

WILD
COUNTRY

1992 tents

cultivated design When you design and build a tent for the harsh conditions that Wild Country does, you must carefully consider every angle and every feature of that shelter. That's why we don't introduce 10 new tents each year and have 10 old ones become history.

Our designs evolve almost completely before they're ever sold. Then through rigorous field testing, and access to new technology, we make minor refinements that keep our tents at the leading edge. Strength, durability, weatherproofness, and quality construction are the hallmarks of Wild Country tents. We may not have 30 different styles in 6 colors each, but when expeditions need the most dependable shelters available, with the least weight, they are willing to buy our tents when others are free. They

know in a howling blizzard, at 20,000 feet and 20 degrees below zero, that performance is more valuable than a free tent and Wild Country tents perform.

functional weight We've discovered that there is no standard formula for weighing tents. Many companies weigh only the fly, poles, and inner tent without pegs, guylines, stuff sacks, etc.

We give you two weights. One for everything in the bag, (extra pegs, repair fabrics, etc.) and we also state a "functional weight". That's the weight of the poles, fly, and inner tent, plus the guy-lines & pegs you need for actual use and all the stuff sacks. That standard will lead to more honest weight comparisons and if we still seem a tad heavier, remember that muscle weighs more than fat.

terra nova The Terra Nova is a spacious base camp tent that doesn't trade size for strength. Its proven geodesic design uses equalized panel sizes and a beefed up frame to ensure impressive strength in high winds and heavy snow loads. Tested by its designer, Mark Vallance, in a big storm at 23,000 feet on Broad Peak in 1991, the Terra Nova delivers space and shelter in rugged conditions.

- The 5 pole frame is a combination of 9.5 mm and 11 mm 7001-T6 aluminum poles.
- Heavy-duty bathtub floor.
- Seam tape-sealed floor and fly.
- Poled front vestibule and pull-out rear vestibule.
- Front and rear entrances with big "half-moon" door that falls out of the way when opened.
- Mesh pole sleeves.

- Interior mesh pockets and hang loops.

Colors: Yellow/Grey (Green available in UK)

Functional Weight: 5.7 kg
(12 lb. 8oz.)

Dimensions:
length- 213 cm (84 in.)
width- 198 cm (78 in.)
height- 147 cm (58 in.)
Packed: 18 cm x 74 cm
(7 in. x 29 in.)

Sleeps: 4

hyperspace The offspring of restless innovation. By equalizing the panel size in the geodesic design of the Hyperspace, more strength and wind stability were created than had been achieved with previous geodesics that utilized the same weight in fabric

and poles. The result is that the Hyperspace with its almost rectangular floor, steep side walls, and increased volume is the finest three person mountain tent we've ever made.

- A frame of 5, 9.5 mm 7001-T6 aluminum alloy poles.
- Continuous mesh pole sleeves

for ease of set up.

- Spacious 3 person design.
- Front and rear entrances with vestibules (front vestibule has additional pole support).
- Interior mesh pockets and hang loops.
- Heavy-duty bathtub floor.
- Seam tape-sealed floor and fly for absolute waterproofness.
- Eight guying points for extreme conditions.

Colors: Yellow/Grey (Green available in UK)

Functional Weight: 4.6 kg
(10 lb. 3 oz.)

Dimensions:
length- 208 cm (82 in.)
width- 190 cm. (75 in.)
height- 120 cm (47 in.)

Packed:

21 cm x 71 cm (8 in. x 28 in.)
Sleeps: 3

super nova A familiar sight in the high mountains of the world, the Super Nova inspires confidence and offers comfort in conditions that shred lesser tents. Its proven geodesic shape and features have made this tent the most copied dome design available today. Its poled front vestibule, pull-out rear vestibule, and wide opening doors make access and gear storage a breeze, and create more living space inside.

- A frame of 5, 9.5 mm 7001-T6 aluminum alloy poles.
- Heavy-duty bathtub floor.
- Seam tape-sealed floor and fly.
- Mesh pole sleeves.
- Interior mesh pockets and hang loops.
- Time tested design.
- Dual entrances with poled front vestibule and rear pull-out vestibule.

