- Front and rear fly hoods for great ventilation
- Stable shape for use in poor weather
- 1g Titanium pegs

POLAR RANGE

The Polar series is a new range of tunnel tents offering a high degree of strength and durability for severe environments. In them we believe we have created the strongest and most durable tunnel tent available. Despite the low weight of the Polar Lite models, the structure of these 3 tents gives the highest level of weather performance. With a mixture of, Reflex T6 7001 and Scandium alloy poles, coupled with super streamlined profiles and Watershed flysheet fabric, each design offers great elemental protection. Polar Storm models have a flysheet with superior abrasion resistance and over 1000n of tensile strength. These are tunnel tents which offer true piece of mind for those venturing into the wild.

POLAR LITE 2 MICRO

Available Colours:
Green Red

Sleeps	2
Weight	1.75kg / 1.95kg (min/max) 3lb 14oz / 4lb 5oz (min/max)

Tarps

ULTRA MINI TARP

Made using our extremely lightweight ULTRA fabric and perfect for minimalist camping with the ultra bivi or moonlite bag cover. The tarp is designed to shelter your main torso when lying down. The height of the single pole can be adjusted to suit weather conditions or your use. A tiny but flexible piece of kit.

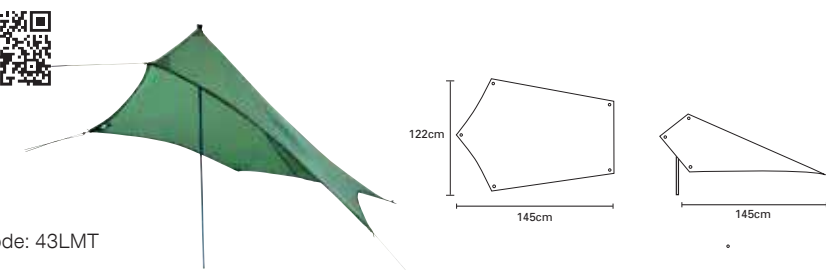

Code: 43UMT

LASER MINI TARP

An ideal lightweight shelter to use in combination with the moonlite bag cover or survival bivi. Made from the same lightweight Watershed Si2 fabric as the Laser Competition. The tarp is designed to shelter your main torso when lying down. The height of the single pole can be adjusted to suit weather conditions or your use. A very flexible piece of kit for minimalist camping.

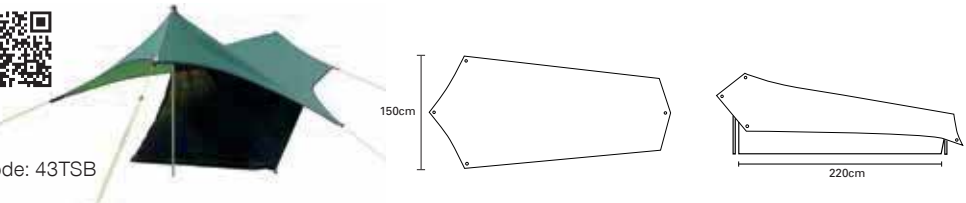

Code: 43LMT

BIVI TARP

Ideal as a lightweight 3 season shelter, the Bivi Tarp comes with 2 poles, tarp style flysheet, mesh inner and fully seam sealed groundsheet. Made from the same Watershed Si2 fabric as the Laser Competition.

Code: 43TSB

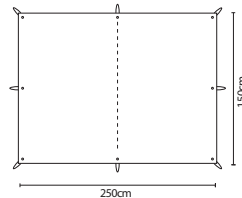

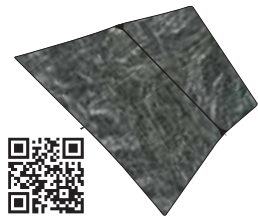

TARP ULTRA 1

The lightest weight tarp using the extremely lightweight ULTRA fabric. Comprising a tarp style flysheet with reinforced eyelet positions and webbing tapes. This tarp works great with our Ultra or Moonlite bivi's.

