87/88

THE WINTER MITT SYSTEM

Without doubt the most effective cold weather protection available. The three part system will keep your hands warm and dry in almost any conditions and because any part of the system can be used separately it is very versatile. All three components are designed to integrate and work together and great care has gone into solving the normally awkward problem of handling the second mitt fastenings after putting the first one on.

INNER LAYER: THERMAL GLOVES

Thermal material in medium thickness provides warmth and dexterity without undue bulk. The fabric is brushed on the inside for extra warmth and is soft and comfortable whilst remaining durable for normal use. The long stretch cuff gives a snug but comfortable fit around the wrist.

THERMAL GLOVES	BLACK	S M L	£4.25
-----------------------	--------------	--------------	--------------

MID LAYER: PILE MITTS

These simple but functional pile mitts are highly effective when fitted into the overmitts, with the Velcro® fastening. The polyester pile provides excellent insulation and is hardwearing, fast drying and lightweight, all the qualities required for a really effective inner mitt.

PILE MITTS	NAVY BLUE	S M L	£3.45
-------------------	------------------	--------------	--------------

OUTER LAYER: OVERMITTS

In winter conditions it is essential that overmitts are totally waterproof, windproof and simple to use. By ingenious design and the use of tape seam sealed Cyclone® fabric we have achieved all three criteria. The palms and knuckle areas have extra heavy duty 6oz fabric for longer life and the knuckle area has a double layer. Both the wrist strap and the elastic draw cord at the cuff can be adjusted using one "mitted" hand, eliminating the usual problem of putting on, and fastening the second mitt.

OVERMITTS	NAVY/RED	S M L	£17.30
OVERMITTS	ROYAL BLUE/RED	S M L	£17.30

VERSATILE, FUNCTIONAL, DURABLE, WATERPROOF. THESE ARE THE CHARACTERISTICS OF THE WINTER MITT SYSTEM

T

RAX AND TOPTRAX

These multi-function garments are ideal for climbing, walking, skiing, cycling, running etc., in fact you name it, they're probably used for it! Both garments are made from high quality two-way stretch polyester fabric that is very slightly brushed on the inside for comfort and warmth. It's fast drying, hardwearing and reasonably wind resistant and the lightweight, two-way stretch nature of it makes the garments very suitable for active sports.

TRAX

Our tracksuit bottoms were introduced last spring and are certainly one of the most successful items in our range to date. TRAX have a fine contrasting side stripe down the outside of the leg to match the colourways of the TOPTRAX. A small internal pocket takes care of keys etc., and the flat elastic stirrup strap prevents TRAX 'riding up'. (This can easily be removed if not required). The waist is elasticated and has a draw-cord as well for size adjustment.

TRAX	BLACK (RED STRIPE)	S M L XL	£11.95
TRAX	RED (ROYAL STRIPE)	S M L XL	£11.95
TRAX	ROYAL (RED STRIPE)	S M L XL	£11.95
TRAX	NAVY (YELLOW STRIPE)	S M L XL	£11.95
TRAX	YELLOW (ROYAL STRIPE)	S M L XL	£11.95

WAIST SIZES FIT: S(26-30) M(30-33) L(33-36) XL(36-40)

INSIDE LEGS ARE: S(30) M(31) L(32) XL(33)

*Please allow plus or minus 1" tolerance due to stretch of fabric.

TRAX SPECIAL LEG LENGTHS ARE AVAILABLE TO ORDER £13.45
(PLEASE SEND DETAILS OF YOUR REQUIREMENTS AND ALLOW APPROXIMATELY 14 DAYS FOR DELIVERY)

TOPTRAX

This over-the-head design is simple and effective, featuring front pouch pocket and short neck zip. The cuffs are knitted stretch type and the hem is elasticated for a snug fit. The colour details co-ordinate with those of TRAX and the cut is designed to give good freedom of movement around the arms and shoulders without causing the bottom of the garment to ride-up unduly.

TOPTRAX	NAVY/YELLOW	S M L XL	£19.95
TOPTRAX	ROYAL BLUE/RED	S M L XL	£19.95
TOPTRAX	RED/ROYAL BLUE	S M L XL	£19.95

NOMAD JACKET

This is the sort of jacket that lives on the back of a door when it's not on the back of its owner, you won't find the Nomad tucked away in a wardrobe. Yes it is a jacket for the hills but really its uses are limitless. It looks like a stylish street garment but it performs like a mini duvet. The combination of deep polyester pile for insulation and the wind resistant Tactel[®] nylon shell creates a jacket that's as warm and functional as it is good looking.

Tactel[®] is 100% nylon but you'd never guess. It looks and feels like cotton, it's as light as a feather, dries like lightning and is as tough as old boots — but soft — quite strange really!

