FRIEND

FLEXIBLE FRIEND

Whenever you see this tag on a
Wild Country product, you know
that a portion of the profit is
going directly to the Access Fund.

"THE WORST SIN... IS... TO BE INDIFFERENT."

George Bernard Shaw

Unfortunately, love of something eventually creates a responsibility to it, or we risk its loss. Liability, restricted access, and related issues now threaten climbing as never before. As a result, those who love climbing and the freedom to climb must now stand and be counted. Without bothering to understand the issues and get involved, sport climbers and traditionalists alike risk losing.

It's not enough just to care, we must each act, by personal involvement, or by supporting those groups who act on our behalf.

If through apathy we lose the freedom to climb, we mustn't fault any group or individual. We'll all suffer the consequences and have only ourselves to blame.

Wild Country actively supports the following organizations:

The Access Fund

Outdoor Recreation Coalition of America

Climbing Sports Group

The American Alpine Club

The American Mountain Foundation

The American Mountain Guides Association

FRIENDS

Friends are the standard of excellence in camming devices the world over. They have provided climbers with design superiority, performance, high quality manufacturing, strength, and field-proven reliability for over 15 years. The Jardine formula remains unsurpassed, explaining why season after season on cliffs around the world, the overwhelming favorite among climbers of all levels are Friends.

- The patented trigger design allows full control of the individual cam pairs, is stable and easier to use with tired fingers, and resists accidental triggering by the rope or sling.
- Precisely calculated and often copied cam angles that provide range of expansion and high pull-out strength.
- The strong, durable 7075 alloy stem provides stable and consistent loading of the cams for reliable holding power.
- Longevity and serviceability are built into each unit allowing for 10-12 year old Friends to still be in use.

FLEXIBLE FRIENDS

Flexible Friends create new placement possibilities in horizontal, thin vertical, and diagonal cracks. They excel where odd angles and torquing loads may be encountered and were designed to complement Friends where flexibility and small size are required.

- The 5.0 mm flexible stainless steel stem flexes equally through 360 degrees of motion; its large single cable is both kink and abrasion resistant.
- The rigid swaged head and tail pieces are specially designed to avoid the problems of using welds inappropriately in flexible componentry.

- Like Friends, the four 7000 series aluminum alloy cams ensure the best balance of holding strength and resistance to shearing and the 2:2 ratio (two cam pairs in opposition) are more secure than 2 to 1.
- All units are individually tested many times during their manufacturing process to assure quality and consistency.

GUARANTEE Wild Country guarantees all of our products for the lifetime of the original owner against defects in workmanship or materials, unless the product has been worn out, misused, or abused, as determined by our examination, Wild Country or its agent will repair or replace any defective product as appropriate.

LIABILITY Climbing, mountaineering, skiing, and related outdoor activities are potentially hazardous. It is the responsibility of the individual to learn and understand the proper techniques associated with safe participation in those activities, and to fully accept and assume all risk, damages, injury or death which may result from the use or misuse of the items in this catalog. This catalog is not meant as a substitute for personal instruction by a qualified person.

SUPER ROCKS

ROCK

NUT KEY

SUPER ROCKS

These beautiful new nuts incorporate all the advantages of sophisticated profiled chocks without the common flaws of oversticking and difficult cleaning. Rather than replacing Rocks, Super Rocks broaden the arsenal at a climbers disposal in the war against gravity. They provide a nut with greater camming action, better adaptability, and positive "locking" on shallow placements.

- The larger nuts are deep forged from HE 30 aluminum and the smaller nuts use HE 15 aluminium in a hot stamping process.
- Available in 9 sizes on stainless steel wire.
- The concave and convex surfaces have corresponding flat sections and cut-outs on three levels that provide both positive locking action around the cut-outs, and a flat surface opposite each to aid in removal.

ROCKS

Rocks subtle evolution keep them as valid today as when they revolutionized passive chock design, 14 years ago. Their simple form masks extremely well-developed characteristics that allow faster, easier,

and more secure right and left hand placements. The foundation of any rack, Rocks are lightweight, versatile, and the performance standard by which others are judged.

- Narrow shape enhances contact in shallow placements and reduces leverage.
- Integrated sizing- each nut's width is slightly larger than its profile allowing for faster gear selection and placement and effectively doubling your coverage.
- Over-tumbling removes hard edges which hang up easily and make cleaning difficult. 6064 aluminum alloy and stainless steel wire ensure the highest strength materials are at work.
- Available in 10 sizes on wire and on Dyneema™ cord in numbers 7-10.

NUT KEY

The original Nut Key unlocks stuck nuts and is an amazingly versatile Friend tool as well. It is nearly 8 in. long, and with the large solid hooked end, it not only threads runners and hooks nuts, but also has the heft for an occasional coercing tap.
Size: Length- 197 mm (7.75 in.)
Weight: 47 g (1.7 oz.)

MICROLITE 10

MICROLITE 10B

MACRO SCREWGATE

MACRO 10

MACRO 10B

MINI HMS

THE HAND

WILD COUNTRY KARABINERS

- Strong, positive gate springs and pronounced gate notches that resist whiplash openings under impact and close quickly when opened.
- Lightweight, high-strength 7075 aluminum alloy.
- Special "Bow-Back" designs are easy-to-handle, maximize interior space, and gate clearance.

MICROLITE 10 & 10B

These beautiful, versatile karabiners are at home on big walls, alpine faces, or heinous sport routes. Exceptionally light at 48 g and with a nose profile that eases tight clips, the Mic 10 and Mic 10B can easily become the mainstay of your rack.

Weight:

Mic 10- 48 g (1.7 oz.)

Mic 10B- 50 g (1.8 oz.)

Min. Strength:

2300 kg (5060 lb.)

Gate Open Strength:

700 kg (1540 lb.)

Gate Clearance:

Mic 10- 22 mm

Mic 10B- 26 mm

MACRO 10 & 10B

A larger body in 10 mm bar stock, the Macro has considerable interior working space without considerable weight. At only 53 g, these biners are versatile enough for all-around use, and are less fiddly than the smaller Microlites. The Macros are excellent for winter climbing, for racking gear, or anywhere extra clearance and space are required.

Weight:

Macro 10- 53 g (1.9 oz.)

Macro 10B- 55 g (1.9 oz.)

Min. Strength:

2300 kg (5060 lb.)

Gate Open Strength:

700 kg (1540 lb.)

Gate Clearance:

Mac 10- 25 mm

Mac 10B- 32 mm

MACRO SCREWGATE

The Macro Screwgate is strong, light, roomy, and has a very positive locking collar. Made of 10 mm bar stock, it is all you need in a locking karabiner, so why carry more.

Weight: 66 g (2.4 oz.)

Min. Strength:

2300 kg (5060 lb.)

Gate Open Strength:

700 kg (1540 lb.)