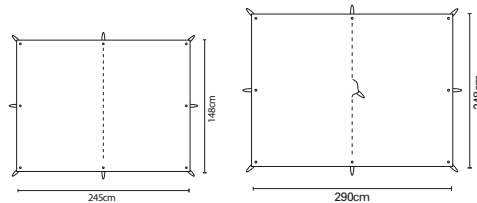

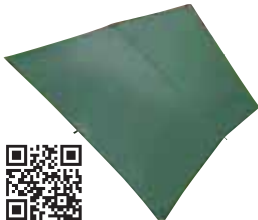

Code: 43TU1

COMPETITION TARP 1 & 2

Offered in 2 sizes and including reinforced eyelets, webbing tapes for multiple set up options and using our high quality Watershed Si2 fabric used in the Competition tents. These tarps work great with our Discovery Lite bivi to offer a lightweight, reliable shelter system.

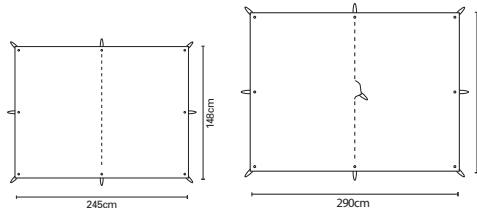

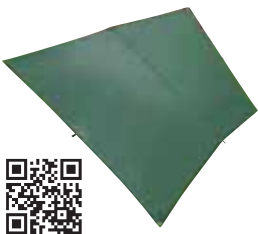

Code: 43TC1, 43TC2

ADVENTURE TARP 1 & 2

Offered in 2 sizes and including reinforced eyelets, webbing tapes for multiple set up options and using the tried and tested fabric used in Wild Country® Adventure tents. These waterproof tarps work perfectly with our Survival bivi to offer a great value, low weight shelter system for the first timer.

Laser Sleeping Mat

LASER SLEEPING MAT

Super lightweight EVA foam sleep mat.
Size: 1.5m x 0.5m. 4mm thick.
Colour: Yellow
Weight: 86g

Code: 55LSM

Our Laser range of sleeping bags all use box wall construction to reduce cold spots and the highest quality 900 Fill Power goose down to maximise loft and warmth without adding weight.

Updated for 2014 with unique air permeable fabric which maximises sleeping bag comfort for the user. At only 23gsm, it is one of the lightest fully downproof fabrics currently available which is highly water resistant, breathable and air permeable.

LASER 300 ELITE

Designed for adventure racers and mountain marathons, the comfort rating of 10°C and weight of only 310g make this bag ideal for stripping down pack weights. The tiny compressed size means more room in your pack for food or a few luxuries.

- FEATURES
- 900 Fill Power goose down
 - Mummy hood
 - Tiny pack size
 - 130G Downfill weight

Comfort lower limit.	Extreme temp.	Pack size	Full length	Weight
10°C 50°F	-2°C 28°F	27x12cm 11" x 4.6"	200cm 78"	310g 11oz

Code: 55L300

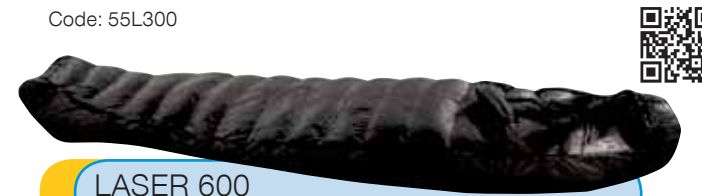

LASER 600

A great combination of features and high spec fabrics to produce the lightest (630g) genuine 0°C rated bag on the market. The Laser 600 allows the superlite user to push the boundaries into winter whilst keeping their pack weight to a minimum.

- FEATURES
- 900 Fill Power goose down
 - 30cm side zip
 - 355G Downfill weight
 - Mummy hood

Comfort lower limit.	Extreme temp.	Pack size	Full length	Weight
0°C 32°F	-14°C 7°F	27x15cm 11" x 6"	215cm 85"	600g 21oz

Code: 55L600

LASER 900

Superlite and super-warm this genuine -10°C bag weighs only 990g yet still has all the features you expect from a serious winter bag. Additional 900 Fill Power down has been added to create a quick-lofting bag that packs down small for extended trips.

- FEATURES
- 900 Fill Power goose down
 - 100cm side zip
 - Zip and neck baffles
 - 700G Downfill weight

Comfort lower limit.	Extreme temp.	Pack size	Full length	Weight
-10°C 14°F	-26°C -15°F	33x18cm 13" x 7"	215cm 85"	990g 31oz

Code: 55L900

The range of Voyager sleeping bags are designed for low weight and comfort in a range of conditions. They use high specification materials; 800 fill power goose down and feature full zips with reflective piping and small pack sizes.

