

PRODUCT GUIDE

Spring - Summer 25

SS25

Terra Nova Equipment has a long history of producing some of the world's best outdoor gear, gear which is tried and tested in our laboratory and in some of the most extreme environments on the planet.

Our passion and commitment to produce quality outdoor gear, leads us to use some of the best components and materials available. We are leaders in materials research and innovation, continuously looking to create and use fabrics that are unique in the outdoor industry. The result is award winning products which enable outdoor enthusiasts to achieve their goals. Terra Nova® is the brand of choice for most outdoor professionals across the globe.

The Terra Nova® brand has its heritage in mountain tents including the iconic Quasar. However, the last 15 years has seen it established as the leader in the design and development of extremely lightweight gear, including the lightest tents in the world.

Wild Country camping products from Terra Nova Equipment are designed for customers seeking the perfect combination of reliability, simplicity of use and great value.

Taking some of the design and quality standards from the Terra Nova® brand, products are used by everyone from the serious user to first time campers and families to escape into the outdoors.

TENT BRAND OF THE YEAR

INTRODUCING SS25 TECHNOLOGIES

TRIPLE RIPSTOP TECHNOLOGY

TRIPLEX™ FABRIC

Introducing the revolutionary Terra Nova TriPlex™ fabric; a combination of Recycled, Solution Dyed, and PFC-free fibres, to create one of the most environmentally friendly tent fabrics available, without sacrificing performance. TriPlex™ fabric also features a triple ripstop, polyester and nylon weave, to provide a more stable and durable tent fabric. The innovative TriPlex™ fabric features across the Terra Nova tent range.

HIGH-PRESSURE SILICONE

TriPlex™ fabric has led Terra Nova to develop a new High-Pressure Silicone Coating System. This system is used on both sides of the groundsheet textile, encasing the yarns in a high-performance silicone to increase water resistance. This eliminates the need for any WR treatment and is C0 by design. In addition, because the same coating type is on both sides of the textile there's a symbiotic relationship between the coating layers, where you need it most. These features give you a cleaner, lighter groundsheet, that's stronger and more durable than other traditional alternatives.

AIROCORNER™

Alongside TriPlex™ and the development of High-Pressure Silicone, Terra Nova introduces the AiroCorner™. The AiroCorner™ maximises the benefits of the High-Pressure Silicone, by designing out groundsheet corner seams. This eliminates the risk of leakage at the corners, and spreads tension over a wider area, giving better durability and strength. The Airo effect also enables a better connection between the groundsheet corners and the flysheet hem, making some tents easier to pitch.

PROTECTION MEETS PRESERVATION

Terra Nova Equipment is passionate about the outdoors and the need to address the environmental challenges that we are facing globally.

Over the last few years, we've been dedicated to lowering our carbon footprint throughout our products, manufacturing processes and within our offices.

Introducing SS25, where protection from the outdoors, meets preservation for the outdoors. Enjoyment of our wild spaces should not be at the expense of protecting the environment and we are here to do both, with the introduction of more sustainable fabrics, technologies and manufacturing.

We're proud to introduce

Terra Nova TriPlex™ fabric;

a compilation of Recycled, Solution Dyed and PFC-free fibres, to create one of the most environmentally friendly tent fabrics available, without sacrificing performance.

1. RECYCLED

Terra Nova and Wild Country tents now feature recycled flysheets, groundsheet and inners fabrics, made from post-consumer plastic bottles. Look out for our recycled icon to see which tents feature recycled fabrics.

2. SOLUTION DYED

Solution Dyeing is a technique that creates long lasting, highly pigmented fabrics whilst reducing impact on the environment. Dyeing the polymers first, rather than the fibres after they've been made into fabric, results in less water, chemical waste and energy use. It can also reduce harmful bi-products entering the atmosphere, like CO₂. All our Solution Dyed products feature the SD icon throughout the brochure.

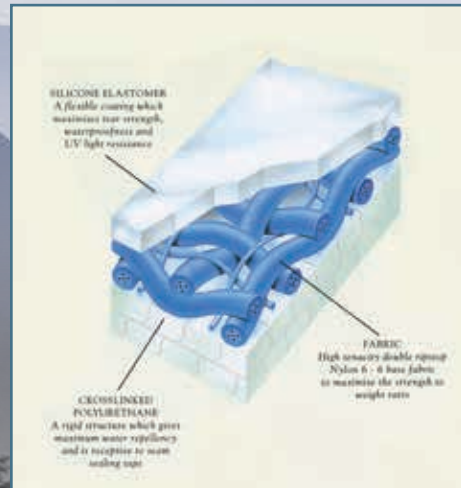

3. PFC-FREE CO

PFAS and PFC's pose environmental concerns due to their persistence and potential harm to our ecosystems. After vigorous testing and development to ensure quality remains at the forefront of our products, all Terra Nova Solar, Laser and Performance range tents, as well as all Wild Country tents are now fully PFC-free.