Gate Clearance: 22 mm

MINI HMS

This specialized screwgate biner was developed for belaying with the Italian or Munter hitch. It also works extremely well in concert with belay plates and figure 8's. The HMS's wide, smooth contact zone ensures jam free function and lessens rope wear. Its efficient compact size and relative light weight are appropriate for all climbers. Made of 12 mm, 7075 aluminum bar stock.

Weight: 85 g (3 oz.)

Min. Strength:

2200 kg (4840 lb.)

Gate Open Strength:

600 kg (1320 lb.)

Gate Clearance: 15 mm

THE HAND

We have never seen a stronger, lighter, or more stunningly simple mountaineering ascender. The Hand is forged from 2024 aluminum alloy and the single unit has no moving parts. Modelled after the patented Clam Cleat™ used in sailboat racing, the Hand literally pulls the rope into its cleat when loaded; the harder the pull the firmer the bite. Useful on every diameter kernmantle rope from 7 mm to 12 mm it excels in hauling systems, rescue and self-rescue applications, and of course, ascending fixed ropes. At only 3 oz. the Hand will outperform devices that are twice the weight. Weight: .09 kg (3 oz.)

BRAKEMAN

BRAKEMAN W/WIRE

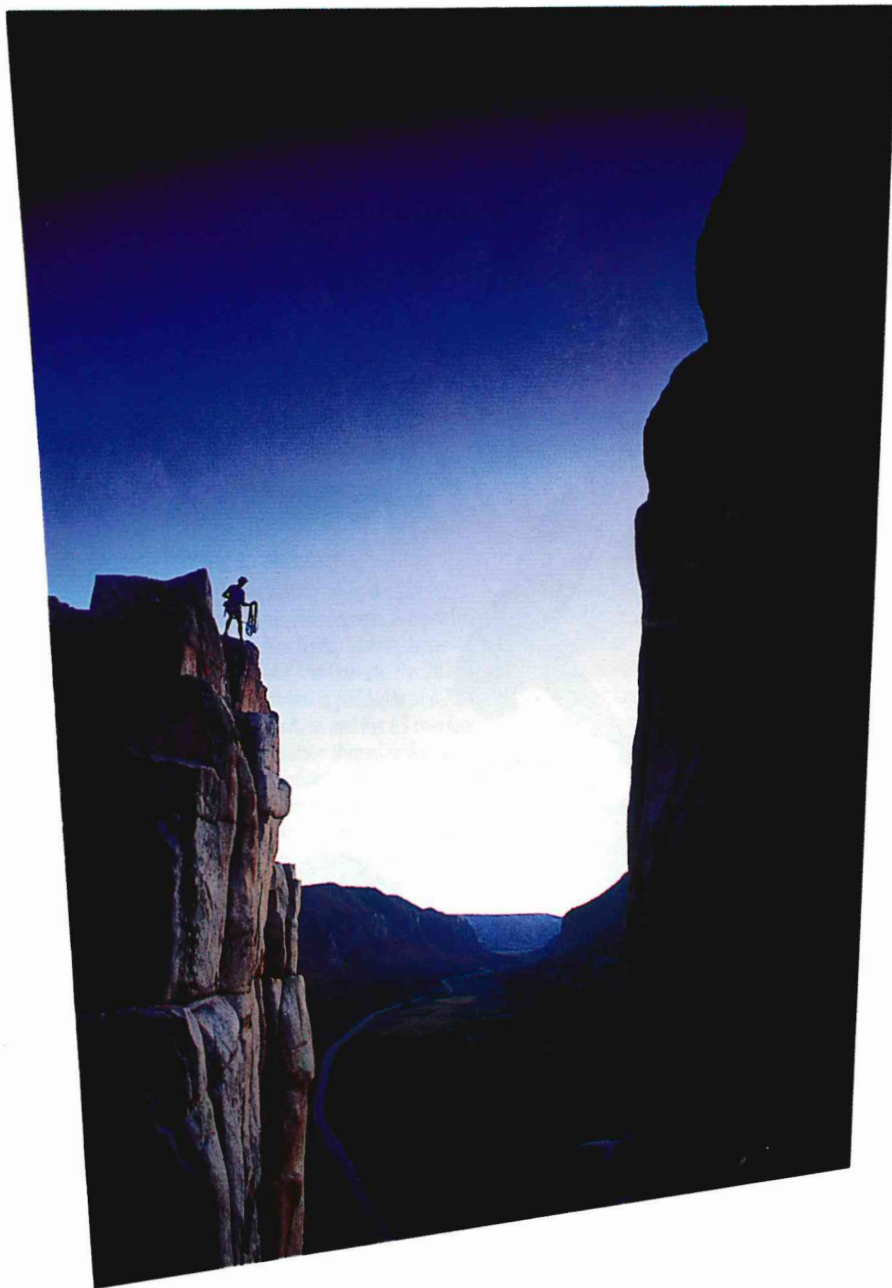

SUPER 8

TOP GUN

KC Baum finishing up at Unaweep
Canyon, CO.
Photo: Bill Hatcher

THE BRAKEMEN

High performance Brakeman and Brakeman with Wire are extremely smooth when retrieving or paying out rope while belaying and exceedingly strong without unnecessary bulk. The Wired version's cable not only acts as a "keeper cord", but actually works as a spring to help keep the plate from locking up inappropriately. Forged from 2024 T6 aluminum alloy.

Brakeman

Weight: 35 g (1.3 oz.)
Strength: 2000 kg (4400 lb.)

Brakeman w/Wire

Weight: 45 g (1.6 oz.)
Strength: 2000 kg (4400 lb.)

SUPER 8

The Super 8 is a bastion of efficiency. It does its job, rappelling and belaying, without excess weight or complexity and with no sacrifice of strength and security.

- Forged from 2024 T6 aluminum alloy.
- Suitable for use with single or double rope systems.
- Smooth radii for minimal rope wear.
- Extremely lightweight.

Size: Length 114 mm (4.5 in.)

Weight: 83 g (2.9 oz.)

Min. Strength: 4000 kg (8800 lb.)

TOP GUN

Whether you're taking one shot or you're going to fire away all day the Top Gun offers you the right stuff. The padded waist and leg loops are filled with light and quick-drying monofilament polypropylene fiber. The waist closes with 38 mm nylon webbing through our forged buckle. The Top Gun excels in flight or in soft landings.

- Split, twin hitching straps in back.
- New molded gear racks.
- Interchangeable leg loops.

Colors: Assorted

Sizes: S- L

Weight: .40 kg (14 oz.)

SKY PILOT

AERO

PAT LITTLEJOHN

ALPINIST

ALPINLITE

SKY PILOT

On the cutting edge, the Sky Pilot was designed in response to input from climbers like Randy Leavitt, Jerry Moffatt, and Ron Fawcett. The 38 mm nylon waist belt is padded with a 70 mm tape cushion and the 65 mm leg loops are contour shaped and padded for extra comfort.