But what's the NOMAD for, you're all asking? Good question, we don't really know to be honest. We made it because we like the idea and the fabrics work well together. The clue really is in the name — it doesn't really belong anywhere — but then again it's at home everywhere! On the functional side, the NOMAD has two front zipped pockets, a high pile lined collar, adjustable cuffs and it's "just long enough to keep your bum warm" and no longer — you'll love it.

WATERPROOF BREATHABLE FABRICS

SYMPATEX®

This is the very latest development in waterproof, breathable materials and is arguably the best available at present. Sympatex® is a tough polyester membrane and the secret of its remarkable performance is its hydrophilic nature, meaning that it will attract and transmit water vapour along its own molecular structure. By this method Sympatex® will prevent condensation from forming inside garments in all but exceptional circumstances but it remains totally waterproof. There are no 'pores' in Sympatex® so there is no danger of its performance being reduced due to soiling and it is both washable and dry-cleanable. The membrane is incredibly durable and is further strengthened by bonding it to a backing fabric. On our Spindrift and Nevè, rather than laminating this to an outer fabric as most other manufacturers do, we have used it as an inter-lining, adding considerably to its performance.

CYCLONE®

Cyclone® is a high quality polyurethane coating which may be applied to a variety of face fabrics to produce an exceptionally good value breathable material. The polyurethane is chemically engineered to incorporate millions of microscopic 'pores' which are large enough to pass water vapour but small enough to prevent water entry in the form of rain drops. Under most normal conditions Cyclone® will prevent condensation forming inside the garments whilst remaining 100% waterproof. In very high humidity or where perspiration levels are high, performance will not be as good as with Sympatex® but it will still be far superior to non-breathable fabrics. In the case of our overmitts these differences are negligible.

PHOTOS

Interesting, witty, or unusual photos of WINTERGEAR products in use are so desperately needed that we may be persuaded to part with *real* money in exchange for them! We cannot take responsibility for loss or damage so if they are precious we suggest you have copies made. Photos used in publicity material will be credited with the name of the photographer.

LLANBERIS SHOP

If you're in the North Wales area, why not call in at THE GREAT ARETE Llanberis where the whole WINTERGEAR range can be seen. The shop, which is jointly owned by WINTERGEAR, also carries a comprehensive range of top brand outdoor equipment.

OUR GUARANTEE

All WINTERGEAR products are unconditionally guaranteed against defects in materials and workmanship. If a product fails due to a manufacturing defect, even after extended use, we will repair the product without charge, or replace it, at our option. This guarantee is in addition to your statutory rights.

ORDERING INFORMATION

HOW TO ORDER BY POST

1. Fill in all the details of the items you require on the order forms, **block capitals please**. (If you have no order form, either write your requirements on a sheet of paper, or phone for a new order form)

SAMPLE ORDER FORM

ITEM	COLOURS		SIZE	PRICE EACH	QTY	TOTAL PRICE	OFFICE USE
	1st CHOICE	2nd					
TOPTRAX	BLUE	NAVY	M	19.95	1	19.95	

2. Total up the value of your order and enter it in the total box. (Postage and packing is free).

3. Fill in your name, address and daytime telephone number. Any additional size information should be included on the outline figure.

4. Enclose your cheque or postal order for the correct amount or fill in your credit card details and post in the pre-paid envelope provided. (There's no need for a stamp).

HOW TO ORDER BY PHONE

1. Phone 0286 2270 with your order, 24 hours a day. (Answerphone service after 5.00pm and at weekends). Please have your credit card to hand as we will need details from it. If you are using the answerphone please give: Name, address, Access or Visa number and expiry date AND ALL YOUR ORDER DETAILS and, to avoid confusion, please speak slowly and clearly.

MONEY-BACK APPROVAL SCHEME

If you are not completely satisfied with your purchase, you may return it, unused, within 21 days for a full refund.

DELIVERY

Goods will normally be despatched the day after receipt of your order. If a substantial delay is expected your cheque, postal order or credit card will not be processed and we will contact you to ask your advice.

SPECIAL OFFER

WE ARE OFFERING A FREE PAIR OF TRAX WORTH £11.95 WITH EVERY ORDER OVER £75. SIMPLY FILL IN THE DETAILS ON THE ORDER FORM TO CLAIM YOUR PAIR.

THESE PRICES WILL REMAIN CURRENT UNTIL 29th FEB 1988 (EXCEPT CALMAS).

We reserve the right to alter specifications of our products without prior notice.

**WINTERGEAR, UNIT 23, CIBYN IND. ESTATE, CAERNARFON, GWYNEDD LL55 2BD.

S PINDRIFT AND NEVÉ

The concept of these new waterproofs is totally unique. Three independent high specification fabrics are brought together to produce a really outstanding level of performance. They are combined in each garment, but not laminated together, giving exceptional freedom of movement and the added bonus of creating two insulating layers of air. Sprindrift and Nevé have all the benefits of a technical mountaineering outfit combined with the qualities of cotton windproofs. They break all the moulds of conventional waterproof garments, blending soft, quiet, comfort with exceptional durability.