The Voyager sleeping bags range from 10°C rating with a weight of only 600g to -11°C at a weight of just 1200g.

VOYAGER 600

Lightweight and luxurious combining sleek design with 800 fill power white goose down to make a great bag that packs down small for summer backpacking or racing.

- FEATURES
- Drawstring hood
 - Reflective piping
 - Half Zip
 - 168G Downfill weight

Comfort lower limit.	Extreme temp.	Pack size	Full length	Weight
10°C 50°F	- 5°C 23 °F	26x12cm 10.2"x4.6"	200cm 78"	600g 18oz

Code: 55V600

VOYAGER 800

Mid-weight for 3-4 season camping below the treeline, or as a lightweight multi-purpose bag. High quality down-proof fabric and 800 fill power white goose down, combined with Terra Nova's customary attention to detail - the perfect combination.

- FEATURES
- Mummy hood
 - Full zip
 - Zip baffle
 - 375G Downfill weight

Comfort lower limit.	Extreme temp.	Pack size	Full length	Weight
0°C 32°F	-15°C 5°F	29x16cm 11.4"x6.4"	215cm 85"	843g 28oz

Code: 55V800

VOYAGER 1200

Designed to keep winter chills at bay without sacrificing too much pack weight, the use of extra 800 fill power white goose down and cleverly positioned baffles makes this a great bag for year-round camping or backpacking.

- FEATURES
- Mummy hood
 - Full side zip
 - Zip and neck baffles
 - 695G Downfill weight

Comfort lower limit.	Extreme temp.	Pack size	Full length	Weight
-11°C 12°F	-30°C -22°F	34x19cm 13.3"x17.5"	215cm 85"	1200g 42oz

Code: 55V1200

Our temperature ratings are based on the fill power and amount of down in each bag, as well as being tested in accordance with EN13537 to make sure they are as realistic and consistent as possible. However, as with all sleeping bags, temperature ratings should be taken as a guideline to be considered alongside your personal experience and requirements. All our bags are stored and delivered in mesh sacs to ensure that the down has never been compressed until you first need it. A compression sac is also included for minimum pack size.

NEW

ULTRA 5

Designed for runners who don't want to carry a water bottle in hand, this 5 litre pack will accommodate a 1.5 litre hydration bladder with room to spare for gloves or a hat. The inner includes a pocket with a removable insulated pad to prevent the water chilling your back. Drawstring closure. Padded, adjustable shoulder straps with pocket and attachment loops plus adjustable chest strap. The Ultra 5 is made from our ULTRA fabric.

Weight: 103g / 3.5oz
Colour: Silver
Code: 56U5

LASER 6

Perfect for lightweight day use, running and day races. Mesh back panel, hip pockets and compression cords.

Weight: 182g / 7oz
Available in: black yellow
Code: 56LA6

UPDATED

LASER 20 ELITE

The best combination of weight and features for dedicated adventure racers and lightweight backpackers. With padded shoulder straps, hip belt pockets, mesh storage pockets, side compression cords and a roll top lid.

Weight: 210g / 8oz
Available in: black yellow
Code: 56LA20E

NEW

LASER 25

New 25 litre lightweight day pack styled on the Laser 20. Internal pocket and access points for a hydration system. Padded back, hips and shoulder straps plus adjustable chest strap with safety whistle. Four mesh pockets, two zipped pockets on the hip belt plus a useful top zip pocket. Compression cords and reflective detail on the back.

Weight: 365g / 13oz
Available in: black yellow
Code: 56LA25

ZIP POCKETS

Additional zip pockets, that can be attached to waist belts or shoulder straps (pack of two).

Weight: 15g / 0.5oz per pocket
Available in: black
Code: 56ZP

IN CLASS

ULTRA 20

Extremely lightweight. Made from our revolutionary ULTRA fabric, with padded shoulder straps and a drawstring closure and cover to further reduce pack weight. Additional pockets can be purchased separately (below).

Weight: 154g / 5oz
Colours: Silver
Code: 56U20

UPDATED

LASER 10

Lightweight slimline pack suitable for cycling or longer duration runs. With internal pocket and access point on each shoulder for a hydration bladder. Padded back and shoulder straps and adjustable chest strap incorporating a whistle. Plenty of easy access storage with two outer pockets on the back and also on the front straps plus zip pockets in the hip belt.