- New aluminum forged buckle is strong, secure, and almost half the weight of our flat buckle.
 - Exclusive nylon molded gear racks hold biners at the perfect angle for quick access.
 - Dual elastic back hitching straps.
 - Reinforced tie-in points.
- Color: Black/Multicolor
Size: S-L
Weight: .38 kg (13 oz.)

AERO

The Aero offers the comfort and performance of the Sky Pilot with the versatility of adjustable leg loops. A great harness for everything from the rock gym to the mountains.

- New forged aluminum buckle is

strong, secure, and almost half the weight of our flat buckle.

- Exclusive nylon molded gear racks that hold gear at the perfect angle for quick selection.
 - Elastic back hitching straps.
 - Reinforced tie-in points.
- Color: Black/Multicolor
Size: S-L
Weight: .42 kg (15 oz.)

PAT LITTLEJOHN

A true classic, the Littlejohn has a fully adjustable 50 mm belt and 38 mm leg loops that create absolute versatility in this one-size-fits-all harness. The PLJ will fit over tights and t-shirts or massive Arctic suits. It is extremely popular for mountaineering use, at the gym or for schools and rescue groups.

- Adjustable back hitching strap.
 - Molded gear racks work great with biners or ice tools.
 - The original one-size-fits-all harness.
- Color: Royal/Black
Size: One Size (27in. - 40 in. waist)
Weight: .42 kg (15 oz.)

ALPINIST

Probably the most versatile harness available. The Alpinist performs beautifully over a wide range of climbing applications. The body is a combination of 38 mm nylon tape in the waist belt with a 70 mm padded cushion behind it and 75 mm nylon tape leg loops. The adjustable rise in the leg loops allows you to customize the fit and drop the loops while staying tied-in at the waist.

- Exclusive new molded gear racks firmly hold gear at the proper angle for quick access.
 - New forged buckle provides security with half the size and weight of other buckles.
 - Perfect all-around harness.
- Color: Blue/Black
Size: S-XL
Weight: .45 kg (15.7 oz.)

ALPINLITE

Fashioned after the original Alpinist, the Alpinlite's no-frills design shaves 30% of the weight. Created for alpine and expedition climbing, it will also serve the new climber admirably.

- Built of sturdy 2 in. seat belt webbing and 38 mm nylon webbing.
 - New Wild Country forged buckle, half the size and weight and all the strength of other buckles.
 - Adjustable fit/rise.
- Color: Black/Blue
Sizes: S-L
Weight: .30 kg (10.5 oz.)

SEWN TAPE

SEWN GEAR

CHALK BAG BELT

PADDED GEAR SLING

HIGHWIRE

ROBO

CHALK

ADJUSTABLE AXE LEASH

AXE LEASH

DAISY CHAIN

ROPE BAG

SEWN TAPE

Wild Country has been bar tacking webbing longer than any other company in the mountaineering business. It's all done in-house, under our control, and not contracted out. We use only the highest quality Arova nylon webbing, woven for climbing use.

Sizes:

19 mm (3/4 in.) loop:
10 cm (4 in.), 15 cm (6 in.),
20 cm (8 in.), 30 cm (12 in.),
60 cm (24 in.), 120 cm (47 in.)

19 mm (3/4 in.) express:
10 cm (4 in.), 15 cm (6 in.)

Minimum breaking strength for all sizes: 2500 kg (5500 lb.)

DAISY CHAIN

This versatile runner is sewn from 19 mm tape and has 7 pockets each with a strength of 1000 kg.

Length: 98 cm (38.5 in.)

Weight: 65 g (2.3 oz.)

Strength:

1000 kg (2200 lb.) each pocket,
2500 kg (5500 lb.) as a runner.

PADDED GEAR SLING

The Padded Gear Sling is sewn from soft, but durable 45 mm woven polyester webbing with padded interior and bartacked to a 19 mm full-strength sling. It carries a huge rack with relative comfort, while even doubling as a runner in a pinch. A lifted loop over the shoulder makes it easy to hang at belays.

Size: S-L

Weight: .11 kg (4 oz.)

Strength: 2500 kg (5500 lb.)

ROBO

The Robo has a wider performance range than other "digit dusters". Its conical body and tilted mouth create easy entry for quick dips, yet it is deep enough to chalk up for the occasional crack. The Robo is pile-lined with a packcloth and Cordura body, stiffened brim, and brush holder.

Color: Assorted and Awesome

Size: 14-18 cm (5.5-7 in.) deep

Weight: 70 g (2.5 oz.)

HIGHWIRE

The Highwire is versatile enough for micro-edged face routes or multi-pitch hand and fist cracks. Cut from packcloth and Cordura, it's pile-lined and has a tape and wire stiffened brim to help keep it open for business. The Highwire will hold enough for big routes, but won't weigh you down on the short ones.

Color: Assorted and Cool

Size: 21 cm (8.5 in.) deep

Weight: .13 kg (4.5 oz.)

CHALK

Silky and dry from Germany.

Weight: 70 g (2.5 oz.)

CHALK BAG BELT

The subtle benefits of simplicity will be apparent once you notice how extremely well your bag hangs from this belt. Our 22 mm tape belt has a Fastex buckle. One size fits all.

Color: Assorted

Weight: 42 g (1.5 oz.)

ROPE BAG

The Rope Bag is equally adept as a food or gear bag on big walls, or for separating clothing from gear in your Kong Bag. Holds a single 11 mm or double 9's. The body is constructed from 4 and 6 ounce packcloth, and features a cord-locked drawstring, double-slider body zipper, and reinforced hang loop.

Color: Assorted two color combos

Size: 43 cm x 22 cm x 14 cm

(17 in. x 8.5 in. x 5.5 in.)

Weight: 86 g (3 oz.)

ADJUSTABLE AXE LEASH

A clever, sophisticated leash suited for use on technical axes and hammers. It has an adjustable "hang" loop that attaches securely with a Velcro wrist tab and is made of waterproof webbing.

Size: 104 cm (41 in.)

Weight: 42 g (1.5 oz.)

AXE LEASH

A clean, simple leash suitable for all general mountaineering uses.

Constructed from waterproofed nylon webbing, it has a basic sliding "O" ring for easy wrist adjustment and can be quickly fitted to any axe.

Size: 104 cm (41 in.)

Weight: 30 g (1 oz.)