THE OUTER LAYER

Tactel® nylon is a miracle of modern textile technology. It looks and feels like cotton but it has the performance of lightweight nylon. It's soft, but very tough, wind-resistant, fast drying and it's particularly tear resistant.

THE MIDDLE LAYER

This is the heart of the design in every sense. It is a fully waterproof, breathable Sympatex® membrane with very few seams (all taped of course) and it will eliminate condensation inside the garments in almost any circumstances. (For more details, see centre pages).

THE INNER LAYER

An exceptionally soft, silk-like nylon with proven wicking ability is used as a lining to really enhance the unrestrictive feel of the garments. Should moisture e.g. sprindrift, get inside the suit the lining fabric will quickly disperse it, enabling the Sympatex® membrane to transmit it more rapidly to the outside, leaving you totally dry.

SPINDRIFT JACKET

Sprindrift features: Lined, wired and visored hood with internal elastic draw-cord, elastic and Velcro® adjustable cuffs, elasticated waist and hem draw-cords with self-gripping toggles, map sized zipped chest pocket plus two skirt pockets (all of them waterproof) and a waterproof zipped front opening with press studded double flaps.

NEVÉ SALOPETTE

Nevé Salopette features: Full length side zips with Velcro® flaps enabling them to be put on whilst wearing crampons, skis or snow shoes. A crutch to chest zip with flap gives convenience and ventilation. Two chest pockets for storage (N.B. these are not waterproof), elasticated braces and waist, and double fabric on the seat, knees and ankles.

ULTRALIGHT WATERPROOFS

These lightweight, compact garments are ideally suited to all kinds of outdoor activities where you want to stay dry with the minimum of fuss and effort. They are made from 100% waterproof Cyclone® coated nylon which is lightweight, hardwearing, packs up small and effectively eliminates condensation problems in most situations. (For further information on Cyclone® fabric please see centre pages.)

The outer face fabric is a trilobal nylon which gives the garments an attractive sheen finish.

Both garments have tape sealed seams making them completely waterproof. The complete suit will pack into the small belted waist pouch, provided with the anorak, so there's no need to disturb the contents of the rucksack at the first signs of a shower.

ANORAK

The design features of the anorak are especially well thought out.

The hood fits snugly around the face without obscuring vision (particularly important for cyclists) and it is cut to give unrestricted movement of the head. The elastic draw-cord and self-gripping adjuster toggles mean that once you have set the hood comfortably there is no need to re-fit it each time you use it. The neck zip is well protected by a wide press studded flap to stop wind and rain penetrating this area. The chest pocket has a zip closure and it is large enough for a map and gloves etc.

The wrist closures are elasticated and adjustable by means of Velcro® and again, once they have been set, they need no further adjustment. The hem of the anorak has an elasticated draw-cord and toggle adjuster to give a neat draughtproof fit.

OVERTROUSERS

Featuring, an elasticated waist, long ankle to knee zips, enabling them to be put on over boots. The ankles have an elastic and Velcro® closure system that is fully adjustable.

The combination of quality fabrics and thorough attention to design detail make these garments a pleasure to use.

CALMA ROCK BOOTS

The search for the perfect rock boot will entertain designers and climbers alike for generations to come. In the Calma Lincé I and II we just happen to believe that we're getting closer to it than anybody else so far.

The difficulty is finding the perfect balance between fit, fabrics, sole materials, flex, comfort, durability etc. The Calmas *feel* right and that's about as scientific as you can get in describing it. The lacing really works to hold the foot, particularly in the critical toe area, giving a great feeling of precision. The ankle profile is deliberately low for more flexibility and both models have canvas lined suede uppers. The low profile toe shape also helps when using small pockets and the two models offer a clear choice of smearing or edging performance depending on your style of climbing and on the type of rock you most often climb on.

Sticky?... Don't take our word for it, take Johnny Dawes'. "These are the stickiest rock boots I have used to date". Johnny uses Calmas on all his routes including his phenomenal "Quarryman" and the adhesion of the boots whilst smearing on slate (almost impossible in any other rock boot) was obviously a critical factor in pushing this new route.

LINCÉ I

The I's are the ultimate smearing boot, currently being used by many of Britain's top rock stars. They are particularly good when friction is more important than out and out edging performance. This makes them ideally suited to gritstone and similar rocks.

LINCÉ II

The II's are an edging boot, ideal for standing on tiny sharp holds and small pockets as found on slate and limestone in particular, but because of the sticky rubber they still smear effectively.

LINCÉ I **GREY/PINK** ($1\frac{1}{2}$ sizes) **34-46** **£54.95**

LINCÉ II **PURPLE/PINK** ($1\frac{1}{2}$ sizes) **34-46** **£62.50**