Colors: Yellow/Grey (Green available in UK)

Functional Weight: 4.6 kg
(10 lb. 6 oz.)

Dimensions:

length- 206 cm (81 in.)

width- 244 cm (96 in.)

height- 124 cm (49 in.)

Packed: 21 cm x 71 cm
(8 in. x 28 in.)

Sleeps: 2-3

quasar It doesn't take an engineer to see the strength inherent in the Quasar's design. Sleek and stable, it withstands wind with hardly a ruffle and shrugs off heavy snow loads with its unique frame. The Quasar's reputation as the strongest, lightweight, two person mountain tent available

results in expeditions buying this portable bomb shelter rather than depending on a free tent from elsewhere.

- A frame of 4, 9.5 mm 7001-T6 aluminum alloy poles.
- Continuous mesh pole sleeves for ease of set up.

- Front and rear vestibules.
- Real bathtub floor.
- Seam tape-sealed floor and fly.
- Full front and rear entrances.
- Interior mesh storage pockets and hang loops.

Colors: Yellow/Grey (Green available in UK)

Functional Weight: 3.8 kg (8 lb. 8 oz.)

Dimensions:
length- 229 cm (90 in.)
width- 137 cm (54 in.)
height- 95 cm (38 in.)

Packed: 21 cm x 56 cm (8 in. x 22 in.)

Sleeps: 2

trisar The Trisar is the perfect blend of strength, lightweight, and versatility. With a functional weight of just under 7 lbs., this aerodynamic 3-pole shelter is light enough to work as a summer backpacking tent, but, as numerous trips to the mountains

have proven, will comfortably survive snow and wind that would destroy others in its class. If you could only choose one tent, and weight was of major importance to you, the Trisar is the best all-around tent we make.

- A frame of 3, 8.5 mm 7001-T6 aluminum poles.

- Free standing, semi-geodesic design.
- Large, mesh back window for ventilation
- Front pull-out vestibule.
- Seam tape-sealed floor and fly.
- Real bathtub floor.
- Interior mesh pockets and hang loops.

Colors: Yellow/Grey (Green or Violet available in UK)

Functional Weight: 3.1 kg
(6 lb. 14 oz.)

Dimensions:

length- 228 cm (90 in.)

width- 127 cm (50 in.) at door
91 cm (36 in.) at foot

height- 110 cm (43 in.)

Packed: 21 cm x 56 cm
(8 in. x 22 in.)

Sleeps: 2

red dwarf One of the highest rated tents in the 1990 Backpacker field test of lightweight tents, the Red Dwarf was noted for its headroom and especially its weatherproofness. The two crossover pole design supplies 42+ in. of headroom and the steep sidewalls help to alleviate the claustrophobia usually associated with tents in this class, especially when sitting out a two day soaker.

- Tent frame consists of 2, 8.5mm 7001-T6 aluminum alloy poles.
- Single panel, mesh vented, half-

moon door.

- Full front vestibule for gear storage.
- Seam taped-sealed floor and fly.
- Real bathtub floor.

Color: Yellow/Grey

Functional Weight: 2.2 kg (5 lb.)

Dimensions:

length- 275 cm (108 in.)

width- 152 cm (60 in.) at door

91 cm (36 in.) at foot

height- 112 cm (44 in.)

Packed: 15 cm x 49 cm

(6 in. x 19 in.)

Sleeps: 2

dead guy The Dead Guy works amazingly well for something so simple on rocky terrain. Buried in snow or sand, these little wonders provide greater holding power than snow stakes or stuff sacks and allow you to keep your skis and axes for their intended use. On rocky ground, lay them out, pile up the rocks, and you'll sleep through a howling gale that would have flattened an unguyed or poorly guyed tent in the same place.

- Cut from 8 oz. Cordura.
- Comes complete with anchor cords and stuff sack.

Weight: .11 kg (5 oz.)/pair

Size: 61 cm x 61 cm

(24 in. x 24 in.)

voyager

w/fly

helps create excellent living space. The full vestibule ensures storage and access to gear and better weatherproofness.