THINNYS

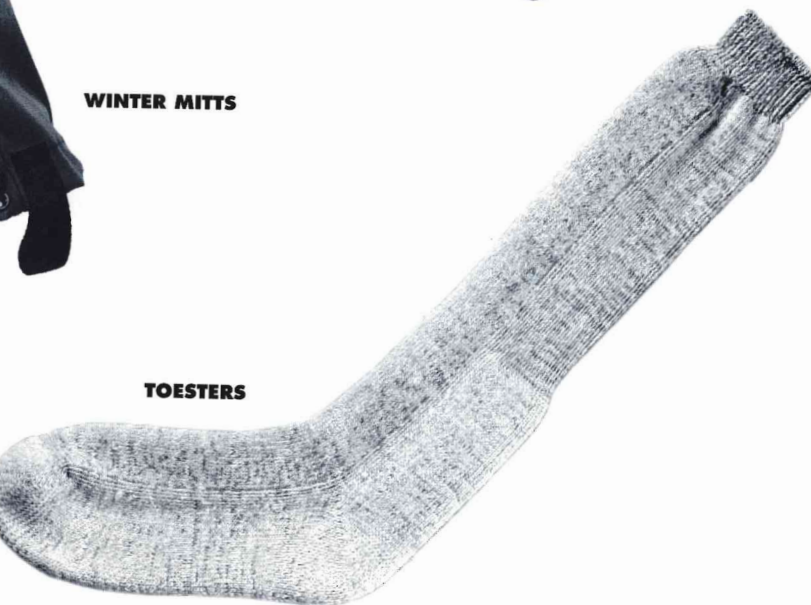

STICKY THICKYS

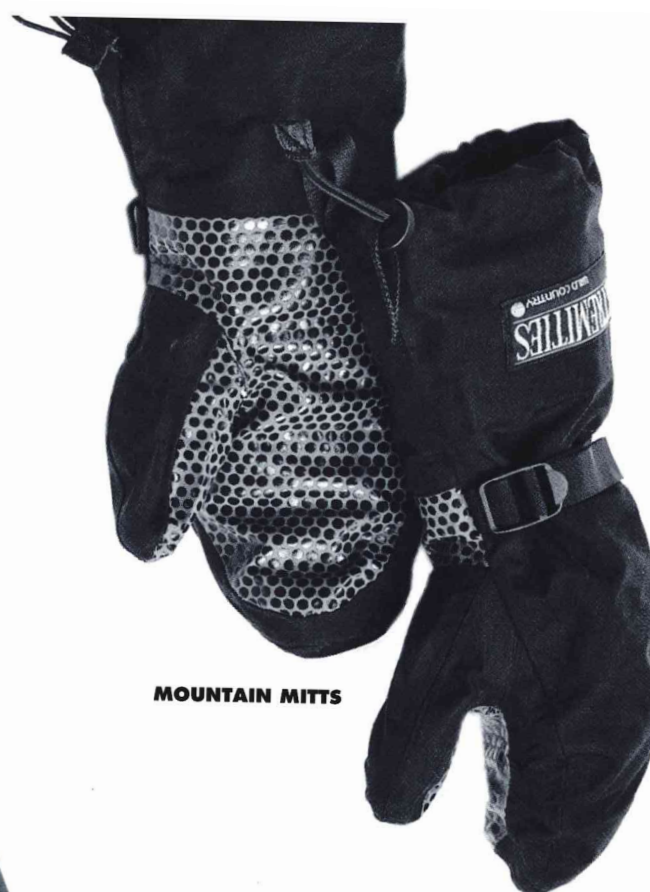

THICKYS

WINTER MITTS

TOESTERS

MOUNTAIN MITTS

Katie Cosley on the dreaded traverse
Makalu West Pillar Expedition.
Photo: Mark Houston

EXTREMITIES

Protecting hands and feet in frigid conditions has always been not only a prerequisite for success but more importantly survival. Climbers and explorers with frozen limbs rarely succeed and when they do, it often comes at a high price. The Extremities range fills the need for warm protective coverings that hinder dexterity and performance as little as possible.

THINNYs

Thinny's' snug super stretch material fit like a second skin. The tightly woven blend of 16% Lycra and 84% Meraklon polypro fabric is warm, dries quickly, and is durable when used alone.

Color: Red, Black, Navy
Size: One size
Weight: 20 g (.75 oz.)/pr.

THICKYS

Thickys are the perfect thermal glove. Combining great fit and dry warmth as a liner, this new fabric is hard wearing when used alone. The durable 100% Meraklon polypro has a brushed inner and tight knit outer. The box-finger pattern ensures excellent fit and dexterity.

Color: Red, Black, Navy
Size: S-XL
Weight: 35 g (1.2 oz.)/pr.

STICKY THICKYS

Take a Thickys' fit, warmth, and durability and apply our new "Dura Grip" palm and voila- you have a Sticky Thicky. This vulcanized rubber dot matrix is permanently bonded to the palm fabric, providing superior grip, and a surface that won't chip or peel.

Color: Red, Black, Navy
Size: S-XL
Weight: 45 g (1.5 oz.)/pr.

WINTER MITTS

The same efficient anatomical pattern as the Mountain Mitt in a sealed shell cut from Tactel Cyclone cloth that's both waterproof and breathable.

- One-hand closure at the gauntlet and wrist tensioner for a secure fit.
- Polyester pile/fleece laminate fabric is used in the Inner Mitt for warmth and quick drying.

Color: Royal
Size: S-XL
Weight: .20 kg. (7 oz.)/pr.

MOUNTAIN MITTS

Wild Country introduced seam-taped mitten shells in the mid 1980's. Now coupled with new technologies and anatomically cut patterns, Mountain Mitts have become the most versatile high performance mittens available. This tough, multi-purpose system will out perform all others in the wildest mountain conditions.

- Durable, soft 3 layer Oxford Gore-Tex fabric.
- Fully box-cut, anatomical fit with tape sealed seams.
- New "Dura Grip" palm, vulcanized rubber dot matrix applied to the palm is incredibly durable and sticky, even on metal axe shafts.
- Secure fit is ensured by the one handed gauntlet closure system and wrist tensioner strap.
- The inner Mitt is an advanced polyester pile/fleece laminate, that's removable for shell only use or drying.

Color: Black/Red
Size: S-XL
Weight: .23 kg (7.5 oz.)/pr.

TOESTERS

Toesters began by utilizing a new fiber not used in footwear; texturized polypro. It is warm, comfortable, extremely resilient, and wicks perspiration exceedingly well. Woven with Merino wool in a 50/50 intimate blend into a looped "terry" interior with a smooth knit outer, the resultant fabric produced socks that are phenomenally warm and dry quickly. Toesters incorporate areas of dual density loop stitching in the foot and shin for maximum warmth and protection.

Color: Grey
Size: S-L in Calf or Knee length
Weight: 90 g (3.2 oz.)/pr.
(for Calf length model)

SUPER PRO

TUNDRA

OVER BOOT

LIGHTNING ANORAK

LIGHTNING JACKET

Doug Ingersoll strolling across the summit of Pigeon Spire, the Bugaboos.
Photo: Carl Skoog

SUPERPROS AND TUNDRA GAITORS

A great randed gaitor begins with the right rand material and we use only the best, 5.10 stealth. Above the legendary rand we've redesigned both the SuperPro™ and Tundragaitors™ for maximum performance and durability. The uppers combine a new pattern with various materials each chosen to create the finest gaitors available.

