## Trax Suits

One of our original product ranges. These versatile products are ideal for most sports or leisure activities. Made from a polyester stretch fabric which combines reasonable warmth (slightly warmer than most of the competitive products) with good wind resistance, is hard-wearing, quick drying, very comfortable, and good value.

## Trax

Our most popular product! These simple but very effective tracksuit bottoms, are practical, smart, comfortable, and hard-wearing.

### FEATURES

- Fine contrasting side stripe
- Choice of five colourways
- Small internal pocket
- Elasticated and drawcord waist
- Elastic bottom stirrup (can be cut off if you hate them)
- Special leg lengths available (see SPECIFICATION section)

## Top Trax

redesigned for this season

Smart new three colour coordinates with the TRAX bottoms.

### FEATURES

- Zipped front
- 2 large pockets
- Knitted cuffs
- Elasticated bottom hem

## Tights

(see front cover)

(see SPECIFICATION section)

## Wintermitts

**Without doubt** the most effective cold weather hand protection available. The integrated three part system will keep your hands warm and dry in almost any conditions, and because any part of the system can be used separately, it is very versatile.

### 1) INNER LAYER: THERMAL GLOVES

Made from a medium thickness Polypropylene/Acrylic mix thermal material to provide warmth and dexterity without undue bulk. The fabric is lightly brushed on the inside to improve warmth.

### 2) MID LAYER: PILE MITTS

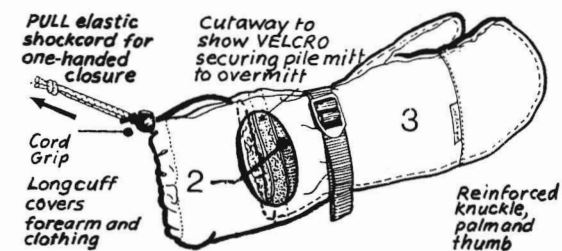

These simple but functional pile mitts are highly effective when fitted into the overmitts. The polyester pile provides excellent insulation, and is hardwearing, fast drying, and lightweight.

### 3) OUTER LAYER: OVERMITTS

IN WINTER CONDITIONS IT IS ESSENTIAL THAT OVERMITTS ARE TOTALLY WATERPROOF, WINDPROOF, BREATHABLE, AND SIMPLE TO USE. By ingenious design and the use of a combination of heavy duty CYCLONE fabric for the palm and knuckle, and a lighter but more breathable CYCLONE fabric on the main body, we have achieved all four criteria. Using a clever system, the elasticated drawcord closure can be easily adjusted using one mitt hand, thus eliminating the normal problem of putting on and fastening the second mitt.

### FEATURES

- Complete versatility
- Warmth with dexterity using the THERMAL GLOVES
- PILE MITTS for removable warmth (easy drying) located with VELCRO to the Overmitts
- Totally waterproof and windproof

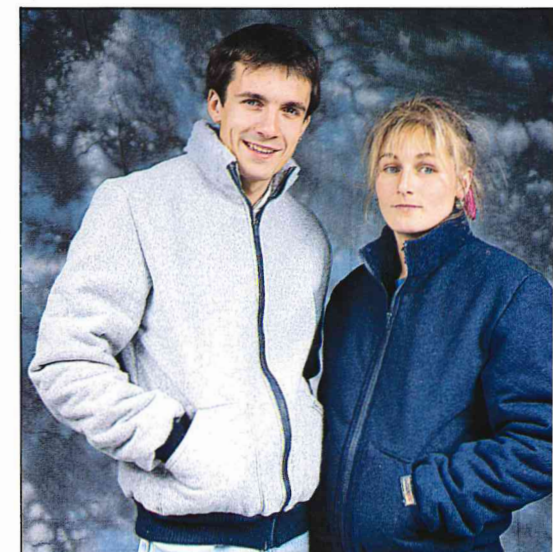

- Breathable
- Fully taped seams on the overmitt
- Heavy duty palm and knuckle guard
- Adjustable wrist strap
- Elasticated singlehanded drawcord closure

## Pile Jacket

Our primary aim has been to give great value for money, which we think we have achieved! At the same time we have used top quality fabrics and then sewn them to our normal high standards, so you can be sure of lasting quality. Although not as fashionable as Fleece tops, their performance is equal, if not better. They are easy to care for, and last for a very long time.

### FEATURES

- High stand up collar
- Patch hand-warmer pockets
- 100% polyester pile fabric (the best)
- Great value

## Koalas

So called because they are soft and cuddly, yet very strong, and are seen hanging around a lot. These smart and comfortable tops are made from the latest in fleece fabric.

The advantages of this brilliant fabric are its good looks (which stay even after prolonged heavy use) and its easy care – just bung it into the washing machine, hang it up to dry (which it does very quickly) and it's ready to go again. We have designed a simple over-the-head smock in 4 colourways.

For head protection we have our new smart and practical Balaclava and Ear Warmer.

### FEATURES

- Uses the very latest fleece fabric (looks great performs well)
- 2 large zipped pockets
- Attractive colours
- Quick drying
- Easy Care
- Long lasting
- Soft and comfortable

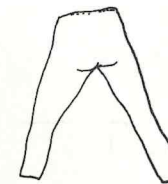

Ear Warmer and Balaclavas. Balaclavas also available in Magenta.

## Rucksac (not shown in brochure)

This simple straightforward sac is made with top quality fabrics and fittings to give very good value for money. A lot of modern sacs have lots of extra (special) FEATURES which in our opinion normally just add extra weight with little practical use, and of course extra cost. So we have produced a sac with all the important features, but no extra fancy fittings.

- Texturised coated nylon fabric
- Padded back
- Curved padded shoulder straps
- 2 ice axe fixtures
- Crampon fixture
- Top pocket
- Side compression straps
- Quick release waist belt – FASTEX buckle

### THE WHITEOUT

This 5 pole geodesic tent is immensely strong and stable, making it suitable for all seasons, virtually anywhere. There is enough room for 3 people plus their gear or even four or more at a squeeze.

# Tents

They're back! Our **world famous designs** are now available from ourselves, so you do not have to put up with far eastern products to get the design features we made famous in the early 1980's – such as **Neoprene groundsheets** (the best, hardwearing and the most waterproof), **Fully taped** groundsheet and flysheet seams (nobody would dream of buying a good quality waterproof jacket that was untaped! So why should you put up with it in a tent), and of course **Geodesic** principles of design for maximum internal space combined with the strongest possible structure for the weight. Don't compromise buy the best! For more information on the tents we have a separate tent brochure, if you would like one of these please contact us.

### THE BLIZZARD

Offers a very strong and stable Geodesic 'dunnel' shaped 2 person tent, for use anywhere in the world, and in all seasons.

Photos show the NEW flys with covered zips and additional storm guying.