Weight: 297g / 10oz
Available in: yellow
Code: 56LA10

LASER 20

A fully equipped lightweight day pack for adventure racing, trail running & biking. Updated with new style foam padding in back, hips and shoulders. Four mesh pockets and two zipped hip belt pockets. Compression cords and reflective detail on back. Adjustable chest strap with safety whistle. Internal sleeve and access points for a hydration system.

Weight: 348g / 12oz
Available in: black yellow
Code: 56LA20

UPDATED

LASER 35

Superlite pack for backpacking, multi day adventure races, & bike touring. With padded back, hips and shoulders, removable 8mm foam back pad, and multiple gear attachment points. Two bottle pockets, two hip belt pockets and an accessory pocket. Long front opening for easy access to contents. Side compression cords. Internal sleeve and access point for a hydration system.

Weight: 467g / 17oz
Available in: black yellow
Code: 56LA35

BOTTLE HOLDER

Additional water bottle holder, that can be attached to waist belts or shoulder straps. This can be used on the laser, voyager or quasar packs.

Weight: 225g
Available in: black
Code: 56BH

VOYAGER 30

The new Voyager 30 litre pack is designed for backpackers who require low weight, multiple features and great value.

Weight: Min 385g / Max 604g
Colour: black

Code: 56V30

VOYAGER 45

Still offering features from the Quasar range & constructed with high tenacity r/s nylon. The Voyagers are reinforced with TN Cordura Matrix fabric.

Weight: Min 442g / Max 661g
Colour: black

Code: 56V45

VOYAGER 55

Still offering features from the Quasar range & constructed with high tenacity r/s nylon. The Voyagers are reinforced with TN Cordura Matrix fabric.

Weight: Min 462g / Max 891g
Colour: black

Code: 56V55

QUASAR 30

Lightweight, compact mountaineering pack with TN Matrix & Ultra fabric for high strength & maximum performance. 8mm removable back foam, multi function pockets & straps.

Weight: Min 348g / Max 567g
Colour: black

Code: 56Q30

QUASAR 45

Lightweight, compact mountaineering pack with TN Matrix & Ultra fabric for high strength & maximum performance. 8mm removable back foam, multi function pockets & straps.

Weight: Min 415g / Max 634g
Colour: black

Code: 56Q45

QUASAR 55

All features as the Quasar 30 & 45 with the addition of PE back system, with single strut alloy frame, giving excellent support & stability under load.

Weight: Min 436g / Max 845g
Colour: black

Code: 56Q55

Voyager features include:

- Removable lid with double pocket and reinforced crampon attachment points
- Mesh front pocket
- Extendable main compartment
- Multiple gear attachment points
- Haul point
- Differential sized side pockets with drain holes
- 2 x removable belt pockets
- Shoulder strap load adjustment
- Fully adjustable chest strap with hi viz whistle
- Double water bottle attachment points on shoulder straps, (bottle pocket sold separately)
- Internal hydration pocket with double hydration tube entry points on main pack
- 8mm removable foam back (Voyager 30 and 45)
- PE sheet with single alloy strut (Voyager 55)

Quasar features include:

- Removable lid with double pocket and reinforced crampon attachment points. Includes second low weight 'Mini lid' option
- Extendable main compartment
- Multiple gear attachment points
- Rope attachment strap and haul point
- Differential sized side pockets with drain holes
- 2 x removable belt pockets
- Shoulder strap load adjustment
- Fully adjustable chest strap with hi viz whistle,
- Double water bottle attachment points on shoulder straps, (bottle pocket sold separately)
- Internal hydration pocket with double hydration tube entry points on main pack
- 8mm removable foam back (Quasar 30 and 45)
- PE sheet with single alloy strut (Quasar 55)

Standard Bothy Bags Code: 53B

Used by mountain leaders, rescue organisations, backcountry skiers and canoe guides all over the world, these indispensable lightweight emergency shelters allow the users to create a 'microclimate' that is warm and dry - perfect for map reading, group discussions or even as a morale booster for wet lunch breaks. Bothy bags come in a range of sizes and feature mesh vents and roof 'sockets' which can house walking poles for additional support. Updated with welded PU windows which are suitable for temperatures as low as -30°C.