- Three layer Gore-Tex fabric uppers are left uninsulated for maximum breathability and waterproofness.
- Available in 5 sizes with patterns intelligently graded so that an XS is shorter and an XL taller to better fit the person as well as the boot.
- New foam laminated, Ballistics nylon toe for high impact resistance.
- New high cut Cordura upper helps shed abrasion from ice, breakable crust, and the occasional crampon.
- The SuperPro is insulated with 200 cs Thinsulate for warmth and lightweight.
- Full front zipper with Velcro storm flap, and the gaitor top closes with an offset snap and cord locked elastic draw cord.

SuperPro-

Colors: Black/Black and Red/Black
Weight: .51 kg (18 oz.)

Tundragaitor-

Color: Royal/Black and Black/Black
Weight: .45 kg (16 oz.)

Sizes: XS- 26 in., S- 27 in., M- 28 in., L- 29 in., XL- 30 in.

Measured around vamp.

OVERBOOTS

The Overboots are designed for Arctic and high altitude temperatures where the cold creeps in through conventional layers. They are extremely light, durable, warm and universally recognized as the best in their class.

- Uppers of 3 layer Gore-Tex fabric.
- Sole, vamp and foot section are 11 oz. Cordura nylon with a Ballistics toe to resist impact wear.
- 200 cs Thinsulate in the foot section and 1/4 in. closed cell foam in the sole.
- Insulation "cut-outs" in the toe & heel accommodate "step-in" crampons.

Size: S-XXL

Measured around vamp of boot.

Color: Red/Black

Weight: .55 kg (1 lb. 4 oz.)/pr.

UNDER WATER NOTHING BREATHES BUT FISH!

Some have asked why, with a multitude of waterproof-breathable fabrics (WPB) available, we use specially treated coated nylon in our rain gear. The answer is simple: no fabric breathes when it's raining. Without a humidity and temperature difference between the air inside your parka and outside your parka, there is no significant "breathing," or more precisely, vapor transmission, occurring. We still like and use waterproof-breathable fabrics (Gore-Tex is still the best) but for lightweight, value, durability and almost twice the waterproofness as WPB fabrics, you can't beat our materials or designs when the sky opens up.

LIGHTNING JACKET

Fast and light, the Lightning Jacket is built for maximum comfort and protection in wet conditions. Cut similar to the Diamond Zipfront, but shorter, the fabric is double-coated 2 oz. nylon rip stop. The unique grommated "pit vents" provide surprising air circulation and the Velcro cuffs can be opened for maximum venting or closed up for downpours.

- Hood rolls up and velcros into a high collar.
- Zip-closed nylon mesh pockets with storm flaps.
- Velcro storm flap on front zipper.
- Abrasion patches on forearm.
- Elastic draw cord at hem with cord lock.
- Fully seam-sealed.

Sizes: S-XL

Colors: Blue with Black, Red with Black
Weight: .41 kg (15 oz.)

LIGHTNING ANORAK

The ultimate in light, functional, but durable rain shells, the Lightning Anorak is the best in its class. The same great pattern as the Diamond with grommated pit vents and Velcro-closed cuffs for a wider comfort range.

- Large zippered kangaroo pocket.
- Abrasion patch from the cuff to elbow.
- Hood rolls up and velcros into a high collar.
- Elastic drawstring with cord lock at the bottom hem.
- Fully seam-sealed.

Sizes: S-XL

Colors: Blue with Black, Red with Black
Weight: .39 kg (13.5 oz.)

DIAMOND ZIPFRONT

DIAMOND PANTS

DIAMOND ANORAK

LIGHTNING PANTS

LIGHTNING PANTS

Perfect lightweight pants to complete a total rain gear system. Simple, great fitting pants with lower leg zips and elastic and drawstring waist. Fully seam-sealed.

Sizes: S-XL

Colors: Blue or Red

Weight: .23 kg (8 oz.)

DIAMOND ZIPFRONT

The Zipfront is cut from a combination of 2 oz. Oxford nylon in the hood, cape shoulder, and arms for durability, and light, soft rip stop in the body for comfort. For light, tough storm protection in the mountains, you can't beat the Zipfront.

- Catalytic topcoat fabrics create a permanent bond between the fabric and the seam tape.
- Weatherproof inset storm cuffs.
- Elastic draw cord at hood and hem.
- Stiffened visor and oversized hood to accommodate helmet or hats.
- Two waterproof, zippered pockets.
- Double slider zipper and storm flap.
- Pit-zips for ventilation.

Color: Bahama Blue/Black, Red/Black

Size: S-XL

Weight: .54 kg (20 oz.)

DIAMOND ANORAK

The Diamond Anorak is extremely weather tight by design as well as through the fabric used. It has a full cut hood with stiffened brim for use with helmets or hats and deep neck zip for ventilation. This anorak, stuffed in your pack, is great protection against a late afternoon thunderstorm or late season snow squall.

- Combination of coated Oxford cloth and rip stop with catalytic topcoat to ensure permanent bond with the seam tape in sealing.
- Weatherproof inset storm cuffs.
- Large, zippered front pocket.
- Elastic draw cords at hood and hem.

Size: S- XL

Colors: Bahama Blue/Black,
Red/Black

Weight: .420 kg (14.5 oz.)

DIAMOND PANTS

Rather than use a combo of Oxford and ripstop, which would have required many more seams and seam tape, we made the Diamond Pants entirely of Oxford cloth. The result is great fitting, clean rain pants that will shed cuts and abrasion while keeping you dry. Coupled with either the Anorak or Zipfront, they create a mobile, waterproof shelter weighing around 1.5 lb.

- All coated Oxford cloth construction.
- Elastic and draw cord waist.
- Knee length leg zips for easier on and off.

Color: Black

Size: S-XL

Weight: .32 kg (11 oz.)

DC3'S

BELT

CAMILLE

NEBULA

COMET

LASER

Bill Crouse on fixed rope, Annapurna.
Photo: Matt Culberson

DC3'S

DC3's blend the durability of canvas and the lightweight stretch of Lycra. DC3 fabric is the combination of two different 100% polyester fibers: ESP™, a tough filament that holds its shape extremely well, and Comfort Fiber for a soft and cottony inside. In concert with our loose fitting, action-cut pattern, this fabric creates pants that are great for climbing, mountain biking, trekking, and alpine ascents. Unlike cotton blends, DC3's are exceptional in cold conditions, as the fabric wicks perspiration and dries quickly.

- Three zip-closed pockets, two on seam and one guide book sized back pocket.
- Elastic and draw cord waist band.
- 14 in. leg zippers on the back of the ankles.
- Light enough for summer, dry and warm when used as a layer in winter.

Color: Black with assorted pocket trim.
Sizes: S-XL
Weight: .28 kg (10 oz.)

