skin. It's also highly breathable, quick drying, and comfortable.

GORE-TEX® fabrics prevent the entry of rain and melting snow, yet allow perspiration to escape - keeping you comfortable. GORE-TEX® produce a range of materials for a wide variety of activities.

The WINDSTOPPER® membrane system provides a windproof barrier that is extremely breathable. It prevents cold winds from cutting through the fabric but allows the body heat to ventilate.

We have a skilled UK manufacturing and repair facility at our Derbyshire base. All products in this workbook with the Union Jack logo are made here.

As well as producing standard products in our range, our specialist facility produces bespoke versions of our tents, such as heavy duty and white options for contract use. Please contact us for details.

Guaranteed waterproof flysheet.

Tents marked with this logo are guaranteed waterproof from purchase. This is achieved by factory taping the seams or by providing a waterproof hood over pole seams. Please note that these latter tents may have unprotected seams and zips, but are innovatively designed so that rainwater will not drip into or onto the inner. Our Lightweight Tents are designed to minimise seams.