SUPERLITE BOTHY 2 AND BOTHY 4

Made using the same fabric as our Superlite tents to offer a lighter weight version of these popular shelters. In order to get the smallest pack size and weight possible we have removed the windows and roof 'socket' that are found on the classic versions.

Superlite Bothy Bags Code: 53SB

bothy bags

	Packed Size:	Weight:
Superlite 2 person	13cm x 11cm	253g / 9oz
Superlite 4 person	20cm x 12cm	400g / 14oz
2 person	22cm x 11.5cm	370g / 14oz
4 person	27cm x 11cm	600g / 21oz
8 person	30cm x 14cm	940g / 33oz
12 person	33cm x 16cm	1410g / 50oz
20 person	50cm x 19cm	1720g / 61oz

Footprints and Groundsheet Protectors

Groundsheet protectors (GSP) and Footprints are designed to protect your tent groundsheet from wear and tear, moisture and dirt, and are custom-fitted for each tent model. Although we use the highest specification of waterproof and durable fabric in all of our tent groundsheets, using a GSP (sold separately) helps to prolong the life of a tent by reducing wear and tear on the fabric. Using a GSP or Footprint also keeps the tent underside clean and reduces the amount of moisture and grit that gets packed along with the tent. It is also much easier to dry and clean a GSP than the whole tent. A footprint covers the area of ground covered by the tent (ie the inner and porch area). A groundsheet protector covers the area under the inner groundsheet.

THE TERRA NOVA® FASTPACK SYSTEM

The FastPack system is a method of using a footprint instead of an inner tent and is designed to trim even more weight and bulk from your rucksack. On selected Terra Nova® models, it is possible to leave the inner tent behind, if conditions permit, and use a footprint instead to cover the floor area of the tent. A footprint must be used if an inner tent is not, to provide the tension and anchor points required by the poles. For the tent models where the FastPack system is possible, footprints are also available in ULTRA fabric in addition to the standard footprint / groundsheet protector fabric.

	ULTRA Fabric	Standard Fabric
Laser Ultra 1/Laser Photon 1	88g	217g
Laser Photon 2	160g	299g
Laser Competition 1	93g	236g

Pegs

1g and 2g Ti Pegs, as seen on: Laser tents

Length 13cm.
Code: 50PEGST1

Hold well for their size in good ground, can be doubled up and still be lighter than most other pegs.

Available in packs of 6
(1g) 50PEGST12 (2g)

5.5g Ti Skewers, as seen on: Ultra Quasar

Length 15cm.
Code: 50PEGST1

Excellent lightweight yet strong peg, swap for your normal pegs to lighten your pack in one easy step.

Available in packs of 6
Code: 50PEGST1

4g Carbon Fibre peg

Length 12.5cm.
Code: 50PEGSCF

A broader alternative to Titanium skewers with a 5mm cross-sectional area. Only for use in soft ground.

Available in packs of 6
Code: 50PEGSCF

10g Superlite Ti 'V' angle peg

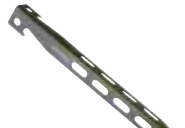

Length 15cm.

Increased surface area for a minimal weight penalty, great for critical load bearing points.

Available in packs of 6
Code: 50PEGT10

18g Ti 'V' angle peg

Length 15cm.

Great holding power for superlite travellers. Essential for pitching on sandy or loose ground.

Available in packs of 6
Code: 50PEGT18

TN Alloy peg - 15g, as seen on: Quasar

Length 17cm.

The standard peg for our expedition tents - made from high grade aluminium for continual use.

Available in packs of 6
Code: 50PEGS

Sand Or Snow (SOS) peg - 35g

Length 35cm.

Huge aluminium stakes with a curved profile. 35mm wide - can be buried sideways or used traditionally.

Available in packs of 10
Code: 50SOS

Alloy Pin peg - 40g

Length 22cm.

Solid aluminium 'nail' with a wide, flat head - can be driven through glacial moraine or tree roots with ease.

Available in packs of 2
Code: 50PEGSTP

11g Alloy 'V' angle peg, as seen on: Duolite

Length 14cm.

The standard peg for some of the smaller Wild Country® tents. A firm hold and beaded for extra strength.

Available in packs of 10
Code: 50PEGA10

6g Alloy Peg, as seen on Laser Competition 1

Length 15cm.

A general lightweight peg, which is thicker than the Ti Skewers and therefore has greater holding power.