WILD COUNTRY BELT

Keep your trousers from taking a screamer or just look incredibly cool in your new W.C. Belt. To make the situation even better, you can wear it knowing that you're supporting the Access Fund at the same time. When you buy this awesome belt made with our new super light, super strong buckle and comfortable 38 mm webbing, all the profit goes to the Access Fund. What a deal. See it, buy it, wear it, love it.

Color: Black or cool checkered
One Size (wicked long, cut to length)
Weight: 45 g (1.8 oz.)

CAMILLE

The image that began a revolution of lizard consciousness, Camille lives on in our tank and the beautiful mock turtles with split tail. Mock-tees are 100% heavyweight pre-washed cotton.

Tank Top

Color: White
Size: S-XL
Weight: .12 kg (4 oz.)

Mock Tee

Colors: White or Lime
Size: S-XL
Weight: .26 kg (9oz.)

LASER

The Laser's classic teardrop shape and sleek canted bottom make it a pleasure to carry. The single panel opening ensures high capacity and convenient access to its contents. During a lightning ascent, or as a travel companion, the Laser won't let you down.

- A body cut from 8 oz. packcloth and 11 oz. Cordura nylon.
- Modified Dorsal Split foam back pad, with padded shoulder straps and removable waist belt.
- Zip closed interior pocket.
- Hand-haul loop and access tabs on the front panel.

Colors: Assorted
Size: 1200 cu. in.
Weight: .39 kg (14 oz.)

COMET

The Comet excels at the crag, skiing steep terrain, or in a dash to the summit. The anatomically cut body uses our Dorsal Split back and a canted

bottom to keep the center of gravity low, close, and moving with you. A large, single compartment pack cut from 11 oz. Cordura nylon, the Comet

has an ingenious interior "bellows" pocket on one side that provides convenient access to water bottles, cameras, etc., and still allows the pack to keep a smooth profile.

- Top flap has two pockets lined with bright fabric and a Velcro key-keeper and a rope tab.
- The closure strap forms a daisy chain.
- Removable 1.5 in. waist belt and curved padded shoulder straps.
- Dorsal Split back pad. The foam is split, not sewn through, so the pack wraps around you ensuring an excellent fit.

Color: Black
Size: 1800 cu. in.
Weight: .77 kg (1 lb. 12 oz.)

NEBULA

A beautiful, all around rucksack for skiing or climbing. The body is a single compartment cut from 420 denier packcloth with Cordura sides for protection from ski edges. The anatomical cut and canted bottom keep the pack, and load, close to you when you're blasting through the trees or tunneling through a cornice.

- Bar-tacked attachment points for axe or crampons.
- Quick-release compression straps for skis.
- Padded straps and removable foam pad.
- Top pocket with Velcro key-keeper.

Size: 1800 cu. in.
Colors: Bahama Blue/Black,
Red/Black, Sea Green/Black
Weight: .56 kg (1 lb. 4 oz.)

MORPHOS

MUTANT

LIGHTSPEED

QUEST

OLYMPUS MONS

MORPHOS

This rugged cousin to the Mutant is cut on a similar pattern, but simpler in design. For general crag bashing the Morphos will take loads of punishment without complaint. The body is double layered, the outer is 1000 denier Cordura and the inner is packcloth, really two packs in one (the liner is light-colored to make finding things easier).

- Dual bar-tacked attachment points.
 - Removable foam pad.
 - Padded shoulder straps.
 - Top pocket with Velcro key-keeper.
- Colors: Black with cool trim
Size: 2400 cu. in.
Weight: .66 kg (1 lb. 8 oz.)

MUTANT

A clean versatile rock climbing pack, the Mutant's sleek bullet shape is perfect for hauling on the "Nose" or for hauling your gear to the crag. Its body is overcut to avoid jamming and built to take abuse. The Mutant is a pure rock climbing sack of uncompromised design.

- Cut from Ballistics Nylon with padded, recessed closure buckle and double bottom.
- Dual, tape reinforced daisy loops for hauling and utility.
- For hauling, the padded shoulder straps tuck inside the pack through special "cut-outs" in the lid.

- The waist belt slides neatly into a padded tube in the base.
- Two internal bellows pockets, one on either side, with diagonal zippers for quick access.

Colors: Black w/asst trim
Size: 2400 cu. in.
Weight: .94 kg (2 lb. 2 oz.)

LIGHTSPEED

Designed for steep ice, the Lightspeed performs wonderfully on less heinous routes as well. Its body is cut similar to the Mutant, designed for occasional hauling, but is lighter and not quite as round.

- Extendible lid for over-loading.
- Crampon "Fastpatch" and dual tool tube that holds one or two ice tools securely.
- Dorsal Split back pad and padded waist belt.
- Dual daisy chains on each side carry skis or snowshoes.
- Two top flap pockets and snow collar.

Colors: Red, Blue or SeaGreen with Purple
Size: 2400 cu. in.
Weight: .91 kg (2 lb.)

QUEST

The top rated frameless alpine pack by AAI and Backpacker Magazine, Fall 1992. Beautiful design execution and absolute function have resulted in the Quest's successful use on Everest, Ama Dablam, and Annapurna in the last year. The climbers on each trip agreed on one thing: "the Quest is the best alpine pack in the world."

- New extended lid for extra capacity.
- T-cut Dorsal Split back pad wraps around your back and extends all the way up to the lifter straps for maximum support.
- Cut from a combination of packcloth and Cordura nylon.
- Elastic "Fastpatch" is a fast, secure crampon attachment system.
- Quick release side compression straps make it easy to carry extra gear and adjustable tool loops will take one or two tools.
- Padded hip belt is designed to accommodate a holster, water bottles, etc.

Colors: Red, Bahama Blue, Sea Green with Black
Size: 3000+ cu. in.
Weight: 1.07 kg (2 lb. 6 oz.)

OLYMPUS MONS

The "Oly Mon" is a truly lightweight expedition pack. It's ridiculous to shed grams on your rack and carry needless pounds in your pack. Used on

expeditions around the world it's the pack everyone wants to carry, especially up high. The "Oly Mon" at just over 3 1/2 lbs. doesn't sacrifice comfort or durability, but stresses efficiency, versatility, and durability. Once you use it, you'll wonder why anyone would carry more.

- Cut from 8 oz. and 11 oz. Cordura nylon.
- The T-cut Dorsal Split foam back and removable 6061 aluminum stays combine to provide excellent support and stability, even with heavy expedition-type loads.
- The lift straps and contoured shoulder straps provide 6.5 in. of adjustment.
- A wide padded hip belt helps reduce shoulder load by use of the new uncomplicated SEVS straps, which pull in the canted bottom of the main compartment.
- Fully extendible lid for "excess" baggage.
- The elastic "Fastpatch" crampon attachment is flanked by dual tool loops that run up to daisy attachment points and the lid closure.