A HISTORY OF FIRSTS

1994

- Introduction of Watershed, the first PU/Silicone coated flysheet fabric in the industry

2004

- World's first sub 1kg tent, the Terra Nova LaserLite Launched. First Guinness World Record for the Lightest Tent in the World.

2012

- First to use bonded seams in commercially produced tents with the launch of the Terra Nova Voyager 2.

2025

- First tent manufacturer to use a unique fabric composite triple ripstop flysheet and groundsheet fabric, to provide increased durability and reduce stretching when wet.
- AiroCorners™ introduced to maximise the benefits of High Pressure Silicone, eradicating seams in groundsheets, adding strength and durability and eliminating the risk of leaks.
- First tent manufacturer to offer Solution Dyed, Recycled and PFC-free flysheet fabric.

ACCESSORIES

TREKKING POLES

TECHNICAL INFORMATION

Aluminium 7075 Poles

7075 aluminium alloy is the lightest and highest strength alloy available. Its high tensile strength allows a thinner walled, and therefore lighter, tube to be produced which has the same strength. Low weight means less energy is burned using them, making more energy available for the activity.

Clip Lock System

Clip locks provide a more secure locking mechanism than a twist system and allow the pole length to be quickly and easily altered. A screw adjustment is also included to change the strength of closure, ensuring a secure lock each time.

Tungsten Carbide End Tips

Terra Nova trekking poles have tungsten carbide end tips. Tungsten carbide is extremely hard and very abrasion resistant. These properties make it ideal for the end of trekking poles, which are constantly striking hard ground. End tips made from tungsten carbide will last longer than those made of alternative materials.

TERRA NOVA

TRAIL ELITE

Folding, compact trekking pole which easily adjusts to your required length but packs down small for carrying in a rucksack.

- 3 section folding pole with clip locks enabling easy adjustment
- Made with 7075 aluminium alloy
- Lightweight and comfortable EVA handle and soft wrist strap
- Removable trekking basket
- Tungsten tip with protective rubber ferrule

WEIGHT	MAX. ADJUSTABLE LENGTH	PACKED LENGTH
274g	130cm	37cm

TERRA NOVA

BIVI BAGS

Terra Nova® bivi bags use the best materials to suit their use, whether it is an overnight in moderate conditions or for more extreme conditions. Whatever your trip, there is a bivi in our range to suit you.

TERRA NOVA

SURVIVAL BIVI

- Waterproof and breathable sleeping bag cover
- Great value
- Small pack size
- Terra Nova Dusk fabric

Code: TASB001

TERRA NOVA

MOONLITE BIVI

- Waterproof and breathable sleeping bag cover
- Seam sealed
- Half moon foot
- Tiny pack size
- Mosquito net screen
- Terra Nova Moonlite fabric
- Colour: Green with black mesh

Code: TAMB001

JUPITER LITE BIVI

- Lightweight, waterproof and highly breathable
- Now supplied with Terra Firma Mini Pegs (P68)
- For minimalist backpacking
- Single pre-curved aluminium alloy pole gives extra head room and improved ventilation
- Good ventilation makes it suitable for warmer, more humid conditions
- No-see-um mesh door to keep out bugs
- Terra Nova Moonlite fabric and Waterbloc groundsheet

Code: TAJLB001

BIVI FABRICS AND TECHNOLOGY

MOONLITE

A lightweight, waterproof and highly breathable fabric. At only 55gsm, giving 10000m Hydrostatic Head, and a breathability minimum of 15,000 g/sqm/24hrs, this laminated nylon ripstop is perfect for our Moonlite bivi and Jupiter Lite Bivi.

DUSK

A mid weight, waterproof and breathable fabric. With a weight of 75gsm, 10000m Hydrostatic Head and good level of breathability this ripstop nylon is a tough all round performer for our Survival bivi.

TERRA NOVA

BOTHY BAGS

DID YOU KNOW...

Bothy comes from the 18th century of Irish and Scottish Gaelic descent. It means hut or small cottage and used as a mountain refuge.

Used by mountain leaders, rescue organisations, backcountry skiers and canoe guides all over the world, these indispensable lightweight emergency shelters allow the users to create a 'micro climate' that is warm and dry – perfect for map reading, group discussions or even as a morale booster for wet lunch breaks.

TERRA NOVA

BOTHY 2

- 2 person Bothy
- Roof 'sockets' to use walking poles as extra support
- PU welded windows suitable for temperatures as low as -30oC
- Polyester Ripstop 68 Denier 3000 HH