Available in packs of 6
Code: 50PEGA6

spares and add-ons

* Hydrostatic head is tested to British Standards* tent comes supplied with more than one type of peg, see individual tent page for details.

Guaranteed waterproof flysheet.
Tents marked with this logo are guaranteed waterproof from purchase. This is achieved by factory taping the seams or by providing a waterproof hood over pole seams. Please note that these latter tents may have unprotected seams and zips, but are innovatively designed so that rainwater will not drip into or onto the inner. Our Lightweight Tents are designed to minimise seams.

We have a skilled UK manufacturing and repair facility at our Derbyshire base. All products in this workbook with the Union Jack logo are made here. As well as producing standard products in our range, our specialist facility produces bespoke versions of our tents, such as heavy duty and white options for contract use. Please contact us for details.

Sales Support

Tent pitching videos

Tent pitching videos demonstrate how to pitch a specific model but also include internal shots and highlight key features. They are designed to help customers pitch the tent correctly once they have made a purchase but are also a good pre sales tool, providing customers with a good overview of the structure of the tent and its size. The videos are hosted on our youtube channel www.youtube.com/terrannovaequipment and can be linked your own website.

Tent specification cards

Tent specification cards, which are ideal to display with a pitched model or compile as a catalogue in store, are available for all models. These can be downloaded from www.terra-nova.co.uk on the relevant product page.

ULTRA

Ultra fabric is constructed from a UHMWPE mat, laminated on each side with a very thin high performance polymer coating. The UHMWPE patented mat is up to 25% stronger and only half the weight of many traditionally woven siliconised ripstop nylons. The material also retains a higher proportion of its strength and water resistance even after UV weathering exposure. Wherever possible we bond rather than sew Ultra fabric. Bonding the seams offers higher tensile strength, lighter weight construction, and in long term tests, a high degree of resistance to UV weathering.

Watershed Si2

Watershed Si2 is a silicon / silicon coated nylon flysheet fabric designed to withstand better the effects of UV light. Dyestuffs are treated to provide enhanced UV protection and UV coating inhibitors help reduce the degrading effects of UV light. Different constructions, yarn types, and fabric weaves are used to provide the best performance for specific tent models.

Watershed

First developed by Terra Nova® in 1992, Watershed was the first Silicone / PU coating hybrid for flysheets, designed to offer enhanced water resistance and withstand better the effects of UV light. Dyestuffs are treated to improve UV protection and UV coating inhibitors help reduce the degrading effects of UV light. Watershed has evolved with a specialist PU coating with extra Hydrolysis resistance, this improves water resistance and gives extra grip to seam sealing tape providing a fully waterproof seam. Different weights and weave of fabric are used to provide the best performance for specific tent models.

Waterbloc

Waterbloc fabrics, generally used in Terra Nova® groundsheets, have been developed to be extremely water resistant. A highly specified PU provides maximum resistance to hydrolysis action. Nylon is widely used for Terra Nova® groundsheets and flysheets due to the excellent chemical and mechanical bond it provides with the coating systems. Different weights and weave of fabric are used to provide the best performance for specific tent models.

Poles

DAC

All DAC poles are extruded 7001 T6 aluminium alloy. DAC NSL are the lightest type of DAC pole. This is achieved by swaging both ends of the pole section. DAC Green Anodising used on NSL POLES is a more environmentally friendly anodising process achieved through water recycling and the choice of chemicals.

Scandium Alloy Poles

Scandium is a rare earth element which is added to the aluminium alloy compound in tiny quantities. Its effect is to increase the strength and flexibility of the tent pole. It allows us to use a smaller diameter pole section, therefore reducing the overall weight of the tent.

Terra Nova® Reflex Poles

Reflex poles are 7001 T6 extruded aluminium alloy poles specified by Terra Nova®

Bivi Bag Fabrics

Moonlite

A lightweight, waterproof and highly breathable fabric. At only 55gsm, giving 10m Hydrostatic Head, and a breathability minimum of 15,000 g/sqm/24, this laminated nylon ripstop is perfect for our Moonlite sleeping bag covers.

Dusk

A mid weight, waterproof and breathable fabric. With a weight of 75gsm, 10m HH, and good level of breathability, this ripstop nylon is a tough all round performer for our Survival Bivi.