- Frame of 3, 8.5 mm aluminum alloy poles.
- Taped-sealed fly and bathtub floor.
- Inner mesh pockets and hang loops.

Color: Grey/Green Fly
Functional Weight: 2.7 kg
(5 lb. 15 oz.)

Dimensions:
Length- 208 cm (82 in.)
Width- 127 cm (50 in.)
Height- 102 cm (40 in.)
Packed: 21 cm x 50 cm
(8 in. x 20 in.)

Sleeps: 2

high altitude quasar This specialized version of the Quasar

uses snow valances on the fly to create even greater wind stability particularly on frozen ground or ice.

- Proven Quasar geodesic frame for maximum strength/weight efficiency.
- Tape-sealed fly and bathtub floor.
- Greater wind stability and more dustproof (a benefit in glacial terrain).
- Only minor increases in weight and condensation.

Color: Red
Functional Weight: 4.1 kg (9 lb.)
Dimensions:

Length- 229 cm (90 in.)
Width- 137 cm (54 in.)
Height- 95 cm (38 in.)
Packed: 21 cm x 56 cm
(8 in. x 22 in.)
Sleeps: 2

voyager A sturdy 3 season tent, the Voyager combines space and lightweight for camping and trekking. The wide, high door

tents

style	height (cm)	total weight (kg)	functional weight (kg)	inner tent floor area (m ²)	sleeps

bivouac bags Wild Country bivouac bags feature full Gore-Tex fabric construction for total protection no matter what the conditions.

- 3-ply Nexus Gore-Tex fabric construction throughout.
- All seams are factory tape sealed.
- Heavy duty zippers and stitching.

alpine bivi The straight forward Alpine Bivi features double slider horizontal zip for starry night viewing or foul weather "submersible" mode.

Colors: Olive or Royal
Weight: .54 kg (1 lb. 3 oz.)

Dimensions:

length- 213 cm (84 in.) reg.
244 cm (96 in.) long
width- 86 cm (34 in.)
Packed: 10 cm x 25 cm
(4 in. x 10 in.) reg.
Sleeps: 1

traveller bivi The Traveller Bivi is an alpine bag with the added convenience of a long vertical side zip for easy access/exit.

Colors: Olive or Royal
Weight: .59 kg (1 lb. 5 oz.)

Dimensions:

length- 213 cm (84 in.) reg.
244 cm (96 in.) long
width- 81 cm (32 in.)
Packed: 10 cm x 25 cm
(4 in. x 10 in.) reg.
Sleeps: 1

gemini The Gemini is a bit bigger than the HA Gemini with a third pole for increased stability, a coated vestibule and no-see-um netting that all add livability whenever versatile lightweight shelter

is a prerequisite.

- 3-ply Nexus Gore-Tex fabric.
- Frame of 3, 9.5 mm 7001 T-6 aluminum poles.
- Heavy duty coated nylon bathtub floor.
- Sealed seams, interior hang loops.

Color: Royal

Functional Weight: 2.4 kg
(5 lb. 4 oz.)

Dimensions:

length- 200 cm (79 in.)
width- 117 cm (46 in.)
height- 99 cm (39 in.)

Packed: 20 cm x 56 cm
(9 in. x 22 in.)

Sleeps: 2

high altitude gemini The High Altitude Gemini's full Gore-Tex fabric construction and sturdy two pole crossover configuration creates a weather cocoon of

incomparable compactness and stability. Features include a rear vent, 7 pullout loops, interior hang loop, and, like all Wild Country tents, sealed seams.

- Frame of 2, 9.5 mm 7001 T-6 aluminum poles.
- 3-ply Nexus Gore-Tex fabric and heavy duty coated nylon bathtub floor.
- Awning prevents snow blowing in when opening door.
- Taped seams, interior hang loops, plenty of tie downs.

Color: Royal

Functional Weight: 2 kg
(4 lb. 8 oz.)

Dimensions:

length- 198 cm (78 in.)
width- 117 cm (46 in.)
height- 96 cm (38 in.)

Packed: 18 cm x 56 cm
(9 in. x 22 in.)

Sleeps: 2