Color: Black
Size: 4200-4900 cu. in.
Weight:

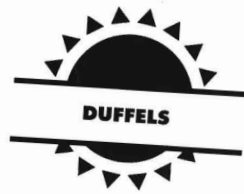

With stays: 1.65 kg (3 lb. 10 oz.)
Without stays: 1.5 kg (3 lb. 5 oz.)

KONG

MIGHTY JOE

WHALE

Camp 1 Makalu.
Photo: Bill Crouse

KONG AND MIGHTY JOE DUFFELS

The Kong's massive volume will carry all your expedition gear with room for a few extra trinkets going home. Incredibly tough materials and meticulous construction ensure your gear's security and protection. The moderate "A" shape is slightly taller than it is wide so that it's easier to carry at your side or over your shoulder; a real benefit with 100+ lb. loads.

The Mighty Joe is a smaller version of the Kong. Large enough to hold a rucksack and gear, it has all the features of the Kong, in a moderately sized duffel.

- Bottom and sides are cut from 22 oz. Ironcloth, a remarkable nylon vinyl laminate that's soft at sub-zero temperatures, absolutely waterproof, and more abrasion resistant than 18 oz. Ballistics nylon.
- The bottom is lined with a removable foam pad to protect its contents. Bottom seams are also raised 3 in. from the ground to eliminate water entering.
- Strong 3 in. nylon webbing handles are rolled and stitched.
- The top is 11 oz. Cordura, and has a curved, #10 zipper for wide opening. Two compression bands help stabilize less-than-full loads.

Kong:

Color: Black

Size: 36 in. L x 17 in. H x 15 in. W
8500 cu. in.

Weight: 1.6 kg (3 lb. 8 oz.)

Mighty Joe:

Color: Black

Size: 26 in. L x 12 in. H x 11 in. W
3500 cu. in.

Weight: .91 kg (2 lb.)

THE WHALE

The way this thing swallows up gear you might expect to find Jonah in there. Cut on the same great pattern as the Kong, the Whale is sewn from Ballistics nylon with wrap around nylon webbing handles. The taller-than-wider shape is easier and more comfortable to carry than rectangular bags. All seams are at least double-stitched and bound with high stress points stitched up to 6 times.

- Lockable #10 zipper, over 5 ft. long.
- End haul/hand loops for easier handling.
- Quick-release compression straps to hold loads firmly.

Color: Black

Size: 8500 cu. in.

Weight: 1.45 kg (3 lb. 4 oz.)

QUASAR

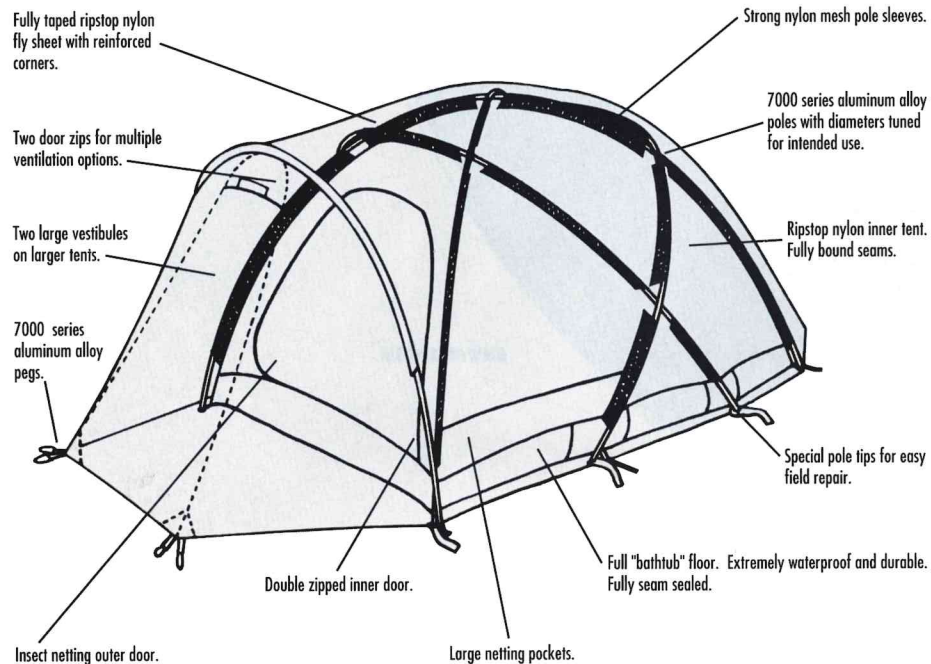

TERRA NOVA

HYPERSPACE

STORM INSURANCE

Each Wild Country tent is designed first and foremost to provide the most dependable shelter, in the wildest conditions. Our tendency to overbuild, whether it's a lightweight tent or an expedition model, is born of the knowledge that protection from being driven into a storm lashed night by a shredded tent is worth a few more dollars from your wallet or a few extra ounces on your back. Given the experience and choice we know you'd choose the same.

QUASAR

Enduring the most powerful storms, it's easy to see the strength inherent in the Quasar's design. Sleek and stable, it withstands wind with hardly a ruffle and shrugs off heavy snow loads with its unique frame. The Quasar's reputation as the strongest, lightweight, two person mountain tent available results in expeditions buying this portable bomb shelter rather than depending on a free tent from elsewhere.

- A frame of 4, 9.5 mm 7001-T6 aluminum alloy poles.
- Continuous mesh pole sleeves for ease of set up.
- Front and rear vestibules and entrances.
- Real bathtub floor.
- Seam tape-sealed floor and fly.
- Interior mesh storage pockets and hang loops.

Colors: Yellow/Grey
Functional Weight: 3.8 kg (8 lb. 8 oz.)

Dimensions:
length- 229 cm (90 in.)
width- 137 cm (54 in.)
height- 96 cm (38 in.)

Packed: 21 cm x 56 cm
(8 in. x 22 in.)
Sleeps: 2

HYPERSPACE

By equalizing the panel size in the geodesic design of the Hyperspace, more strength and wind stability were created than with previous geodesics that utilized the same weight in fabric and poles. The result is that the Hyperspace with its almost rectangular floor, steep side walls, and increased volume is the finest three person mountain tent we've ever made.

- A frame of 5, 9.5 mm 7001-T6 aluminum alloy poles.
- Continuous mesh pole sleeves for ease of set up.
- Spacious 3 person design.
- Front and rear entrances with vestibules (front vestibule has additional pole support).
- Interior mesh pockets and hang loops.
- Heavy-duty bathtub floor.
- Seam tape-sealed floor and fly for absolute waterproofness.
- Eight guying points for extreme conditions.

Colors: Yellow/Grey
Functional Weight: 4.6 kg
(10 lb. 3 oz.)