GORE-TEX® Flo2 fabric is highly waterproof and breathable, allowing both water vapour and O₂/CO₂ transfer from the inner to the outer, which makes it perfect for confined spaces like bivi bags.

For further information and specification on our fabric & pole technologies please refer to our website www.terra-nova.co.uk

Sleeping Bag Fabrics

Laser Range

Unique air permeable sleeping bag fabric. At only 23gsm, this ripstop nylon is one of the lightest fully downproof fabrics currently available. Treated with our own unique coating technology to give waterproofing, breathability, and crucially high air permeability, this fabric truly maximises sleeping bag comfort for the user. The face of the fabric is also DWR treated.

Voyager Range

Lightweight, breathable and downproof with a DWR finish.

Footprints and groundsheets protectors

Groundsheet protectors (GSP) and Footprints are designed to protect your tent groundsheet from wear and tear, moisture and dirt, and are custom-fitted for each tent model. Although we use the highest specification of waterproof and durable fabric in all of our tent groundsheets, using a GSP (sold separately) helps to prolong the life of a tent by reducing wear and tear on the fabric. Using a GSP or Footprint also keeps the tent underside clean and reduces the amount of moisture and grit that gets packed along with the tent. It is also much easier to dry and clean a GSP than the whole tent. A Footprint covers the area of ground covered by the tent (ie the inner and porch area). A groundsheet protector covers the area under the inner groundsheet

Fabrics

Aqua Stop
Aqua Stop fabrics are designed to be strong and hardwearing underfoot, whilst maintaining a high level of water resistance.

Superflex GF poles

Glassfibre poles used in our Grasslands range.

Superflex Alloy Poles

7001 T6 extruded aluminium alloy poles specified by Wild Country® tents.

Stormtex P4000s! Stormtex P4000s! fabrics have a PU / silicon coating for maximum water resistance. Typically with mini ripstop used as the substrate, allowing a lighter weight, higher specification fabric to be offered for more demanding conditions. Being PU coated the fabric can also be taped to provide a fully waterproof seam.

Stormtex P4000
Stormtex P4000 fabrics, used in Wild Country® tents, have been

designed to provide the best performance for the conditions the tents are designed to face. The fabrics have a PU / DWR coating to improve water resistance and allow taping, so a fully waterproof seam can be offered. Fabrics tested to the CPA14 standard for flame retardancy are indicated as fire resistant. Different weights and weave of fabric are used to provide the best performance for specific tent models.

specific tent models.

Sales Support

Tent specification cards
Tent specification cards which are ideal to display with a pitched model or to use as a catalogue in store are available for all models. These can be downloaded from www.terra-nova.co.uk on the relevant product page.

Specification

temperature moderators

Moderated on the Wild Country® Citidell range, the Temperature of your tent.

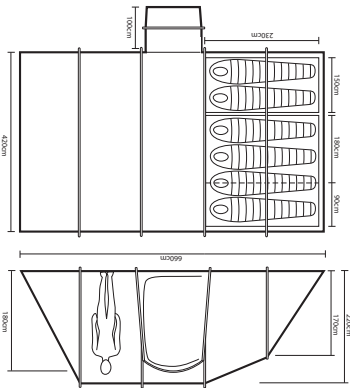

This extra layer keeps the inner cooler which is great when camping in hot weather. A Temperature Moderator also reduces the effects of UV light and felling tree sap on the flysheet, prolonging the life of the tent. The sun-shade effect can also be helpful for summer morning lie-ins when the sun is up early.

- Steel Jumbo poles with double thickness corner sections
 - Lots of ventilation and side 'wet weather door'
 - Jumbo Corners - kevlar-stitched webbing reinforcement
 - Guyline points re-inforced with durable Hypalon
 - Easy to pitch
 - Cavernous living area

ETESIAN 3

A range of porches are available separately for the Etesian range of tents. The Etesian porches double the available porch space for extra storage, sitting out bad weather or inviting round the neighbours for a glass of wine. These are simple to set up, are low weight and offer a small pack size so they don't take up much extra space when packed into your car.

Etesian Porches

Citadel 5 on Islay - Scotland

The Citadel range of family tents are designed to be simple and easy to pitch, offering high strength and durability. From the same designer as the classic Quasar mountain tent they are the last family tents standing in bad weather when other families have packed up and gone home. See the all weather trial at www.youtube.com/wildcountrys