Dimensions:
length- 208 cm (82 in.)
width- 190 cm (75 in.)
height- 120 cm (47 in.)
Packed: 21 cm x 71 cm (8 in. x 28 in.)
Sleeps: 3

TERRA NOVA

Designed for expedition use, the Terra Nova is a base camp tent that doesn't trade size for strength. Its proven geodesic design uses equalized panel sizes and a beefed up frame to ensure impressive strength in high winds and heavy snow loads. The Terra Nova delivers space and shelter in the harshest conditions.

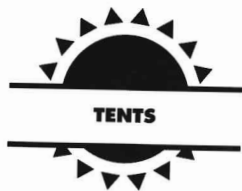

- The 5 pole frame is a combination of 9.5 mm and 11 mm 7001-T6 aluminum poles.
- Real bathtub floor.
- Seam taped-sealed floor and fly.
- Poled front vestibule and pull-out rear vestibule.
- Front and rear entrances with big "half-moon" door that falls out of the way when opened.
- Mesh pole sleeves.
- Interior mesh pockets and hang loops.

Colors: Yellow/Grey
Functional Weight: 5.7 kg
(12 lb. 8 oz.)

Dimensions:
length- 213 cm (84 in.)
width- 198 cm (78 in.)
height- 147 cm (58 in.)
Packed: 18 cm x 74 cm (7 in. x 29 in.)
Sleeps: 4

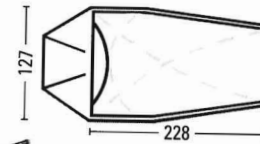

DEAD GUY

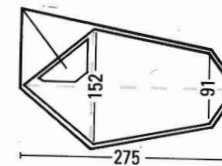

TENTS

TRISAR

RED DWARF

DEAD GUY

The Dead Guy works amazingly well for something so simple. Buried in snow or sand, these little wonders provide greater holding power than snow stakes or stuff sacks and allow you to keep your skis and axes for their intended use. On rocky ground, lay them out, pile up the rocks, and you'll sleep through a howling gale that would have flattened an unguyed or poorly guyed tent in the same place.

- Cut from 8 oz. Cordura.
- Comes complete with anchor cords and stuff sack.

Weight: .20 kg (10 oz.)/pr.

Size: 61 cm x 61 cm (24 in. x 24 in.)

TENTS

style	height (cm) (in.)	total weight (kg) (lb/oz.)	functional weight (kg) (lb/oz.)	inner tent floor area (m²) (ft.²)	sleeps

GEMINI	99 39	2.6 5/12	2.4 5/4	2.3 24.8	2
HIGH ALT. GEMINI	96 38	2.2 5	2.0 4/8	2.3 24.8	2

TRISAR

The versatile Trisar is the perfect blend of strength and light weight in the three season class. With a functional weight of just under 7 lbs., this aerodynamic 3-pole shelter is light enough to work as a summer backpacking tent, but, as numerous trips to the mountains have proven, will comfortably survive snow and wind that would destroy others in its class.

- A frame of 3, 8.5 mm 7001-T6 aluminum poles.
- Free standing, semi-geodesic design.
- Large, mesh back window for ventilation.
- Front pull-out vestibule.
- Seam tape-sealed floor and fly.
- Real bathtub floor.
- Interior mesh pockets and hang loops.
- Continuous mesh pole sleeves.

Colors: Yellow/Grey

Functional Weight: 3.1 kg
(6 lb. 14 oz.)

Dimensions:

length- 228 cm (90 in.)
width- 127 cm (50 in.) at door
91 cm (36 in.) at foot
height- 109 cm (43 in.)

Packed: 21 cm x 56 cm (8 in. x 22 in.)

Sleeps: 2

RED DWARF

One of the highest rated tents in the 1991 Backpacker field test of lightweight tents, the Red Dwarf was noted for its headroom and especially its weatherproofness. The two cross-over pole design supplies 42+ in. of headroom and the steep sidewalls help to alleviate the claustrophobia usually associated with tents in this class.

- Tent frame consists of 2, 8.5 mm 7001-T6 aluminum alloy poles.
- Single panel, mesh vented, half-moon door.
- Full front vestibule for gear storage.
- Seam taped-sealed floor and fly.
- Real bathtub floor.

Colors: Yellow/Grey

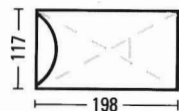

Functional Weight: 2.2 kg (5 lb.)

Dimensions:

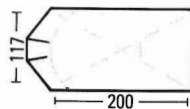

length- 275 cm (108 in.)
width- 152 cm (60 in.) at door
91 cm (36 in.) at foot
height- 112 cm (44 in.)

Packed: 15 cm x 49 cm (6 in. x 19 in.)

Sleeps: 2

GEMINI

The Gemini is a bit bigger than the HA Gemini with a third pole for increased stability, a coated vestibule and no-see-um netting that all add livability whenever a lightweight shelter is a prerequisite.

- 3-ply Nexus Gore-Tex fabric.
 - Frame of 3, 9.5 mm 7001-T6 aluminum poles.
 - Heavy duty coated nylon bathtub floor.
 - Sealed seams, interior hang loops.
- Color: Royal
Functional Weight: 2.4 kg (5 lb. 4 oz.)
Dimensions:
length- 200 cm (79 in.)
width- 117 cm (46 in.)
height- 99 cm (39 in.)
Packed: 21 cm x 56 cm (8 in. x 22 in.)
Sleeps: 2

HIGH ALTITUDE GEMINI

The High Altitude Gemini's full Gore-tex fabric construction and sturdy two pole crossover configuration creates a weather cocoon of incomparable compactness and stability. Features include a rear vent, 7 pullout loops, interior hang loop, and, like all Wild Country tents, sealed seams.

- Frame of 2, 9.5 mm 7001-T6 aluminum poles.
 - 3-ply Nexus Gore-Tex fabric and heavy duty coated nylon bathtub floor.
 - Awning prevents snow blowing in when opening door.
 - Taped seams, interior hang loops, plenty of tie downs.
- Color: Royal
Functional Weight: 2 kg (4 lb. 8 oz.)
Dimensions:
length- 198 cm (78 in.)
width- 117 cm (46 in.)
height- 96 cm (38 in.)
Packed: 18 cm x 56 cm (7 in. x 22 in.)
Sleeps: 2

BIVOUAC BAGS

Wild Country bivouac bags feature full Gore-Tex fabric construction for total protection no matter what the conditions.

- 3-ply Nexus Gore-Tex fabric.
- All seams are factory tape sealed.
- Heavy duty zippers and stitching.

ALPINE BIVI

The straight forward Alpine Bivi features double slider horizontal zip for starry night viewing or foul weather "submersible" mode.

Color: Royal
Weight: .54 kg (1 lb. 3 oz.)
Dimensions:
length- 213 cm (84 in.) reg.
244 cm (96 in.) long
width- 86 cm (34 in.)
Packed: 10 cm x 25 cm
(4 in. x 10 in.) reg.
Sleeps: 1
